SDA-Skill Development Activities, TD/PSB- Teaching Department / Paper Setting Board, ASC-Applied Science Course, ESC- Engineering Science Courses, ETC-

Emerging Technology Course, <b>AEC</b> - Ability Enhancement Course, <b>HSMS</b> -Humanity and Social Science and management Course, <b>SDC</b> - Skill Development Course, <b>CIE</b> -Continuous Internal Evaluation, <b>SEE</b> - Semester End Examination, <b>IC</b> – Integrated Course (Theory Course Integrated with Practical Course)	
<p><b>Credit Definition:</b>                  1-hour Lecture (<b>L</b>) per week=<b>1Credit</b>                  2-hoursTutorial(<b>T</b>) per week=<b>1Credit</b>                  2-hours Practical / Drawing (<b>P</b>) per week=<b>1Credit</b>                  2-hous Skill Development Actives (<b>SDA</b>) per week = <b>1 Credit</b></p>	<p>04-Credits courses are to be designed for 50 hours of Teaching-Learning Session                  04-Credits (IC) are to be designed for 40 hours’ theory and 12-14 hours of practical sessions                  03-Credits courses are to be designed for 40 hours of Teaching-Learning Session                  02- Credits courses are to be designed for 25 hours of Teaching-Learning Session                  01-Credit courses are to be designed for 12-15 hours of Teaching-Learning sessions</p>
<p><b>Student’s Induction Program:</b> Motivating (Inspiring) Activities under the Induction program – The main aim of the induction program is to provide newly admitted students a broad understanding of society, relationships, and values. Along with the knowledge and skill of his/her study, students’ character needs to be nurtured as an essential quality by which he/she would understand and fulfill the responsibility as an engineer. The following activities are to be covered in 21 days. Physical Activity, Creative Arts, Universal Human Values, Literary, Proficiency Modules, Lectures by Eminent People, Visits to Local areas, Familiarization with Department/Branch and Innovation, etc. For details, refer the ANNEXURE-I of Induction Programs notification of the University published at the beginning of the 1<sup>st</sup> semester.</p>	
<p><b>AICTE Activity Points</b> to be earned by students admitted to BE/ B.Tech., / B. Plan day college program (For more details refer to Chapter 6, AICTE Activity Point Program, Model Internship Guidelines): Over and above the academic grades, every regular student admitted to the 4 years Degree program and every student entering 4 years Degree programs through lateral entry, shall earn 100 and 75 Activity Points respectively for the award of degree through AICTE Activity Point Program. Students transferred from other Universities to the fifth semester are required to earn 50 Activity Points from the year of entry to VTU. The Activity Points earned shall be reflected on the student’s eighth semester Grade Card. The activities can be spread over the years, any time during the semester weekends, and holidays, as per the liking and convenience of the student from the year of entry to the program. However, the minimum hours’ requirement should be fulfilled. Activity Points (non-credit) do not affect SGPA/CGPA and shall not be considered for vertical progression. In case students fail to earn the prescribed activity Points, an Eighth Semester Grade Card shall be issued only after earning the required activity points. Students shall be admitted for the award of the degree only after the release of the Eighth semester Grade Card.</p>	
<p>*- <b>BMATS101</b> Shall have the 03 hours of theory examination (SEE), however, practical sessions question shall be included in the theory question papers. ** <b>The mathematics subject should be taught by a single faculty member per division, with no sharing of the course(subject)module-wise by different faculty members.</b></p> <p>#- <b>BPHYS102</b>SEE shall have the 03 hours of theory examination and 02-03 hours of practical examination</p> <p><b>ESC or ETC of 03 credits Courses</b> shall have only a theory component (L:T :P:S=3:0:0:0) or <b>if the nature then, of course, required practical learning syllabus shall be designed as an Integrated course (L:T:P:S= 2:0:2:0).</b></p> <p><b>All 01 Credit-</b> courses shall have the SEE of 01 hours duration and the pattern of the question paper shall be MCQ</p>

<b>The course BESCK204E, Introduction to C Programming, and all courses under PLC and ETC groups can be taught by ANY DEPARTMENT</b>									

## 29052023/V10 scheme for Computer Science and Engineering and allied branches (CSE/ISE and BT all allied branches of CSE)

- The student has to select one course from the ESC-II group.
- Civil Engineering Students shall opt for any one of the courses from the ESC-II group **except**, BESCK204E-**Introduction to C Programming**
- The students have to opt for the courses from ESC group without repeating the course in either 1<sup>st</sup> or 2<sup>nd</sup> semester
- The students must select one course from either ETC-II or PLC-II group.
- If students study the subject from ETC-I in 1<sup>st</sup> semester he/she has to select the course from PLC-II in the 2<sup>nd</sup> semester and vice-versa

**Professional Core Course (IPCC):** Refers to Professional Core Course Theory Integrated with practicals of the same course. Credit for IPCC can be 04 and its Teaching– Learning hours (L : T : P) can be considered as (3 : 0 : 2) or (2 : 2 : 2). The theory part of the IPCC shall be evaluated both by CIE and SEE. The practical part shall be evaluated by only CIE (no SEE). However, questions from the practical part of IPCC shall be included in the SEE question paper. For more details, the regulation governing the Degree of Bachelor of Engineering /Technology (B.E./B.Tech.) 2022-23 may please be referred.

**National Service Scheme /Physical Education/Yoga:** All students have to register for any one of the courses namely National Service Scheme (NSS), Physical Education (PE)(Sports and Athletics), and Yoga(YOG) with the concerned coordinator of the course during the first week of III semesters. Activities shall be carried out between III semester to the VI semester (for 4 semesters). Successful completion of the registered course and requisite CIE score is mandatory for the award of the degree. The events shall be appropriately scheduled by the colleges and the same shall be reflected in the calendar prepared for the NSS, PE, and Yoga activities. These courses shall not be considered for vertical progression as well as for the calculation of SGPA and CGPA, but completion of the course is mandatory for the award of degree.

**Professional Core Course (IPCC):** Refers to Professional Core Course Theory Integrated with practicals of the same course. Credit for IPCC can be 04 and its Teaching–Learning hours (L : T : P) can be considered as (3 : 0 : 2) or (2 : 2 : 2). The theory part of the IPCC shall be evaluated both by CIE and SEE. The practical part shall be evaluated by only CIE (no SEE). However, questions from the practical part of IPCC shall be included in the SEE question paper. For more details, the regulation governing the Degree of Bachelor of Engineering /Technology (B.E./B.Tech.) 2022-23

**National Service Scheme /Physical Education/Yoga:** All students have to register for any one of the courses namely National Service Scheme (NSS), Physical Education (PE)(Sports and Athletics), and Yoga(YOG) with the concerned coordinator of the course during the first week of III semesters. Activities shall be carried out between III semester to the VI semester (for 4 semesters). Successful completion of the registered course and requisite CIE score is mandatory for the award of the degree. The events shall be appropriately scheduled by the colleges and the same shall be reflected in the calendar prepared for the NSS, PE, and Yoga activities. These courses shall not be considered for vertical progression as well as for the calculation of SGPA and CGPA, but completion of the course is mandatory for the award of degree.

**Mini-project work:** Mini Project is a laboratory-oriented/hands on course that will provide a platform to students to enhance their practical knowledge and skills by the development of small systems/applications etc. Based on the ability/abilities of the student/s and recommendations of the mentor, a single discipline or a multidisciplinary Mini- project can be assigned to an individual student or to a group having not more than 4 students.

**CIE procedure for Mini-project:**

**(i) Single discipline:** The CIE marks shall be awarded by a committee consisting of the Head of the concerned Department and two faculty members of the Department, one of them being the Guide. The CIE marks awarded for the Mini-project work shall be based on the evaluation of the project report, project presentation skill, and question and answer session in the ratio of 50:25:25. The marks awarded for the project report shall be the same for all the batches mates.

**(ii) Interdisciplinary:** Continuous Internal Evaluation shall be group-wise at the college level with the participation of all the guides of the project.

The CIE marks awarded for the Mini-project, shall be based on the evaluation of the project report, project presentation skill, and question and answer session in the ratio 50:25:25. The marks awarded for the project report shall be the same for all the batch mates.

**No SEE component for Mini-Project.**

**Professional Elective Courses (PEC):** A professional elective (PEC) course is intended to enhance the depth and breadth of educational experience in the Engineering and Technology curriculum. Multidisciplinary courses that are added supplement the latest trend and advanced technology in the selected stream of engineering. Each group will provide an option to select one course. The minimum number of students' strengths for offering a professional elective is 10. However, this conditional shall not be applicable to cases where the admission to the program is less than 10.

<b>Note: VII and VIII semesters of IV years of the program</b>													

**(1)** Institutions can swap the VII and VIII Semester Schemes of Teaching and Examinations to accommodate research internships/ industry internships after the VI semester.

**(2)** Credits earned for the courses of VII and VIII Semester Scheme of Teaching and Examinations shall be counted against the corresponding semesters whether the VII or VIII semesters is completed during the beginning of the IV year or the later part of IV years of the program.

**Professional Elective Courses (PEC):** A professional elective (PEC) course is intended to enhance the depth and breadth of educational experience in the Engineering and Technology curriculum. Multidisciplinary courses that are added supplement the latest trend and advanced technology in the selected stream of engineering. Each group will provide an option to select one course. The minimum number of students' strengths for offering professional electives is 10. However, this conditional shall not be applicable to cases where the admission to the program is less than 10.

**Open Elective Courses:**

Students belonging to a particular stream of Engineering and Technology are not entitled to the open electives offered by their parent Department. However, they can opt for an elective offered by other Departments, provided they satisfy the prerequisite condition if any. Registration to open electives shall be documented under the guidance of the Program Coordinator/ Advisor/Mentor. The minimum numbers of students' strength for offering Open Elective Course is 10. However, this condition shall not be applicable to class where the admission to the program is less than 10.

**PROJECT WORK (21AIP75):** The objective of the Project work is

- (i)** To encourage independent learning and the innovative attitude of the students.
- (ii)** To develop interactive attitude, communication skills, organization, time management, and presentation skills.
- (iii)** To impart flexibility and adaptability.
- (iv)** To inspire team working.
- (v)** To expand intellectual capacity, credibility, judgment and intuition.
- (vi)** To adhere to punctuality, setting and meeting deadlines.
- (vii)** To install responsibilities to oneself and others.
- (viii)** To train students to present the topic of project work in a seminar without any fear, face the audience confidently, enhance communication skills, involve in group discussion to present and exchange ideas.

**CIE procedure for Project Work:**

**(1) Single discipline:** The CIE marks shall be awarded by a committee consisting of the Head of the concerned Department and two senior faculty members of the Department, one of whom shall be the Guide.

The CIE marks awarded for the project work, shall be based on the evaluation of the project work Report, project presentation skill, and question and answer session in the ratio 50:25:25. The marks awarded for the project report shall be the same for all the batch mates.

Course Title	<b>Introduction to C Programming</b>		
Course Code:	<b>BESCK104E/204E</b>	CIE Marks	50
Course Type (Theory/Practical /Integrated )	Integrated	SEE Marks	50
		Total Marks	100
Teaching Hours/Week (L:T:P: S)	2:0:2:0	Exam Hours	03
Total Hours of Pedagogy	40 hours	Credits	03
<b>Course Objectives:</b> <p>CLO 1. Elucidate the basic architecture and functionalities of a Computer</p> <p>CLO 2. Apply programming constructs of C language to solve the real-world problems</p> <p>CLO 3. Explore user-defined data structures like arrays, structures and pointers in implementing solutions to problems</p> <p>CLO 4. Design and Develop Solutions to problems using modular programming constructs such as functions and procedures</p>			
<b>Teaching-Learning Process (General Instructions)</b> <p>These are sample strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>Lecturer method (L) need not to be only traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>Use of Video/Animation to explain functioning of various concepts.</li> <li>Encourage collaborative (Group Learning) Learning in the class.</li> <li>Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>Introduce Topics in manifold representations.</li> <li>Show the different ways to solve the same problem and encourage the students to come up with their own creative ways to solve them.</li> <li>Discuss how every concept can be applied to the real world-and when that's possible, it helps to improve the students' understanding.</li> <li>Use <a href="https://pythontutor.com/visualize.html#mode=edit">https://pythontutor.com/visualize.html#mode=edit</a> in order to visualize the operations of C Programs</li> </ol>			
<b>Module-1 (6 Hours of Pedagogy)</b>			
<b>Introduction to C:</b> Introduction to computers, input and output devices, designing efficient programs. Introduction to C, Structure of C program, Files used in a C program, Compilers, Compiling and executing C programs, variables, constants, Input/output statements in C, <b>Textbook: Chapter 1.1-1.9, 2.1-2.2, 8.1 – 8.6, 9.1-9.14</b>			
<b>Teaching-Learning Process</b>		Chalk and talk method/PowerPoint Presentation	
<b>Module-2 (6 Hours of Pedagogy)</b>			
<p>Operators in C, Type conversion and typecasting.</p> <p><b>Decision control and Looping statements:</b> Introduction to decision control, Conditional branching statements, iterative statements, nested loops, break and continue statements, goto statement.  <b>Textbook: Chapter 9.15-9.16, 10.1-10.6</b></p>			
<b>Teaching-Learning Process</b>		Chalk and talk method/PowerPoint Presentation	
<b>Module-3 (6 Hours of Pedagogy)</b>			
<p>Functions: Introduction using functions, Function definition, function declaration, function call, return statement, passing parameters to functions, scope of variables, storage classes, recursive functions.</p> <p><b>Arrays:</b> Declaration of arrays, accessing the elements of an array, storing values in arrays, Operations on arrays,</p>			

Passing arrays to functions, <b>Textbook: Chapter 11.1-11.13, 12.1-12.6</b>	
<b>Teaching-Learning Process</b>	Chalkandtalkmethod/PowerPointPresentation
<b>Module-4 (6 Hours of Pedagogy)</b>	
Two dimensional arrays, operations on two-dimensional arrays, two-dimensional arrays to functions, multidimensional arrays. <b>Applications of arrays and introduction to strings:</b> Applications of arrays, case study with sorting techniques. <b>Introduction to strings:</b> Reading strings, writing strings, summary of functions used to read and write characters. Suppressing input using a Scanset. <b>Textbook: Chapter 12.7-12.12</b>	
<b>Teaching-Learning Process</b>	Chalkandtalkmethod/PowerPointPresentation
<b>Module-5 (6 Hours of Pedagogy)</b>	
<b>Strings:</b> String taxonomy, operations on strings, Miscellaneous string and character functions, arrays of strings. <b>Pointers:</b> Understanding the Computers Memory, Introduction to Pointers, Declaring Pointer Variables <b>Structures:</b> Introduction to structures <b>Textbook: Chapter 13.1-13.6, 14.1-14.3, 15.1</b>	
<b>Teaching-Learning Process</b>	Chalkandtalkmethod/PowerPointPresentation
<b>Course Outcomes (Course Skill Set)</b> At the end of the course the student will be able to: CO1. Elucidate the basic architecture and functionalities of a computer and also recognize the hardware parts. CO 2. Apply programming constructs of C language to solve the real world problem CO 3. Explore user-defined data structures like arrays in implementing solutions to problems like searching and sorting CO 4. Explore user-defined data structures like structures, unions and pointers in implementing solutions CO5. Design and Develop Solutions to problems using modular programming constructs using functions	
<b>Assessment Details (both CIE and SEE)</b> The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50). The minimum passing mark for the SEE is 35% of the maximum marks (18 marks out of 50). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together. <b>Continuous Internal Evaluation (CIE):</b> <b>The CIE marks for the theory component of the IC shall be 30 marks and for the laboratory component 20 Marks.</b> <b>CIE for the theory component of the IC</b>	

- Three Tests each of 20 Marks; after the completion of the syllabus of 35-40%, 65-70%, and 90-100% respectively.
- Two Assignments/two quizzes/ seminars/one field survey and report presentation/one-course project totaling 20 marks.

Total Marks scored (test + assignments) out of 80 shall be scaled down to **30 marks**

#### **CIE for the practical component of the IC**

- On completion of every experiment/program in the laboratory, the students shall be evaluated and marks shall be awarded on the same day. The **15 marks** are for conducting the experiment and preparation of the laboratory record, the other **05 marks shall be for the test** conducted at the end of the semester.
- The CIE marks awarded in the case of the Practical component shall be based on the continuous evaluation of the laboratory report. Each experiment report can be evaluated for 10 marks. Marks of all experiments' write-ups are added and scaled down to 15 marks.
- The laboratory test (**duration 03 hours**) at the end of the 15<sup>th</sup> week of the semester /after completion of all the experiments (whichever is early) shall be conducted for 50 marks and scaled down to **05 marks**.

Scaled-down marks of write-up evaluations and tests added will be CIE marks for the laboratory component of IC/IPCC for **20 marks**.

- The minimum marks to be secured in CIE to appear for SEE shall be 12 (40% of maximum marks) in the theory component and 08 (40% of maximum marks) in the practical component. The laboratory component of the IC/IPCC shall be for CIE only. However, in SEE, the questions from the laboratory component shall be included. The maximum of 05 questions is to be set from the practical component of IC/IPCC, the total marks of all questions should not be more than 25 marks.

The theory component of the IC shall be for both CIE and SEE.

#### **Semester End Examination (SEE):**

##### **SEE for IC**

Theory SEE will be conducted by University as per the scheduled time table, with common question papers for the course (duration 03 hours)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.

**The theory portion of the Integrated Course shall be for both CIE and SEE, whereas the practical portion**

will have a CIE component only. Questions mentioned in the SEE paper shall include questions from the practical component).

**Passing standard:**

- The minimum marks to be secured in CIE to appear for SEE shall be 12 (40% of maximum marks-30) in the theory component and 08 (40% of maximum marks -20) in the practical component. The laboratory component of the IPCC shall be for CIE only. However, in SEE, the questions from the laboratory component shall be included. The maximum of 04/05 questions to be set from the practical component of IPCC, the total marks of all questions should not be more than 30 marks.
- SEE will be conducted for 100 marks and students shall secure 35% of the maximum marks to qualify for the SEE. Marks secured will be scaled down to 50.

**Suggested Learning Resources:**

**Textbooks**

1. Computer fundamentals and programming in c, “Reema Thareja”, Oxford University, Second edition, 2017.

**Reference Books:**

1. E. Balaguruswamy, Programming in ANSI C, 7th Edition, Tata McGraw-Hill.
2. Brian W. Kernighan and Dennis M. Ritchie, The ‘C’ Programming Language, Prentice Hall of India.

**Web links and Video Lectures (e-Resources):**

1. [elearning.vtu.ac.in/econtent/courses/video/BS/15PCD23.html](http://elearning.vtu.ac.in/econtent/courses/video/BS/15PCD23.html)
2. <https://nptel.ac.in/courses/106/105/106105171/> MOOC courses can be adopted for more clarity in understanding the topics and verities of problem solving methods.

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

- Quizzes
- Assignments
- Seminars

**Lab Assignments**

1	C Program to find Mechanical Energy of a particle using $E = mgh + \frac{1}{2} mv^2$ .
2	C Program to convert Kilometers into Meters and Centimeters.
3	C Program To Check the Given Character is Lowercase or Uppercase or Special Character.
4	Program to balance the given Chemical Equation values x, y, p, q of a simple chemical equation of the type: The task is to find the values of constants $b_1, b_2, b_3$ such that the equation is balanced on both sides and it must be the reduced form.
5	Implement Matrix multiplication and validate the rules of multiplication.
6	Compute $\sin(x)/\cos(x)$ using Taylor series approximation. Compare your result with the built-in library function. Print both the results with appropriate inferences.

7	Sort the given set of N numbers using Bubble sort.	
8	Write functions to implement string operations such as compare, concatenate, string length. Convince the e parameter passing techniques.	
9	Implement structures to read, write and compute average marks and the student's scoring above and below the average marks for a class of N students.	
10	Develop a program using pointer to compute the sum, mean and standard deviation of all elements stored in an array of N real numbers.	

Course Title:	Introduction to Internet of Things (IOT)		
Course Code:	<b>BETCK105H/205H</b>	CIE Marks	50
Course Type (Theory/Practical /Integrated )	Theory	SEE Marks	50
		Total Marks	100
Teaching Hours/Week (L:T:P: S)	3-0-0-0	Exam Hours	03
Total Hours of Pedagogy	40 hours	Credits	03
<p><b>Course objectives</b></p> <ul style="list-style-type: none"> <li>• Understand about the fundamentals of Internet of Things and its building blocks along with their characteristics.</li> <li>• Understand the recent application domains of IoT in everyday life.</li> <li>• Gain insights about the current trends of Associated IOT technologists and IOT Analytics.</li> </ul>			
<p><b>Teaching-Learning Process</b></p> <p>These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding</li> <li>9. Use any of these methods: Chalk and board, Active Learning, Case Studies</li> </ol>			
<b>Module-1 (8 hours of pedagogy)</b>			
<p><b>Basics of Networking:</b> Introduction, Network Types, Layered network models</p> <p><b>Emergence of IoT:</b> Introduction, Evolution of IoT, Enabling IoT and the Complex Interdependence of Technologies, IoT Networking Components</p> <p>Textbook 1: Chapter 1- 1.1 to 1.3 Chapter 4 – 4.1 to 4.4</p>			
<b>Module-2 (8 hours of pedagogy)</b>			
<p><b>IoT Sensing and Actuation:</b> Introduction, Sensors, Sensor Characteristics, Sensorial Deviations, Sensing Types, Sensing Considerations, Actuators, Actuator Types, Actuator Characteristics.</p> <p>Textbook 1: Chapter 5 – 5.1 to 5.9</p>			
<b>Module-3 (8 hours of pedagogy)</b>			

IoT Processing Topologies and Types: Data Format, Importance of Processing in IoT, Processing Topologies, IoT Device Design and Selection Considerations, Processing Offloading.

Textbook 1: Chapter 6 – 6.1 to 6.5

**Module-4 ( 8 ours of pedagogy)**

**ASSOCIATED IOT TECHNOLOGIES**

Cloud Computing: Introduction, Virtualization, Cloud Models, Service-Level Agreement in Cloud Computing, Cloud Implementation, Sensor-Cloud: Sensors-as-a-Service.

**IOT CASE STUDIES**

Agricultural IoT – Introduction and Case Studies

Textbook 1: Chapter 10– 10.1 to 10.6; Chapter 12- 12.1-12.2

**Module-5 (8 hours of pedagogy)**

**IOT CASE STUDIES AND FUTURE TRENDS**

Vehicular IoT – Introduction

Healthcare IoT – Introduction, Case Studies

IoT Analytics – Introduction

Textbook 1: Chapter 13– 13.1; Chapter 14- 14.1-14.2; Chapter 17- 17.1

**Course outcome (Course Skill Set)**

At the end of the course the student will be able to:

CO1	Describe the evolution of IoT, IoT networking components, and addressing strategies in IoT.
CO2	Classify various sensing devices and actuator types.
CO3	Demonstrate the processing in IoT.
CO4	Explain Associated IOT Technologoes
CO5	Illustrate architecture of IOT Applications

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50). The minimum passing mark for the SEE is 35% of the maximum marks (18 marks out of 50). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

**Continuous Internal Evaluation(CIE):****Three Tests each of 20 Marks;**

- 1<sup>st</sup>, 2<sup>nd</sup>, and 3<sup>rd</sup> tests shall be conducted after completion of the syllabus of 30-35%, 70-75%, and 90-100% of the course/s respectively.
- Assignments/Seminar/quiz/group discussion /field survey & report presentation/ course project/Skill development activities, suitably planned to attain the COs and POs for a total of 40 Marks.

If the nature of the courses requires assignments/Seminars/Quizzes/group discussion two evaluation components shall be conducted. If course project/field survey/skill development activities etc then the evaluation method shall be one.

**Total CIE marks (out of 100 marks) shall be scaled down to 50 marks**

**Semester End Examination(SEE):**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (**duration 03 hours**)

- The question paper shall be set for 100 marks. The medium of the question paper shall be English). The duration of SEE is 03 hours.
- The question paper will have 10 questions. Two questions per module. Each question is set for 20 marks. The students have to answer 5 full questions, selecting one full question from each module. The student has to answer for 100 marks and **marks scored out of 100 shall be proportionally reduced to 50 marks.**
- There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions) **should have a mix of topics** under that module

	<p><b>Classes and objects:</b> Programmer-defined types, Attributes, Rectangles, Instances as return values, Objects are mutable, Copying,</p> <p><b>Classes and functions:</b> Time, Pure functions, Modifiers, Prototyping versus planning,</p> <p><b>Classes and methods:</b> Object-oriented features, Printing objects, Another example, A more complicated example, The init method, The __str__ method, Operator overloading, Type-based dispatch, Polymorphism, Interface and implementation,</p> <p><b>Textbook 2: Chapters 15 – 17</b></p>
<b>Course outcome (Course Skill Set)</b>	
At the end of the course the student will be able to:	
C01	Demonstrate proficiency in handling loops and creation of functions.
C02	Identify the methods to create and manipulate lists, tuples and dictionaries.
C03	Develop programs for string processing and file organization
C04	Interpret the concepts of Object-Oriented Programming as used in Python.
<b>Programming Exercises:</b>	
<ol style="list-style-type: none"> <li>1. <ol style="list-style-type: none"> <li>a. Develop a program to read the student details like Name, USN, and Marks in three subjects. Display the student details, total marks and percentage with suitable messages.</li> <li>b. Develop a program to read the name and year of birth of a person. Display whether the person is a senior citizen or not.</li> </ol> </li> <li>2. <ol style="list-style-type: none"> <li>a. Develop a program to generate Fibonacci sequence of length (N). Read N from the console.</li> <li>b. Write a function to calculate factorial of a number. Develop a program to compute binomial coefficient (Given N and R).</li> </ol> </li> <li>3. Read N numbers from the console and create a list. Develop a program to print mean, variance and standard deviation with suitable messages.</li> <li>4. Read a multi-digit number (as chars) from the console. Develop a program to print the frequency of each digit with suitable message.</li> <li>5. Develop a program to print 10 most frequently appearing words in a text file. [Hint: Use dictionary</li> </ol>	

with distinct words and their frequency of occurrences. Sort the dictionary in the reverse order of frequency and display dictionary slice of first 10 items]

6. Develop a program to sort the contents of a text file and write the sorted contents into a separate text file. [Hint: Use string methods strip(), len(), list methods sort(), append(), and file methods open(), readlines(), and write()].
7. Develop a program to backing Up a given Folder (Folder in a current working directory) into a ZIP File by using relevant modules and suitable methods.
8. Write a function named DivExp which takes TWO parameters a, b and returns a value c ( $c=a/b$ ). Write suitable assertion for  $a>0$  in function DivExp and raise an exception for when  $b=0$ . Develop a suitable program which reads two values from the console and calls a function DivExp.
9. Define a function which takes TWO objects representing complex numbers and returns new complex number with a addition of two complex numbers. Define a suitable class 'Complex' to represent the complex number. Develop a program to read N ( $N \geq 2$ ) complex numbers and to compute the addition of N complex numbers.
10. Develop a program that uses class Student which prompts the user to enter marks in three subjects and calculates total marks, percentage and displays the score card details. [Hint: Use list to store the marks in three subjects and total marks. Use \_\_init\_\_() method to initialize name, USN and the lists to store marks and total, Use getMarks() method to read marks into the list, and display() method to display the score card details.]

#### Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50). The minimum passing mark for the SEE is 35% of the maximum marks (18 marks out of 50). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination(SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

#### Continuous Internal Evaluation (CIE):

**The CIE marks for the theory component of the IC shall be 30 marks and for the laboratory component 20 Marks.**

#### CIE for the theory component of the IC

- Three Tests each of 20 Marks; after the completion of the syllabus of 35-40%, 65-70%, and 90-100% respectively.
- Two Assignments/two quizzes/ seminars/one field survey and report presentation/one-course project totaling 20 marks.

**Total Marks scored (test + assignments) out of 80 shall be scaled down to 30 marks**

#### CIE for the practical component of the IC

- On completion of every experiment/program in the laboratory, the students shall be

evaluated and marks shall be awarded on the same day. The **15 marks** are for conducting the experiment and preparation of the laboratory record, the other **05 marks shall be for the test** conducted at the end of the semester.

- The CIE marks awarded in the case of the Practical component shall be based on the continuous evaluation of the laboratory report. Each experiment report can be evaluated for 10 marks. Marks of all experiments' write-ups are added and scaled down to 15 marks.
- The laboratory test (**duration 03 hours**) at the end of the 15<sup>th</sup> week of the semester /after completion of all the experiments (whichever is early) shall be conducted for 50 marks and scaled down to **05 marks**.

Scaled-down marks of write-up evaluations and tests added will be CIE marks for the laboratory component of IC/IPCC for **20 marks**.

- The minimum marks to be secured in CIE to appear for SEE shall be 12 (40% of maximum marks) in the theory component and 08 (40% of maximum marks) in the practical component. The laboratory component of the IC/IPCC shall be for CIE only. However, in SEE, the questions from the laboratory component shall be included. The maximum of 05 questions is to be set from the practical component of IC/IPCC, the total marks of all questions should not be more than 25 marks.

The theory component of the IC shall be for both CIE and SEE.

### **Semester End Examination (SEE):**

#### **SEE for IC**

Theory SEE will be conducted by University as per the scheduled time table, with common question papers for the course (duration 03 hours)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.

**The theory portion of the Integrated Course shall be for both CIE and SEE, whereas the practical portion will have a CIE component only. Questions mentioned in the SEE paper shall include questions from the practical component).**

#### **Passing standard:**

- The minimum marks to be secured in CIE to appear for SEE shall be 12 (40% of maximum marks-30) in the theory component and 08 (40% of maximum marks -20) in the practical component. The laboratory component of the IPCC shall be for CIE only. However, in SEE, the questions from the laboratory component shall be included. The maximum of 04/05 questions to be set from the practical component of IPCC, the total marks of all questions should not be more than 30 marks.

- SEE will be conducted for 100 marks and students shall secure 35% of the maximum marks to qualify for the SEE. Marks secured will be scaled down to 50.

	<p><b>Teaching-Learning Process (General Instructions)</b></p> <p>These are sample strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promote critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps to improve the students' understanding.</li> <li>9. Use <a href="https://pythontutor.com/visualize.html#mode=edit">https://pythontutor.com/visualize.html#mode=edit</a> in order to visualize the operations of C Programs</li> </ol>	
	<b>Module-1 (6 Hours of Pedagogy)</b>	
	<p><b>Introduction to C:</b> Introduction to computers, input and output devices, designing efficient programs. Introduction to C, Structure of C program, Files used in a C program, Compilers, Compiling and executing C programs, variables, constants, Input/output statements in C,</p> <p><b>Textbook: Chapter 1.1-1.9, 2.1-2.2, 8.1 - 8.6 ,9.1-9.14</b></p>	
<b>Teaching-Learning Process</b>	Chalk and talk method/PowerPoint Presentation/ Web Content: <a href="https://tinyurl.com/4xmrexre">https://tinyurl.com/4xmrexre</a>	

	<b>Module-2 (6 Hours of Pedagogy)</b>	
	Operators in C, Type conversion and typecasting.  <b>Decision control and Looping statements:</b> Introduction to decision control, Conditional branching statements, iterative statements, nested loops, break and continue statements, goto statement.  <b>Textbook: Chapter 9.15-9.16, 10.1-10.6</b>	
<b>Teaching-LearningProcess</b>	Chalkandtalkmethod/PowerPointPresentation	
	<b>Module-3 (8 Hours of Pedagogy)</b>	
	Functions: Introduction using functions, Function definition, function declaration, function call, return statement, passing parameters to functions, scope of variables, storage classes, recursive functions. Arrays: Declaration of arrays, accessing the elements of an array, storing values in arrays, Operations on arrays, Passing arrays to functions, two dimensional arrays, operations on two-dimensional arrays, two-dimensional arrays to functions, multidimensional arrays, applications of arrays.  Textbook: Chapter 11.1-11.10, 12.1-12.10,12.12	
<b>Teaching-LearningProcess</b>	Chalkandtalkmethod/PowerPointPresentation	
	<b>Module-4 (6 Hours of Pedagogy)</b>	
	<b>Strings and Pointers:</b> Introduction, string taxonomy, operations on strings, Miscellaneous string and character functions, arrays of strings. <b>Pointers:</b> Introduction to pointers, declaring pointer variables, Types of pointers, Passing arguments to functions using pointers  <b>Textbook: Chapter 13.1-13.6, 14-14.7</b>	
<b>Teaching-LearningProcess</b>	Chalkandtalkmethod/PowerPointPresentation	
	<b>Module-5 (6 Hours of Pedagogy)</b>	
	<b>Structure, Union, and Enumerated Data Type:</b> Introduction, structures and functions, Unions, unions inside structures, Enumerated data type. <b>Files:</b> Introduction to files, using files in C, reading and writing data files. , Detecting end of file  <b>Textbook: Chapter 15.1 – 15.10, 16.1-16.5</b>	
<b>Teaching-LearningProcess</b>	Chalkandtalkmethod/PowerPointPresentation	
<b>CourseOutcomes(CourseSkillSet)</b>		
Attheendofthecoursethestudentwillbeableto:		
CO1. Elucidate the basic architecture and functionalities of a computer and also recognize the hardware parts.		
CO 2. Apply programming constructs of C language to solve the real world problem		
CO 3.Explore user-defined data structures like arrays in implementing solutions to problems like searching and sorting		
CO 4.Explore user-defined data structures like structures, unions and pointers in implementing solutions		

CO5.Design and Develop Solutions to problems using modular programming constructs using functions

### Programming Assignments

- 1 Simulation of a SimpleCalculator.
- 2 Compute the roots of a quadratic equation by accepting the coefficients. Print appropriate messages.
- 3 An electricity board charges the following rates for the use of electricity: for the first 200 units 80 paise per unit: for the next 100 units 90 paise per unit: beyond 300 units Rs 1 per unit. All users are charged a minimum of Rs. 100 as meter charge. If the total amount is more than Rs 400, then an additional surcharge of 15% of total amount is charged. Write a program to read the name of the user, number of units consumed and print out the charges.
4. Write a C Program to display the following by reading the number of rows as input,

```

          1
        1 2 1
      1 2 3 2 1
    1 2 3 4 3 2 1
    -----
    nth row

```

- 5 Implement Binary Search on Integers.
- 6 Implement Matrix multiplication and validate the rules of multiplication.
- 7 Compute  $\sin(x)/\cos(x)$  using Taylor series approximation. Compare your result with the built-in library function. Print both the results with appropriate inferences.
- 8 Sort the given set of N numbers using Bubble sort.
- 9 Write functions to implement string operations such as compare, concatenate, and find string length. Use the parameter passing techniques.
- 10 Implement structures to read, write and compute average- marks of the students, list the students scoring above and below the average marks for a class of N students.
- 11 Develop a program using pointers to compute the sum, mean and standard deviation of all elements stored in an array of N real numbers.
12. Write a C program to copy a text file to another, read both the input file name and target file name.

Note:

SEE marks for the practical course is 50 Marks.

SEE shall be conducted jointly by the two examiners of the same institute, examiners are appointed by the University

All laboratory experiments are to be included for practical examination.

(Rubrics) Breakup of marks and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners. OR based on the course requirement evaluation rubrics shall be decided jointly by examiners.

Students can pick one question (experiment) from the questions lot prepared by the internal /external examiners jointly.

Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners.

General rubrics suggested for SEE are mentioned here, writeup-20%, Conduction procedure and result in -60%, Viva-voce 20% of maximum marks. SEE for practical shall be evaluated for 100 marks and scored marks shall be scaled down to 50 marks (however, based on course type, rubrics shall be decided by the examiners)

Students can pick one experiment from the questions lot with equal choice to all the students in a batch. Student should develop an algorithm, program, execute and demonstrate the results with appropriate output for the given problem.

Change of experiment is allowed only once and 15% Marks allotted to the procedure part to be made zero.

**The duration of SEE is 02 hours**

#### **Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50). The minimum passing mark for the SEE is 35% of the maximum marks (18 marks out of 50). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination(SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

#### **Continuous Internal Evaluation(CIE):**

The CIE marks for the theory component of the IC shall be **30 marks** and for the laboratory component **20 Marks**.

#### **CIE for the theory component of the IC**

- Three Tests each of 20 Marks; after the completion of the syllabus of 35-40%, 65-70%, and 90-100% respectively.
- Two Assignments/two quizzes/ seminars/one field survey and report presentation/one-course project totaling 20 marks.

Total Marks scored (test + assignments) out of 80 shall be scaled down to **30 marks**

#### **CIE for the practical component of the IC**

- On completion of every experiment/program in the laboratory, the students shall be evaluated and marks shall be awarded on the same day. The **15 marks** are for conducting the experiment and preparation of the laboratory record, the other **05 marks shall be for the test** conducted at the end of the semester.
- The CIE marks awarded in the case of the Practical component shall be based on the

continuous evaluation of the laboratory report. Each experiment report can be evaluated for 10 marks. Marks of all experiments' write-ups are added and scaled down to 15 marks.

- The laboratory test (**duration 03 hours**) at the end of the 15<sup>th</sup> week of the semester /after completion of all the experiments (whichever is early) shall be conducted for 50 marks and scaled down to **05 marks**.

Scaled-down marks of write-up evaluations and tests added will be CIE marks for the laboratory component of IC/IPCC for **20 marks**.

- The minimum marks to be secured in CIE to appear for SEE shall be 12 (40% of maximum marks) in the theory component and 08 (40% of maximum marks) in the practical component. The laboratory component of the IC/IPCC shall be for CIE only. However, in SEE, the questions from the laboratory component shall be included. The maximum of 05 questions is to be set from the practical component of IC/IPCC, the total marks of all questions should not be more than 25 marks.

The theory component of the IC shall be for both CIE and SEE.

#### **Semester End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the subject (duration 03 hours)

1. The question paper will have ten questions. Each question is set for 20 marks. Marks scored shall be proportionally reduced to 50 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), should have a mix of topics under that module.
3. The students have to answer 5 full questions, selecting one full question from each module

<b>Mathematics for Computer Science</b>		Semester	3
Course Code	<b>BCS301</b>	CIE Marks	50
Teaching Hours/Week (L: T:P: S)	3:2:0:0	SEE Marks	50
Total Hours of Pedagogy	40 hours Theory + 20 Hours Tutorial	Total Marks	100
Credits	04	Exam Hours	3
Examination type (SEE)	<b>Theory</b>		
<p><b>Course objectives:</b> This course will enable the students to:</p> <ol style="list-style-type: none"> <li>1. To introduce the concept of random variables, probability distributions, specific discrete and continuous distributions with practical application in Computer Science Engineering and social life situations.</li> <li>2. To Provide the principles of statistical inferences and the basics of hypothesis testing with emphasis on some commonly encountered hypotheses.</li> <li>3. To Determine whether an input has a statistically significant effect on the system's response through ANOVA testing.</li> </ol>			
<p><b>Teaching-Learning Process</b>  <b>Pedagogy (General Instructions):</b>            Teachers can use the following strategies to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. In addition to the traditional lecture method, different types of innovative teaching methods may be adopted so that the delivered lessons shall develop students' theoretical and applied Mathematical skills.</li> <li>2. State the need for Mathematics with Engineering Studies and Provide real-life examples.</li> <li>3. Support and guide the students for self-study.</li> <li>4. You will assign homework, grading assignments and quizzes, and documenting students' progress.</li> <li>5. Encourage the students to group learning to improve their creative and analytical skills.</li> <li>6. Show short related video lectures in the following ways:               <ul style="list-style-type: none"> <li>• As an introduction to new topics (pre-lecture activity).</li> <li>• As a revision of topics (post-lecture activity).</li> <li>• As additional examples (post-lecture activity).</li> <li>• As an additional material of challenging topics (pre-and post-lecture activity).</li> <li>• As a model solution of some exercises (post-lecture activity).</li> </ul> </li> </ol>			
<b>Module-1: Probability Distributions</b>			
<p><b>Probability Distributions:</b> Review of basic probability theory. Random variables (discrete and continuous), probability mass and density functions. Mathematical expectation, mean and variance. Binomial, Poisson and normal distributions- problems (derivations for mean and standard deviation for Binomial and Poisson distributions only)-Illustrative examples. Exponential distribution. <b>(12 Hours)</b>  <b>(RBT Levels: L1, L2 and L3)</b></p>			
<b>Pedagogy</b>	Chalk and Board, Problem-based learning		
<b>Module-2: Joint probability distribution &amp; Markov Chain</b>			

	<p><b>Joint probability distribution:</b> Joint Probability distribution for two discrete random variables, expectation, covariance and correlation.</p> <p><b>Markov Chain:</b> Introduction to Stochastic Process, Probability Vectors, Stochastic matrices, Regular stochastic matrices, Markov chains, Higher transition probabilities, Stationary distribution of Regular Markov chains and absorbing states. <b>(12 Hours)</b> <b>(RBT Levels: L1, L2 and L3)</b></p>
<b>Pedagogy</b>	Chalk and Board, Problem-based learning
<b>Module-3: Statistical Inference 1</b>	
	<p>Introduction, sampling distribution, standard error, testing of hypothesis, levels of significance, test of significances, confidence limits, simple sampling of attributes, test of significance for large samples, comparison of large samples. <b>(12 Hours)</b> <b>(RBT Levels: L1, L2 and L3)</b></p>
<b>Pedagogy</b>	Chalk and Board, Problem-based learning
<b>Module-4: Statistical Inference 2</b>	
	<p>Sampling variables, central limit theorem and confidences limit for unknown mean. Test of Significance for means of two small samples, students 't' distribution, Chi-square distribution as a test of goodness of fit. F-Distribution. <b>(12 Hours)</b> <b>(RBT Levels: L1, L2 and L3)</b></p>
<b>Pedagogy</b>	Chalk and Board, Problem-based learning
<b>Module-5: Design of Experiments &amp; ANOVA</b>	
	<p>Principles of experimentation in design, Analysis of completely randomized design, randomized block design. The ANOVA Technique, Basic Principle of ANOVA, One-way ANOVA, Two-way ANOVA, Latin-square Design, and Analysis of Co-Variance. <b>(12 Hours)</b> <b>(RBT Levels: L1, L2 and L3)</b></p>
<b>Pedagogy</b>	Chalk and Board, Problem-based learning
<p><b>Course outcome (Course Skill Set)</b> At the end of the course, the student will be able to:</p> <ol style="list-style-type: none"> <li>1. Explain the basic concepts of probability, random variables, probability distribution</li> <li>2. Apply suitable probability distribution models for the given scenario.</li> <li>3. Apply the notion of a discrete-time Markov chain and n-step transition probabilities to solve the given problem</li> <li>4. Use statistical methodology and tools in the engineering problem-solving process.</li> <li>5. Compute the confidence intervals for the mean of the population.</li> <li>6. Apply the ANOVA test related to engineering problems.</li> </ol>	
<p><b>Assessment Details (both CIE and SEE)</b> The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.</p> <p><b>Continuous Internal Evaluation:</b></p> <ul style="list-style-type: none"> <li>● For the Assignment component of the CIE, there are 25 marks and for the Internal Assessment</li> </ul>	

Test component, there are 25 marks.

- The first test will be administered after 40-50% of the syllabus has been covered, and the second test will be administered after 85-90% of the syllabus has been covered
- Any two assignment methods mentioned in the 22OB2.4, if an assignment is project-based then only one assignment for the course shall be planned. The teacher should not conduct two assignments at the end of the semester if two assignments are planned.
- For the course, CIE marks will be based on a scaled-down sum of two tests and other methods of assessment.

**Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester-End Examination:**

Theory SEE will be conducted by the University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**).

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.

Marks scored shall be proportionally reduced to 50 marks

**Activity-Based Learning (Suggested Activities in Class)/Practical-Based Learning**

- Programming Assignment
- Seminars

<b>Digital Design and Computer Organization</b>		Semester	3
Course Code	BCS302	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:2:0	SEE Marks	50
Total Hours of Pedagogy	40 hours Theory + 20 Hours of Practicals	Total Marks	100
Credits	04	Exam Hours	3
Examination nature (SEE)	Theory		
<p><b>Course objectives:</b></p> <ul style="list-style-type: none"> <li>● To demonstrate the functionalities of binary logic system</li> <li>● To explain the working of combinational and sequential logic system</li> <li>● To realize the basic structure of computer system</li> <li>● To illustrate the working of I/O operations and processing unit</li> </ul>			
<p><b>Teaching-Learning Process (General Instructions)</b>            These are sample Strategies; that teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Chalk and Talk</li> <li>2. Live Demo with experiments</li> <li>3. Power point presentation</li> </ol>			
<b>MODULE-1</b>		<b>8 Hr</b>	
<p><b>Introduction to Digital Design:</b> Binary Logic, Basic Theorems And Properties Of Boolean Algebra, Boolean Functions, Digital Logic Gates, Introduction, The Map Method, Four-Variable Map, Don't-Care Conditions, NAND and NOR Implementation, Other Hardware Description Language – Verilog Model of a simple circuit.</p> <p><b>Text book 1: 1.9, 2.4, 2.5, 2.8, 3.1, 3.2, 3.3, 3.5, 3.6, 3.9</b></p>			
<b>MODULE-2</b>		<b>8 Hr</b>	
<p><b>Combinational Logic:</b> Introduction, Combinational Circuits, Design Procedure, Binary Adder- Subtractor, Decoders, Encoders, Multiplexers. HDL Models of Combinational Circuits – Adder, Multiplexer, Encoder.</p> <p><b>Sequential Logic:</b> Introduction, Sequential Circuits, Storage Elements: Latches, Flip-Flops.</p> <p><b>Text book 1: 4.1, 4.2, 4.4, 4.5, 4.9, 4.10, 4.11, 4.12, 5.1, 5.2, 5.3, 5.4.</b></p>			
<b>MODULE-3</b>		<b>8 Hr</b>	
<p><b>Basic Structure of Computers:</b> Functional Units, Basic Operational Concepts, Bus structure, Performance – Processor Clock, Basic Performance Equation, Clock Rate, Performance Measurement. <b>Machine Instructions and Programs:</b> Memory Location and Addresses, Memory Operations, Instruction and Instruction sequencing, Addressing Modes.</p> <p><b>Text book 2: 1.2, 1.3, 1.4, 1.6, 2.2, 2.3, 2.4, 2.5</b></p>			
<b>MODULE-4</b>		<b>8 Hr</b>	
<p><b>Input/output Organization:</b> Accessing I/O Devices, Interrupts – Interrupt Hardware, Enabling and Disabling Interrupts, Handling Multiple Devices, Direct Memory Access: Bus Arbitration, Speed, size and Cost of memory systems. Cache Memories – Mapping Functions.</p> <p><b>Text book 2: 4.1, 4.2.1, 4.2.2, 4.2.3, 4.4, 5.4, 5.5.1</b></p>			
<b>MODULE-5</b>		<b>8 Hr</b>	

**Basic Processing Unit:** Some Fundamental Concepts: Register Transfers, Performing ALU operations, fetching a word from Memory, Storing a word in memory. Execution of a Complete Instruction. **Pipelining:** Basic concepts, Role of Cache memory, Pipeline Performance.

**Text book 2: 7.1, 7.2, 8.1**

### PRACTICAL COMPONENT OF IPCC

Sl.N O	Experiments Simulation packages preferred: Multisim, Modelsim, PSpice or any other relevant
1	Given a 4-variable logic expression, simplify it using appropriate technique and simulate the same using basic gates.
2	Design a 4 bit full adder and subtractor and simulate the same using basic gates.
3	Design Verilog HDL to implement simple circuits using structural, Data flow and Behavioural model.
4	Design Verilog HDL to implement Binary Adder-Subtractor – Half and Full Adder, Half and Full Subtractor.
5	Design Verilog HDL to implement Decimal adder.
6	Design Verilog program to implement Different types of multiplexer like 2:1, 4:1 and 8:1.
7	Design Verilog program to implement types of De-Multiplexer.
8	Design Verilog program for implementing various types of Flip-Flops such as SR, JK and D.

#### Course outcomes (Course Skill Set):

At the end of the course, the student will be able to:

CO1: Apply the K-Map techniques to simplify various Boolean expressions.

CO2: Design different types of combinational and sequential circuits along with Verilog programs.

CO3: Describe the fundamentals of machine instructions, addressing modes and Processor performance.

CO4: Explain the approaches involved in achieving communication between processor and I/O devices.

CO5: Analyze internal Organization of Memory and Impact of cache/Pipelining on Processor Performance.

#### Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

#### CIE for the theory component of the IPCC (maximum marks 50)

- IPCC means practical portion integrated with the theory of the course.
- CIE marks for the theory component are **25 marks** and that for the practical component is **25 marks**.
- 25 marks for the theory component are split into **15 marks** for two Internal Assessment Tests (Two Tests, each of 15 Marks with 01-hour duration, are to be conducted) and **10 marks** for other

assessment methods mentioned in 22OB4.2. The first test at the end of 40-50% coverage of the syllabus and the second test after covering 85-90% of the syllabus.

- Scaled-down marks of the sum of two tests and other assessment methods will be CIE marks for the theory component of IPCC (that is for **25 marks**).
- The student has to secure 40% of 25 marks to qualify in the CIE of the theory component of IPCC.

#### **CIE for the practical component of the IPCC**

- **15 marks** for the conduction of the experiment and preparation of laboratory record, and **10 marks** for the test to be conducted after the completion of all the laboratory sessions.
- On completion of every experiment/program in the laboratory, the students shall be evaluated including viva-voce and marks shall be awarded on the same day.
- The CIE marks awarded in the case of the Practical component shall be based on the continuous evaluation of the laboratory report. Each experiment report can be evaluated for 10 marks. Marks of all experiments' write-ups are added and scaled down to **15 marks**.
- The laboratory test (**duration 02/03 hours**) after completion of all the experiments shall be conducted for 50 marks and scaled down to **10 marks**.
- Scaled-down marks of write-up evaluations and tests added will be CIE marks for the laboratory component of IPCC for **25 marks**.
- The student has to secure 40% of 25 marks to qualify in the CIE of the practical component of the IPCC.

#### **SEE for IPCC**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored by the student shall be proportionally scaled down to 50 Marks

**The theory portion of the IPCC shall be for both CIE and SEE, whereas the practical portion will have a CIE component only. Questions mentioned in the SEE paper may include questions from the practical component.**

#### **Suggested Learning Resources:**

##### **Books**

1. M. Morris Mano & Michael D. Ciletti, Digital Design With an Introduction to Verilog Design, 5e, Pearson Education.
2. Carl Hamacher, Zvonko Vranesic, Safwat Zaky, Computer Organization, 5<sup>th</sup> Edition, Tata McGraw Hill.

#### **Web links and Video Lectures (e-Resources):**

<https://cse11-iiith.vlabs.ac.in/>

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

Assign the group task to Design the various types of counters and display the output accordingly

**Assessment Methods**

- Lab Assessment (25 Marks)
- GATE Based Aptitude Test

<b>OPERATING SYSTEMS</b>		Semester	3
Course Code	BCS303	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:2:0	SEE Marks	50
Total Hours of Pedagogy	40 hours Theory + 20 hours practicals	Total Marks	100
Credits	04	Exam Hours	3
Examination nature (SEE)	<b>Theory</b>		
<p><b>Course objectives:</b></p> <ul style="list-style-type: none"> <li>● To Demonstrate the need for OS and different types of OS</li> <li>● To discuss suitable techniques for management of different resources</li> <li>● To demonstrate different APIs/Commands related to processor, memory, storage and file system management.</li> </ul>			
<p><b>Teaching-Learning Process (General Instructions)</b>            Teachers can use the following strategies to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer methods (L) need not to be only traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>5. Role play for process scheduling.</li> <li>6. Demonstrate the installation of any one Linux OS on VMware/Virtual Box</li> </ol>			
<b>MODULE-1</b>		<b>8 Hours</b>	
<p><b>Introduction to operating systems, System structures:</b> What operating systems do; Computer System organization; Computer System architecture; Operating System structure; Operating System operations; Process management; Memory management; Storage management; Protection and Security; Distributed system; Special-purpose systems; Computing environments.</p> <p><b>Operating System Services:</b> User - Operating System interface; System calls; Types of system calls; System programs; Operating system design and implementation; Operating System structure; Virtual machines; Operating System debugging, Operating System generation; System boot.</p> <p><b>Textbook 1: Chapter – 1 (1.1-1.12), 2 (2.2-2.11)</b></p>			
<b>MODULE-2</b>		<b>8 Hours</b>	
<p><b>Process Management:</b> Process concept; Process scheduling; Operations on processes; Inter process communication</p> <p><b>Multi-threaded Programming:</b> Overview; Multithreading models; Thread Libraries; Threading issues.</p> <p><b>Process Scheduling:</b> Basic concepts; Scheduling Criteria; Scheduling Algorithms; Thread scheduling; Multiple-processor scheduling,</p> <p><b>Textbook 1: Chapter – 3 (3.1-3.4), 4 (4.1-4.4), 5 (5.1 -5.5)</b></p>			
<b>MODULE-3</b>		<b>8 Hours</b>	

<p><b>Process Synchronization:</b> Synchronization: The critical section problem; Peterson's solution; Synchronization hardware; Semaphores; Classical problems of synchronization;</p> <p><b>Deadlocks:</b> System model; Deadlock characterization; Methods for handling deadlocks; Deadlock prevention; Deadlock avoidance; Deadlock detection and recovery from deadlock.</p> <p><b>Textbook 1: Chapter – 6 (6.1-6.6), 7 (7.1 -7.7)</b></p>	
<b>MODULE-4</b>	<b>8 Hours</b>
<p><b>Memory Management:</b> Memory management strategies: Background; Swapping; Contiguous memory allocation; Paging; Structure of page table; Segmentation.</p> <p><b>Virtual Memory Management:</b> Background; Demand paging; Copy-on-write; Page replacement; Allocation of frames; Thrashing.</p> <p><b>Textbook 1: Chapter -8 (8.1-8.6), 9 (9.1-9.6)</b></p>	
<b>MODULE-5</b>	<b>8 Hours</b>
<p><b>File System, Implementation of File System:</b> File system: File concept; Access methods; Directory and Disk structure; File system mounting; File sharing; <b>Implementing File system:</b> File system structure; File system implementation; Directory implementation; Allocation methods; Free space management.</p> <p><b>Secondary Storage Structure, Protection:</b> Mass storage structures; Disk structure; Disk attachment; Disk scheduling; Disk management; <b>Protection:</b> Goals of protection, Principles of protection, Domain of protection, Access matrix.</p> <p><b>Textbook 1: Chapter – 10 (10.1-10.5) ,11 (11.1-11.5),12 (12.1-12.5), 14 (14.1-14.4)</b></p>	

**PRACTICAL COMPONENT OF IPCC** *(May cover all / major modules)*

SL.N O	Experiments
1	Develop a c program to implement the Process system calls (fork (), exec(), wait(), create process, terminate process)
2	Simulate the following CPU scheduling algorithms to find turnaround time and waiting time a) FCFS b) SJF c) Round Robin d) Priority.
3	Develop a C program to simulate producer-consumer problem using semaphores.
4	Develop a C program which demonstrates interprocess communication between a reader process and a writer process. Use mkfifo, open, read, write and close APIs in your program.
5	Develop a C program to simulate Bankers Algorithm for DeadLock Avoidance.
6	Develop a C program to simulate the following contiguous memory allocation Techniques: a) Worst fit b) Best fit c) First fit.
7	Develop a C program to simulate page replacement algorithms: a) FIFO b) LRU
8	Simulate following File Organization Techniques a) Single level directory b) Two level directory
9	Develop a C program to simulate the Linked file allocation strategies.
10	Develop a C program to simulate SCAN disk scheduling algorithm.

**Course outcomes (Course Skill Set):**

At the end of the course, the student will be able to:

CO 1. Explain the structure and functionality of operating system

CO 2. Apply appropriate CPU scheduling algorithms for the given problem.

CO 3. Analyse the various techniques for process synchronization and deadlock handling.

CO 4. Apply the various techniques for memory management

CO 5. Explain file and secondary storage management strategies.

CO 6. Describe the need for information protection mechanisms

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

**CIE for the theory component of the IPCC (maximum marks 50)**

- IPCC means practical portion integrated with the theory of the course.
- CIE marks for the theory component are **25 marks** and that for the practical component is **25 marks**.
- 25 marks for the theory component are split into **15 marks** for two Internal Assessment Tests (Two Tests, each of 15 Marks with 01-hour duration, are to be conducted) and **10 marks** for other assessment methods

mentioned in 22OB4.2. The first test at the end of 40-50% coverage of the syllabus and the second test after covering 85-90% of the syllabus.

- Scaled-down marks of the sum of two tests and other assessment methods will be CIE marks for the theory component of IPCC (that is for **25 marks**).
- The student has to secure 40% of 25 marks to qualify in the CIE of the theory component of IPCC.

#### **CIE for the practical component of the IPCC**

- **15 marks** for the conduction of the experiment and preparation of laboratory record, and **10 marks** for the test to be conducted after the completion of all the laboratory sessions.
- On completion of every experiment/program in the laboratory, the students shall be evaluated including viva-voce and marks shall be awarded on the same day.
- The CIE marks awarded in the case of the Practical component shall be based on the continuous evaluation of the laboratory report. Each experiment report can be evaluated for 10 marks. Marks of all experiments' write-ups are added and scaled down to **15 marks**.
- The laboratory test (**duration 02/03 hours**) after completion of all the experiments shall be conducted for 50 marks and scaled down to **10 marks**.
- Scaled-down marks of write-up evaluations and tests added will be CIE marks for the laboratory component of IPCC for **25 marks**.
- The student has to secure 40% of 25 marks to qualify in the CIE of the practical component of the IPCC.

#### **SEE for IPCC**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored by the student shall be proportionally scaled down to 50 Marks

**The theory portion of the IPCC shall be for both CIE and SEE, whereas the practical portion will have a CIE component only. Questions mentioned in the SEE paper may include questions from the practical component.**

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

- Assessment Methods
  - Case Study on Unix Based Systems (10 Marks)
  - Lab Assessment (25 Marks)

<b>DATA STRUCTURES AND APPLICATIONS</b>		Semester	3
Course Code	BCS304	CIE Marks	50
Teaching Hours/Week (L: T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	3
Examination type (SEE)	<b>Theory</b>		
<p><b>Course objectives:</b>  CLO 1. To explain fundamentals of data structures and their applications.  CLO 2. To illustrate representation of Different data structures such as Stack, Queues, Linked Lists, Trees and Graphs.  CLO 3. To Design and Develop Solutions to problems using Linear Data Structures  CLO 4. To discuss applications of Nonlinear Data Structures in problem solving.  CLO 5. To introduce advanced Data structure concepts such as Hashing and Optimal Binary Search Trees</p>			
<p><b>Teaching-Learning Process (General Instructions)</b>  Teachers can use following strategies to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Chalk and Talk with Black Board</li> <li>2. ICT based Teaching</li> <li>3. Demonstration based Teaching</li> </ol>			
<b>Module-1</b>		<b>8Hours</b>	
<p><b>INTRODUCTION TO DATA STRUCTURES:</b> Data Structures, Classifications (Primitive &amp; Non-Primitive), Data structure Operations  <b>Review of</b> pointers and dynamic Memory Allocation,  <b>ARRAYS and STRUCTURES:</b> Arrays, Dynamic Allocated Arrays, Structures and Unions, Polynomials, Sparse Matrices, representation of Multidimensional Arrays, Strings  <b>STACKS:</b> Stacks, Stacks Using Dynamic Arrays, Evaluation and conversion of Expressions  Text Book: Chapter-1:1.2 Chapter-2: 2.1 to 2.7 Chapter-3: 3.1,3.2,3.6  Reference Book 1: 1.1 to 1.4</p>			
<b>Module-2</b>		<b>8Hours</b>	
<p><b>QUEUES:</b> Queues, Circular Queues, Using Dynamic Arrays, Multiple Stacks and queues.  <b>LINKED LISTS :</b> Singly Linked, Lists and Chains, Representing Chains in C, Linked Stacks and Queues, Polynomials  Text Book: Chapter-3: 3.3, 3.4, 3.7 Chapter-4: 4.1 to 4.4</p>			
<b>Module-3</b>		<b>8Hours</b>	
<p><b>LINKED LISTS :</b> Additional List Operations, Sparse Matrices, Doubly Linked List.  <b>TREES:</b> Introduction, Binary Trees, Binary Tree Traversals, Threaded Binary Trees.  Text Book: Chapter-4: 4.5,4.7,4.8 Chapter-5: 5.1 to 5.3, 5.5</p>			
<b>Module-4</b>		<b>8Hours</b>	
<p><b>TREES(Cont.):</b> Binary Search trees, Selection Trees, Forests, Representation of Disjoint sets, Counting Binary Trees,  <b>GRAPHS:</b> The Graph Abstract Data Types, Elementary Graph Operations  Text Book: Chapter-5: 5.7 to 5.11 Chapter-6: 6.1, 6.2</p>			
<b>Module-5</b>		<b>8Hours</b>	

<p><b>HASHING:</b> Introduction, Static Hashing, Dynamic Hashing  <b>PRIORITY QUEUES:</b> Single and double ended Priority Queues, Leftist Trees  <b>INTRODUCTION TO EFFICIENT BINARY SEARCH TREES:</b> Optimal Binary Search Trees  Text Book: Chapter 8: 8.1 to 8.3 Chapter 9: 9.1, 9.2 Chapter 10: 10.1</p>
<p><b>Course outcome (Course Skill Set)</b>  At the end of the course the student will be able to:  CO 1. Explain different data structures and their applications.  CO 2. Apply Arrays, Stacks and Queue data structures to solve the given problems.  CO 3. Use the concept of linked list in problem solving.  CO 4. Develop solutions using trees and graphs to model the real-world problem.  CO 5. Explain the advanced Data Structures concepts such as Hashing Techniques and Optimal Binary Search Trees.</p>
<p><b>Assessment Details (both CIE and SEE)</b>  The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. <b>Course Code</b>	<b>BCSL305</b>	<b>CIE Marks</b>	50
<b>Number of Contact Hours/Week</b>	0:0:2	<b>SEE Marks</b>	50
<b>Total Number of Lab Contact Hours</b>	28	<b>Exam Hours</b>	03
<b>Credits – 1</b>			
<b>Course Learning Objectives:</b>			
<p>This laboratory course enables students to get practical experience in design, develop, implement, analyze and evaluation/testing of</p> <ul style="list-style-type: none"> <li>● Dynamic memory management</li> <li>● Linear data structures and their applications such as stacks, queues and lists</li> <li>● Non-Linear data structures and their applications such as trees and graphs</li> </ul>			
<b>Descriptions (if any):</b>			
<ul style="list-style-type: none"> <li>● Implement all the programs in “C” Programming Language and Linux OS.</li> </ul>			
<b>Programs List:</b>			
1.	<p>Develop a Program in C for the following:</p> <ol style="list-style-type: none"> <li>a) Declare a calendar as an array of 7 elements (A dynamically Created array) to represent 7 days of a week. Each Element of the array is a structure having three fields. The first field is the name of the Day (A dynamically allocated String), The second field is the date of the Day (A integer), the third field is the description of the activity for a particular day (A dynamically allocated String).</li> <li>b) Write functions create(), read() and display(); to create the calendar, to read the data from the keyboard and to print weeks activity details report on screen.</li> </ol>		
2.	<p>Develop a Program in C for the following operations on Strings.</p> <ol style="list-style-type: none"> <li>a. Read a main String (STR), a Pattern String (PAT) and a Replace String (REP)</li> <li>b. Perform Pattern Matching Operation: Find and Replace all occurrences of PAT in STR with REP if PAT exists in STR. Report suitable messages in case PAT does not exist in STR</li> </ol> <p>Support the program with functions for each of the above operations. Don't use Built-in functions.</p>		
3.	<p>Develop a menu driven Program in C for the following operations on STACK of Integers (Array Implementation of Stack with maximum size MAX)</p> <ol style="list-style-type: none"> <li>a. Push an Element on to Stack</li> <li>b. Pop an Element from Stack</li> <li>c. Demonstrate how Stack can be used to check Palindrome</li> <li>d. Demonstrate Overflow and Underflow situations on Stack</li> <li>e. Display the status of Stack</li> <li>f. Exit</li> </ol> <p>Support the program with appropriate functions for each of the above operations</p>		

4.	Develop a Program in C for converting an Infix Expression to Postfix Expression. Program should support for both parenthesized and free parenthesized expressions with the operators: +, -, *, /, % (Remainder), ^ (Power) and alphanumeric operands.
5.	Develop a Program in C for the following Stack Applications <ol style="list-style-type: none"> <li>Evaluation of Suffix expression with single digit operands and operators: +, -, *, /, %, ^</li> <li>Solving Tower of Hanoi problem with n disks</li> </ol>
6.	Develop a menu driven Program in C for the following operations on Circular QUEUE of Characters (Array Implementation of Queue with maximum size MAX) <ol style="list-style-type: none"> <li>Insert an Element on to Circular QUEUE</li> <li>Delete an Element from Circular QUEUE</li> <li>Demonstrate Overflow and Underflow situations on Circular QUEUE</li> <li>Display the status of Circular QUEUE</li> <li>Exit</li> </ol> Support the program with appropriate functions for each of the above operations
7.	Develop a menu driven Program in C for the following operations on Singly Linked List (SLL) of Student Data with the fields: <i>USN, Name, Programme, Sem, PhNo</i> <ol style="list-style-type: none"> <li>Create a SLL of N Students Data by using <i>front insertion</i>.</li> <li>Display the status of SLL and count the number of nodes in it</li> <li>Perform Insertion / Deletion at End of SLL</li> <li>Perform Insertion / Deletion at Front of SLL(Demonstration of stack)</li> <li>Exit</li> </ol>
8.	Develop a menu driven Program in C for the following operations on Doubly Linked List (DLL) of Employee Data with the fields: <i>SSN, Name, Dept, Designation, Sal, PhNo</i> <ol style="list-style-type: none"> <li>Create a DLL of N Employees Data by using <i>end insertion</i>.</li> <li>Display the status of DLL and count the number of nodes in it</li> <li>Perform Insertion and Deletion at End of DLL</li> <li>Perform Insertion and Deletion at Front of DLL</li> <li>Demonstrate how this DLL can be used as Double Ended Queue.</li> <li>Exit</li> </ol>
9.	Develop a Program in C for the following operations on Singly Circular Linked List (SCLL) with header nodes <ol style="list-style-type: none"> <li>Represent and Evaluate a Polynomial <math>P(x,y,z) = 6x^2y^2z - 4yz^5 + 3x^3yz + 2xy^5z - 2xyz^3</math></li> <li>Find the sum of two polynomials <math>POLY1(x,y,z)</math> and <math>POLY2(x,y,z)</math> and store the result in <math>POLYSUM(x,y,z)</math></li> </ol> Support the program with appropriate functions for each of the above operations
10.	Develop a menu driven Program in C for the following operations on Binary Search Tree (BST) of Integers . <ol style="list-style-type: none"> <li>Create a BST of N Integers: 6, 9, 5, 2, 8, 15, 24, 14, 7, 8, 5, 2</li> <li>Traverse the BST in Inorder, Preorder and Post Order</li> <li>Search the BST for a given element (KEY) and report the appropriate message</li> <li>Exit</li> </ol>
11.	Develop a Program in C for the following operations on Graph(G) of Cities <ol style="list-style-type: none"> <li>Create a Graph of N cities using Adjacency Matrix.</li> <li>Print all the nodes reachable from a given starting node in a digraph using DFS/BFS method</li> </ol>

12.	<p>Given a File of N employee records with a set K of Keys (4-digit) which uniquely determine the records in file F. Assume that file F is maintained in memory by a Hash Table (HT) of m memory locations with L as the set of memory addresses (2-digit) of locations in HT. Let the keys in K and addresses in L are Integers. Develop a Program in C that uses Hash function <math>H: K \rightarrow L</math> as <math>H(K)=K \bmod m</math> (remainder method), and implement hashing technique to map a given key K to the address space L. Resolve the collision (if any) using linear probing.</p>
<p><b>Laboratory Outcomes:</b> The student should be able to:</p>	

- Analyze various linear and non-linear data structures
- Demonstrate the working nature of different types of data structures and their applications
- Use appropriate searching and sorting algorithms for the give scenario.
- Apply the appropriate data structure for solving real world problems

**Conduct of Practical Examination:**

- Experiment distribution
  - For laboratories having only one part: Students are allowed to pick one experiment from the lot with equal opportunity.
  - For laboratories having PART A and PART B: Students are allowed to pick one experiment from PART A and one experiment from PART B, with equal opportunity.
- Change of experiment is allowed only once and marks allotted for procedure to be made zero of the changed part only.
- Marks Distribution (*Need to change in accordance with university regulations*)
  - c) For laboratories having only one part – Procedure + Execution + Viva-Voce: 15+70+15 = 100 Marks
  - d) For laboratories having PART A and PART B
    - i. Part A – Procedure + Execution + Viva = 6 + 28 + 6 = 40 Marks
    - ii. Part B – Procedure + Execution + Viva = 9 + 42 + 9 = 60 Marks

<b>Object Oriented Programming with JAVA</b>		Semester	3
Course Code	BCS306A	CIE Marks	50
Teaching Hours/Week (L: T:P: S)	2:0:2	SEE Marks	50
Total Hours of Pedagogy	28 Hours of Theory + 20 Hours of Practical	Total Marks	100
Credits	03	Exam Hours	03
Examination type (SEE)	Theory		
<b>Note - Students who have undergone “ Basics of Java Programming-BPLCK105C/205C” in first year are not eligible to opt this course</b>			
<b>Course objectives:</b>			
<ul style="list-style-type: none"> <li>● To learn primitive constructs JAVA programming language.</li> <li>● To understand Object Oriented Programming Features of JAVA.</li> <li>● To gain knowledge on: packages, multithreaded programing and exceptions.</li> </ul>			
<b>Teaching-Learning Process (General Instructions)</b>			
These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes and make Teaching –Learning more effective			
<ol style="list-style-type: none"> <li>1. Use Online Java Compiler IDE: <a href="https://www.jdoodle.com/online-java-compiler/">https://www.jdoodle.com/online-java-compiler/</a> or any other.</li> <li>2. Demonstration of programing examples.</li> <li>3. Chalk and board, power point presentations</li> <li>4. Online material (Tutorials) and video lectures.</li> </ol>			
<b>Module-1</b>			
<b>An Overview of Java:</b> Object-Oriented Programming (Two Paradigms, Abstraction, The Three OOP Principles), Using Blocks of Code, Lexical Issues (Whitespace, Identifiers, Literals, Comments, Separators, The Java Keywords).			
<b>Data Types, Variables, and Arrays:</b> The Primitive Types (Integers, Floating-Point Types, Characters, Booleans), Variables, Type Conversion and Casting, Automatic Type Promotion in Expressions, Arrays, Introducing Type Inference with Local Variables.			
<b>Operators:</b> Arithmetic Operators, Relational Operators, Boolean Logical Operators, The Assignment Operator, The ? Operator, Operator Precedence, Using Parentheses.			
<b>Control Statements:</b> Java’s Selection Statements (if, The Traditional switch), Iteration Statements (while, do-while, for, The For-Each Version of the for Loop, Local Variable Type Inference in a for Loop, Nested Loops), Jump Statements (Using break, Using continue, return).			
<b>Chapter 2, 3, 4, 5</b>			
<b>Module-2</b>			
<b>Introducing Classes:</b> Class Fundamentals, Declaring Objects, Assigning Object Reference Variables, Introducing Methods, Constructors, The this Keyword, Garbage Collection.			
<b>Methods and Classes:</b> Overloading Methods, Objects as Parameters, Argument Passing, Returning Objects, Recursion, Access Control, Understanding static, Introducing final, Introducing Nested and Inner Classes.			
<b>Chapter 6, 7</b>			
<b>Module-3</b>			
<b>Inheritance:</b> Inheritance Basics, Using super, Creating a Multilevel Hierarchy, When Constructors Are Executed, Method Overriding, Dynamic Method Dispatch, Using Abstract Classes, Using final with Inheritance, Local Variable Type Inference and Inheritance, The Object Class.			
<b>Interfaces:</b> Interfaces, Default Interface Methods, Use static Methods in an Interface, Private Interface Methods.			
<b>Chapter 8, 9</b>			

<b>Module-4</b>
<p><b>Packages:</b> Packages, Packages and Member Access, Importing Packages.</p> <p><b>Exceptions:</b> Exception-Handling Fundamentals, Exception Types, Uncaught Exceptions, Using try and catch, Multiple catch Clauses, Nested try Statements, throw, throws, finally, Java's Built-in Exceptions, Creating Your Own Exception Subclasses, Chained Exceptions.</p> <p><b>Chapter 9, 10</b></p>
<b>Module-5</b>
<p><b>Multithreaded Programming:</b> The Java Thread Model, The Main Thread, Creating a Thread, Creating Multiple Threads, Using <code>isAlive()</code> and <code>join()</code>, Thread Priorities, Synchronization, Interthread Communication, Suspending, Resuming, and Stopping Threads, Obtaining a Thread's State.</p> <p><b>Enumerations, Type Wrappers and Autoboxing:</b> Enumerations (Enumeration Fundamentals, The <code>values()</code> and <code>valueOf()</code> Methods), Type Wrappers (Character, Boolean, The Numeric Type Wrappers), Autoboxing (Autoboxing and Methods, Autoboxing/Unboxing Occurs in Expressions, Autoboxing/Unboxing Boolean and Character Values).</p> <p><b>Chapter 11, 12</b></p>
<p><b>Course outcome (Course Skill Set)</b></p> <p>At the end of the course, the student will be able to:</p> <ol style="list-style-type: none"> <li>1. Demonstrate proficiency in writing simple programs involving branching and looping structures.</li> <li>2. Design a class involving data members and methods for the given scenario.</li> <li>3. Apply the concepts of inheritance and interfaces in solving real world problems.</li> <li>4. Use the concept of packages and exception handling in solving complex problem</li> <li>5. Apply concepts of multithreading, autoboxing and enumerations in program development</li> </ol>
<p><b>Programming Experiments (Suggested and are not limited to)</b></p> <ol style="list-style-type: none"> <li>1. Develop a JAVA program to add TWO matrices of suitable order N (The value of N should be read from command line arguments).</li> <li>2. Develop a stack class to hold a maximum of 10 integers with suitable methods. Develop a JAVA main method to illustrate Stack operations.</li> <li>3. A class called Employee, which models an employee with an ID, name and salary, is designed as shown in the following class diagram. The method <code>raiseSalary</code> (percent) increases the salary by the given percentage. Develop the Employee class and suitable main method for demonstration.</li> <li>4. A class called MyPoint, which models a 2D point with x and y coordinates, is designed as follows: <ul style="list-style-type: none"> <li>• Two instance variables x (int) and y (int).</li> <li>• A default (or "no-arg") constructor that construct a point at the default location of (0, 0).</li> <li>• A overloaded constructor that constructs a point with the given x and y coordinates.</li> <li>• A method <code>setXY()</code> to set both x and y.</li> <li>• A method <code>getXY()</code> which returns the x and y in a 2-element int array.</li> <li>• A <code>toString()</code> method that returns a string description of the instance in the format "(x, y)".</li> <li>• A method called <code>distance(int x, int y)</code> that returns the distance from this point to another point at the given (x, y) coordinates</li> <li>• An overloaded <code>distance(MyPoint another)</code> that returns the distance from this point to the given MyPoint instance (called another)</li> <li>• Another overloaded <code>distance()</code> method that returns the distance from this point to the origin (0,0)</li> </ul>           Develop the code for the class MyPoint. Also develop a JAVA program (called TestMyPoint) to test all the methods defined in the class. </li> <li>5. Develop a JAVA program to create a class named shape. Create three sub classes namely: circle, triangle and square, each class has two member functions named <code>draw ()</code> and <code>erase ()</code>. Demonstrate</li> </ol>

polymorphism concepts by developing suitable methods, defining member data and main program.

6. Develop a JAVA program to create an abstract class Shape with abstract methods calculateArea() and calculatePerimeter(). Create subclasses Circle and Triangle that extend the Shape class and implement the respective methods to calculate the area and perimeter of each shape.
7. Develop a JAVA program to create an interface Resizable with methods resizeWidth(int width) and resizeHeight(int height) that allow an object to be resized. Create a class Rectangle that implements the Resizable interface and implements the resize methods
8. Develop a JAVA program to create an outer class with a function display. Create another class inside the outer class named inner with a function called display and call the two functions in the main class.
9. Develop a JAVA program to raise a custom exception (user defined exception) for DivisionByZero using try, catch, throw and finally.
10. Develop a JAVA program to create a package named mypack and import & implement it in a suitable class.
11. Write a program to illustrate creation of threads using runnable class. (start method start each of the newly created thread. Inside the run method there is sleep() for suspend the thread for 500 milliseconds).
12. Develop a program to create a class MyThread in this class a constructor, call the base class constructor, using super and start the thread. The run method of the class starts after this. It can be observed that both main thread and created child thread are executed concurrently.

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

**CIE for the theory component of the IPCC (maximum marks 50)**

- IPCC means practical portion integrated with the theory of the course.
- CIE marks for the theory component are **25 marks** and that for the practical component is **25 marks**.
- 25 marks for the theory component are split into **15 marks** for two Internal Assessment Tests (Two Tests, each of 15 Marks with 01-hour duration, are to be conducted) and **10 marks** for other assessment methods mentioned in 22OB4.2. The first test at the end of 40-50% coverage of the syllabus and the second test after covering 85-90% of the syllabus.
- Scaled-down marks of the sum of two tests and other assessment methods will be CIE marks for the theory component of IPCC (that is for **25 marks**).
- The student has to secure 40% of 25 marks to qualify in the CIE of the theory component of IPCC.

**CIE for the practical component of the IPCC**

- **15 marks** for the conduction of the experiment and preparation of laboratory record, and **10 marks** for the test to be conducted after the completion of all the laboratory sessions.
- On completion of every experiment/program in the laboratory, the students shall be evaluated including viva-voce and marks shall be awarded on the same day.
- The CIE marks awarded in the case of the Practical component shall be based on the continuous evaluation of the laboratory report. Each experiment report can be evaluated for 10 marks. Marks of all experiments' write-ups are added and scaled down to **15 marks**.
- The laboratory test (**duration 02/03 hours**) after completion of all the experiments shall be conducted for 50 marks and scaled down to **10 marks**.
- Scaled-down marks of write-up evaluations and tests added will be CIE marks for the laboratory component of IPCC for **25 marks**.
- The student has to secure 40% of 25 marks to qualify in the CIE of the practical component of the IPCC.

**SEE for IPCC**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored by the student shall be proportionally scaled down to 50 Marks

**The theory portion of the IPCC shall be for both CIE and SEE, whereas the practical portion will have a CIE component only. Questions mentioned in the SEE paper may include questions from the practical component.**

**Suggested Learning Resources:**

**Textbook**

1. Java: The Complete Reference, Twelfth Edition, by Herbert Schildt, November 2021, McGraw-Hill, ISBN: 9781260463422

**Reference Books**

1. Programming with Java, 6th Edition, by E Balagurusamy, Mar-2019, McGraw Hill Education, ISBN: 9789353162337.
2. Thinking in Java, Fourth Edition, by Bruce Eckel, Prentice Hall, 2006 ([https://sd.blackball.lv/library/thinking\\_in\\_java\\_4th\\_edition.pdf](https://sd.blackball.lv/library/thinking_in_java_4th_edition.pdf))

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

- Assessment Methods
  - Programming Assignment (10 Marks)

**Practical Component**

Sl.NO	Experiments
1	Develop a python program to read <b>n</b> digit integer number, and separate the integer number and display each digit. [Hint: input:5678 output: 5 6 7 8, use: floor and mod operators)
2	Develop a python program to accept 4 numbers and display them in sorted order using a minimum number of <b>if else</b> statements.
3	Develop python scripts to Calculate the mean, median, mode, variance and standard deviation of <b>n</b> integer numbers.
4	Develop a program for checking if a given <b>n</b> digit number is palindrome or not. [hint: input 1221 output: palindrome, use //and % operator with loop statement]
5	Develop a python script to display a multiplication table for given integer <b>n</b> .
6	Develop a python script to rotate right about a given position in that list and display them. [hint: input [1,4,5,-10] position: 2, output: [-10,5,4,1]]
7	DevelopWrite a python script to interchange the digits of a given integer number. [hint: input: 23456, interchange: 3 and 5 output: 25436]

8	Develop a python program to capitalize a given list of strings. [hint: [hello, good, how, simple] output: [Hello, Good, How, Simple]
9	Using a dictionary, Develop a python program to determine and print the number of duplicate words in a sentence.
10	Develop python program to read Numpy array and print row (sum,mean std) and column (sum,mean,std)
11	Develop a python program to read and print in the console CSV file.
12	Develop a python program to read a HTML file with basic tags, and construct a dictionary and display the same in the console.

#### Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

#### CIE for the theory component of the IPCC (maximum marks 50)

- IPCC means practical portion integrated with the theory of the course.
- CIE marks for the theory component are **25 marks** and that for the practical component is **25 marks**.
- 25 marks for the theory component are split into **15 marks** for two Internal Assessment Tests (Two Tests, each of 15 Marks with 01-hour duration, are to be conducted) and **10 marks** for other assessment methods mentioned in 22OB4.2. The first test at the end of 40-50% coverage of the syllabus and the second test after covering 85-90% of the syllabus.
- Scaled-down marks of the sum of two tests and other assessment methods will be CIE marks for the theory component of IPCC (that is for **25 marks**).
- The student has to secure 40% of 25 marks to qualify in the CIE of the theory component of IPCC.

#### CIE for the practical component of the IPCC

- **15 marks** for the conduction of the experiment and preparation of laboratory record, and **10 marks** for the test to be conducted after the completion of all the laboratory sessions.
- On completion of every experiment/program in the laboratory, the students shall be evaluated including viva-voce and marks shall be awarded on the same day.
- The CIE marks awarded in the case of the Practical component shall be based on the continuous evaluation of the laboratory report. Each experiment report can be evaluated for 10 marks. Marks of all experiments' write-ups are added and scaled down to **15 marks**.
- The laboratory test (**duration 02/03 hours**) after completion of all the experiments shall be conducted for 50 marks and scaled down to **10 marks**.
- Scaled-down marks of write-up evaluations and tests added will be CIE marks for the laboratory component of IPCC for **25 marks**.
- The student has to secure 40% of 25 marks to qualify in the CIE of the practical component of the IPCC.

#### SEE for IPCC

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored by the student shall be proportionally scaled down to 50 Marks

**The theory portion of the IPCC shall be for both CIE and SEE, whereas the practical portion will have a CIE component only. Questions mentioned in the SEE paper may include questions from the practical component.**

<b>Data Analytics with R</b>		Semester	3
Course Code	<b>BDS306C</b>	CIE Marks	50
Teaching Hours/Week (L: T:P: S)	2;0;2;0	SEE Marks	50
Total Hours of Pedagogy	28 Hours Theory + 20 Hours Practical	Total Marks	100
Credits	03	Exam Hours	03
Examination type (SEE)	Theory		
<p><b>Course Learning objectives:</b>            CLO 1: To Gain the knowledge of R Programming Concepts            CLO 2: To Explain the concepts of Data Visualization            CLO 3: To Explain the concept of Statistics in R.            CLO 4: To Work with R charts and Graphs</p>			
<p><b>Teaching-Learning Process (General Instructions)</b></p> <ol style="list-style-type: none"> <li>1. Chalk and board, power point presentations</li> <li>2. Online material (Tutorials) and video lectures.</li> <li>3. Demonstration of programing examples.</li> </ol>			
<b>Module-1</b>		<b>5 hours</b>	
<p><b>Basics of R</b>            Introducing R, Initiating R, Packages in R, Environments and Functions, Flow Controls, Loops, Basic Data Types in R, Vectors            Chapter 1: 1.1 to 1.7 Chapter 2: 2.1,2.2</p>			
<b>Module-2</b>		<b>5 hours</b>	
<p><b>Basics of R Continued</b>            Matrices and Arrays, Lists, Data Frames, Factors, Strings, Dates and Times            Chapter 2: 2.3,2.4,2.5,2.6,2.7.2.8.1,2.8.2</p>			
<b>Module-3</b>		<b>6 Hours</b>	
<p><b>Data Preparation</b>            Datasets, Importing and Exporting files, Accessing Databases, Data Cleaning and Transformation            Chapter 3: 3.1,3.2,3.3,3.4</p>			
<b>Module-4</b>		<b>6 Hours</b>	
<p><b>Graphics using R</b>            Exploratory Data Analysis, Main Graphical Packages, Pie Charts, Scatter Plots, Line Plots, Histograms, Box Plots, Bar Plots, Other Graphical packages            Chapter 4: 4.1 to 4.9</p>			
<b>Module-5</b>		<b>6 Hours</b>	
<p><b>Statistical Analysis using R</b>            Basic Statistical Measures, Normal distribution, Binomial distribution, Correlation Analysis, Regression Analysis-Linear Regression Analysis of Variance            Chapter 5: 5.1, 5.3, 5.4, 5.5, 5.6.1, 5.7</p>			

**Course outcome (Course Skill Set)**

At the end of the course, the student will be able to :

CO1: Describe the structures of R Programming.

CO2: Illustrate the basics of Data Preparation with real world examples.

CO3: Apply the Graphical Packages of R for visualization.

CO4: Apply various Statistical Analysis methods for data analytics.

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

**Continuous Internal Evaluation:**

- For the Assignment component of the CIE, there are 25 marks and for the Internal Assessment Test component, there are 25 marks.
- The first test will be administered after 40-50% of the syllabus has been covered, and the second test will be administered after 85-90% of the syllabus has been covered
- Any two assignment methods mentioned in the 22OB2.4, if an assignment is project-based then only one assignment for the course shall be planned. The teacher should not conduct two assignments at the end of the semester if two assignments are planned.
- For the course, CIE marks will be based on a scaled-down sum of two tests and other methods of assessment.

**Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester-End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**).

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored shall be proportionally reduced to 50 marks

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

- Programming Assignment (10 Marks)

## Practical Component

Sl.NO	Experiments
1	Demonstrate the steps for installation of R and R Studio. Perform the following: <ol style="list-style-type: none"> <li>a) Assign different type of values to variables and display the type of variable. Assign different types such as Double, Integer, Logical, Complex and Character and understand the difference between each data type.</li> <li>b) Demonstrate Arithmetic and Logical Operations with simple examples.</li> <li>c) Demonstrate generation of sequences and creation of vectors.</li> <li>d) Demonstrate Creation of Matrices</li> <li>e) Demonstrate the Creation of Matrices from Vectors using Binding Function.</li> <li>f) Demonstrate element extraction from vectors, matrices and arrays</li> </ol>
2	Assess the Financial Statement of an Organization being supplied with 2 vectors of data: Monthly Revenue and Monthly Expenses for the Financial Year. You can create your own sample data vector for this experiment) Calculate the following financial metrics: <ol style="list-style-type: none"> <li>a. Profit for each month.</li> <li>b. Profit after tax for each month (Tax Rate is 30%).</li> <li>c. Profit margin for each month equals to profit after tax divided by revenue.</li> <li>d. Good Months – where the profit after tax was greater than the mean for the year.</li> <li>e. Bad Months – where the profit after tax was less than the mean for the year.</li> <li>f. The best month – where the profit after tax was max for the year.</li> <li>g. The worst month – where the profit after tax was min for the year.</li> </ol> <p><b>Note:</b></p> <ol style="list-style-type: none"> <li>a. All Results need to be presented as vectors</li> <li>b. Results for Dollar values need to be calculated with \$0.01 precision, but need to be presented in Units of \$1000 (i.e 1k) with no decimal points</li> <li>c. Results for the profit margin ratio need to be presented in units of % with no decimal point.</li> <li>d. It is okay for tax to be negative for any given month (deferred tax asset)</li> <li>e. Generate CSV file for the data.</li> </ol>
3	Develop a program to create two 3 X 3 matrices A and B and perform the following operations a) Transpose of the matrix b) addition c) subtraction d) multiplication
4	Develop a program to find the factorial of given number using recursive function calls.

5	Develop an R Program using functions to find all the prime numbers up to a specified number by the method of Sieve of Eratosthenes.																		
6	The built-in data set mammals contain data on body weight versus brain weight. Develop R commands to: a) Find the Pearson and Spearman correlation coefficients. Are they similar? b) Plot the data using the plot command. c) Plot the logarithm (log) of each variable and see if that makes a difference.																		
7	Develop R program to create a Data Frame with following details and do the following operations. <table border="1" data-bbox="267 401 1489 621"> <thead> <tr> <th>itemCode</th> <th>itemCategory</th> <th>itemPrice</th> </tr> </thead> <tbody> <tr> <td>1001</td> <td>Electronics</td> <td>700</td> </tr> <tr> <td>1002</td> <td>Desktop Supplies</td> <td>300</td> </tr> <tr> <td>1003</td> <td>Office Supplies</td> <td>350</td> </tr> <tr> <td>1004</td> <td>USB</td> <td>400</td> </tr> <tr> <td>1005</td> <td>CD Drive</td> <td>800</td> </tr> </tbody> </table> a) Subset the Data frame and display the details of only those items whose price is greater than or equal to 350. b) Subset the Data frame and display only the items where the category is either "Office Supplies" or "Desktop Supplies" c) Create another Data Frame called "item-details" with three different fields itemCode, ItemQtyonHand and ItemReorderLvl and merge the two frames	itemCode	itemCategory	itemPrice	1001	Electronics	700	1002	Desktop Supplies	300	1003	Office Supplies	350	1004	USB	400	1005	CD Drive	800
itemCode	itemCategory	itemPrice																	
1001	Electronics	700																	
1002	Desktop Supplies	300																	
1003	Office Supplies	350																	
1004	USB	400																	
1005	CD Drive	800																	
8	Let us use the built-in dataset air quality which has Daily air quality measurements in New York, May to September 1973. Develop R program to generate histogram by using appropriate arguments for the following statements. a) Assigning names, using the air quality data set. b) Change colors of the Histogram c) Remove Axis and Add labels to Histogram d) Change Axis limits of a Histogram e) Add Density curve to the histogram																		
9	Design a data frame in R for storing about 20 employee details. Create a CSV file named "input.csv" that defines all the required information about the employee such as id, name, salary, start_date, dept. Import into R and do the following analysis. a) Find the total number rows & columns b) Find the maximum salary c) Retrieve the details of the employee with maximum salary d) Retrieve all the employees working in the IT Department. e) Retrieve the employees in the IT Department whose salary is greater than 20000 and write these details into another file "output.csv"																		
10	Using the built in dataset mtcars which is a popular dataset consisting of the design and fuel consumption patterns of 32 different automobiles. The data was extracted from the 1974 Motor Trend US magazine, and comprises fuel consumption and 10 aspects of automobile design and performance for 32 automobiles (1973-74 models). Format A data frame with 32 observations on 11 variables : [1] mpg Miles/(US) gallon, [2] cyl Number of cylinders [3] disp Displacement (cu.in.), [4] hp Gross horsepower [5] drat Rear axle ratio,[6] wt Weight (lb/1000) [7] qsec 1/4 mile time, [8] vs V/S, [9] am Transmission (0 = automatic, 1 = manual), [10] gear Number of forward gears, [11] carb Number of carburetors  Develop R program, to solve the following: a) What is the total number of observations and variables in the dataset? b) Find the car with the largest hp and the least hp using suitable functions c) Plot histogram / density for each variable and determine whether continuous variables are normally distributed or not. If not, what is their skewness? d) What is the average difference of gross horse power(hp) between automobiles with 3 and 4 number of cylinders(cyl)? Also determine the difference in their standard deviations. e) Which pair of variables has the highest Pearson correlation?																		

11	Demonstrate the progression of salary with years of experience using a suitable data set (You can create your own dataset). Plot the graph visualizing the best fit line on the plot of the given data points. Plot a curve of Actual Values vs. Predicted values to show their correlation and performance of the model. Interpret the meaning of the slope and y-intercept of the line with respect to the given data. Implement using lm function. Save the graphs and coefficients in files. Attach the predicted values of salaries as a new column to the original data set and save the data as a new CSV file.
----	--

#### **Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

#### **CIE for the theory component of the IPCC (maximum marks 50)**

- IPCC means practical portion integrated with the theory of the course.
- CIE marks for the theory component are **25 marks** and that for the practical component is **25 marks**.
- 25 marks for the theory component are split into **15 marks** for two Internal Assessment Tests (Two Tests, each of 15 Marks with 01-hour duration, are to be conducted) and **10 marks** for other assessment methods mentioned in 22OB4.2. The first test at the end of 40-50% coverage of the syllabus and the second test after covering 85-90% of the syllabus.
- Scaled-down marks of the sum of two tests and other assessment methods will be CIE marks for the theory component of IPCC (that is for **25 marks**).
- The student has to secure 40% of 25 marks to qualify in the CIE of the theory component of IPCC.

#### **CIE for the practical component of the IPCC**

- **15 marks** for the conduction of the experiment and preparation of laboratory record, and **10 marks** for the test to be conducted after the completion of all the laboratory sessions.
- On completion of every experiment/program in the laboratory, the students shall be evaluated including viva-voce and marks shall be awarded on the same day.
- The CIE marks awarded in the case of the Practical component shall be based on the continuous evaluation of the laboratory report. Each experiment report can be evaluated for 10 marks. Marks of all experiments' write-ups are added and scaled down to **15 marks**.
- The laboratory test (**duration 02/03 hours**) after completion of all the experiments shall be conducted for 50 marks and scaled down to **10 marks**.
- Scaled-down marks of write-up evaluations and tests added will be CIE marks for the laboratory component of IPCC for **25 marks**.
- The student has to secure 40% of 25 marks to qualify in the CIE of the practical component of the IPCC.

#### **SEE for IPCC**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored by the student shall be proportionally scaled down to 50 Marks

**The theory portion of the IPCC shall be for both CIE and SEE, whereas the practical portion will have a CIE component only. Questions mentioned in the SEE paper may include questions from the practical component.**

<b>BSCK307 – Social Connect &amp; Responsibility 2022 Scheme &amp; syllabus for 3<sup>rd</sup> sem</b>		Semester	<b>3<sup>rd</sup></b>
Course Code	<b>BSCK307</b>	CIE Marks	<b>100</b>
Teaching Hours/Week (L:T:P: S)	0:0:3:1	SEE Marks	-----
Total Hours of Pedagogy	40 hour Practical Session +15 hour Planning	Total Marks	<b>100</b>
Examination nature (No SEE – Only CIE)	For CIE Assessment - Activities Report Evaluation by College NSS Officer / HOD / Sports Dept / Any Dept.		
Credits	01 - Credit		

**Course objectives: The course will enable the students to:**

1. Provide a formal platform for students to communicate and connect to the surrounding.
2. create a responsible connection with the society.
3. Understand the community in general in which they work.
4. Identify the needs and problems of the community and involve them in problem –solving.
5. Develop among themselves a sense of social & civic responsibility & utilize their knowledge in finding practical solutions to individual and community problems.
6. Develop competence required for group-living and sharing of responsibilities & gain skills in mobilizing community participation to acquire leadership qualities and democratic attitudes.

**General Instructions - Pedagogy :**

These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.

1. In addition to the traditional lecture method, different types of innovative teaching methods may be adopted so that the activities will develop students' theoretical and applied social and cultural skills.
2. State the need for activities and its present relevance in the society and Provide real-life examples.
3. Support and guide the students for self-planned activities.
4. You will also be responsible for assigning homework, grading assignments and quizzes, and documenting students' progress in real activities in the field.
5. Encourage the students for group work to improve their creative and analytical skills.

**Contents :**

The course is mainly activity-based that will offer a set of activities for the student that enables them to connect with fellow human beings, nature, society, and the world at large.

The course will engage students for interactive sessions, open mic, reading group, storytelling sessions, and semester-long activities conducted by faculty mentors.

In the following a set of activities planned for the course have been listed:

**Social Connect & Responsibility - Contents****Part I:****Plantation and adoption of a tree:**

Plantation of a tree that will be adopted for four years by a group of BE / B.Tech students. (ONE STUDENT ONE TREE)  
They will also make an excerpt either as a documentary or a photo blog describing the plant's origin, its usage in daily life, its appearance in folklore and literature - - Objectives, Visit, case study, report, outcomes.

**Part II :****Heritage walk and crafts corner:**

Heritage tour, knowing the history and culture of the city, connecting to people around through their history, knowing the city and its craftsman, photo blog and documentary on evolution and practice of various craft forms - - Objectives, Visit, case study, report, outcomes.

**Part III :****Organic farming and waste management:**

Usefulness of organic farming, wet waste management in neighboring villages, and implementation in the campus -

Objectives, Visit, case study, report, outcomes.

#### **Part IV:**

##### **Water conservation:**

Knowing the present practices in the surrounding villages and implementation in the campus, documentary or photoblog presenting the current practices – Objectives, Visit, case study, report, outcomes.

#### **Part V :**

##### **Food walk:**

City's culinary practices, food lore, and indigenous materials of the region used in cooking – Objectives, Visit, case study, report, outcomes.

#### **Course outcomes (Course Skill Set):**

At the end of the course, the student will be able to:

CO1: Communicate and connect to the surrounding.

CO2: Create a responsible connection with the society.

CO3: Involve in the community in general in which they work.

CO4: Notice the needs and problems of the community and involve them in problem –solving.

CO5: Develop among themselves a sense of social & civic responsibility & utilize their knowledge in finding practical solutions to individual and community problems.

CO6: Develop competence required for group-living and sharing of responsibilities & gain skills in mobilizing community participation to acquire leadership qualities and democratic attitudes.

#### **Activities:**

Jamming session, open mic, and poetry: Platform to connect to others. Share the stories with others. Share the experience of Social Connect. Exhibit the talent like playing instruments, singing, one-act play, art-painting, and fine art.

#### **PEDAGOGY:**

The pedagogy will include interactive lectures, inspiring guest talks, field visits, social immersion, and a course project. Applying and synthesizing information from these sources to define the social problem to address and take up the solution as the course project, with your group. Social immersion with NGOs/social sections will be a key part of the course. Will all lead to the course project that will address the needs of the social sector?

#### **COURSE TOPICS:**

The course will introduce social context and various players in the social space, and present approaches to discovering and understanding social needs. Social immersion and inspiring conversational will culminate in developing an actual, idea for problem-based intervention, based on an in-depth understanding of a key social problem.

#### **Duration :**

A total of 40 - 50 hrs engagement per semester is required for the 3rd semester of the B.E. /B.Tech. program. The students will be divided into groups. Each group will be handled by faculty mentor. Faculty mentor will design the activities (particularly Jamming sessions open mic ,and poetry) Faculty mentors has to design the evaluation system as per VTU guidelines of scheme & syllabus.

#### **Guideline for Assessment Process:**

##### **Continuous Internal Evaluation (CIE):**

After completion of the course, the student shall prepare, with daily diary as reference, a comprehensive report in consultation with the mentor/s to indicate what he has observed and learned in the social connect period. The report should be signed by the mentor. The report shall

be evaluated on the basis of the following criteria and/or other relevant criteria pertaining to the activity completed. Marks allotted for the diary are out of 50. Planning and scheduling the social connect Information/Data collected during the social connect Analysis of the information/data and report writing Considering all above points allotting the marks as mentioned below

**Excellent : 80 to 100**

**Good : 60 to 79**

**Satisfactory : 40 to 59**

**Unsatisfactory and fail : <39**

### Special Note :

**NO SEE – Semester End Exam – Completely Practical and activities based evaluation**

## Pedagogy – Guidelines :

It may differ depending on local resources available for the study as well as environment and climatic differences, location and time of execution.

Sl No	Topic	Group size	Location	Activity execution	Reporting	Evaluation Of the Topic
1.	<b>Plantation and adoption of a tree:</b>	May be individual or team	Farmers land/ parks / Villages / roadside/ community area / College campus etc.....	Site selection /proper consultation/Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics Of scheme and syllabus by Faculty
2.	<b>Heritage walk and crafts corner:</b>	May be individual or team	Temples / monumental places / Villages/ City Areas / Grama panchayat/ public associations/Government Schemes officers/ campus etc.....	Site selection /proper consultation/Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics Of scheme and syllabus by Faculty
3.	<b>Organic farming and waste management:</b>	May be individual or team	Farmers land / parks / Villages visits / roadside/ community area / College campus etc.....	Group selection / proper consultation / Continuous monitoring / Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics Of scheme and syllabus by Faculty
4.	<b>Water conservation: &amp; conservation techniques</b>	May be individual or team	Villages/ City Areas / Grama panchayat/ public associations/Government Schemes officers / campus etc.....	site selection / proper consultation/Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics Of scheme and syllabus by Faculty
5.	<b>Food walk: Practices in society</b>	May be individual or team	Villages/ City Areas / Grama panchayat/ public associations/Government Schemes officers/ campus etc.....	Group selection / proper consultation / Continuous monitoring / Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics Of scheme and syllabus by Faculty

## Plan of Action (Execution of Activities )

Sl.NO	Practice Session Description	
1	Lecture session in field to start activities	
2	Students Presentation on Ideas	
3	Commencement of activity and its progress	
4	Execution of Activity	
5	Execution of Activity	
6	Execution of Activity	
7	Execution of Activity	
8	Case study based Assessment, Individual performance	
9	Sector/ Team wise study and its consolidation	
10	Video based seminar for 10 minutes by each student At the end of semester with Report.	
<ul style="list-style-type: none"> <li>• Each student should do activities according to the scheme and syllabus.</li> <li>• At the end of semester student performance has to be evaluated by the faculty for the assigned activity progress and its completion.</li> <li>• At last consolidated report of all activities from 1<sup>st</sup> to 5<sup>th</sup>, compiled report should be submitted as per the instructions and scheme.</li> </ul> <p>-----</p>		
<b>Assessment Details for CIE (both CIE and SEE)</b>		
<b>Weightage</b>	<b>CIE – 100%</b>	<ul style="list-style-type: none"> <li>• Implementation strategies of the project (NSS work).</li> <li>• The last report should be signed by NSS Officer, the HOD and principal.</li> <li>• At last report should be evaluated by the NSS officer of the institute.</li> <li>• Finally the consolidated marks sheet should be sent to the university and also to be made available at LIC visit.</li> </ul>
Field Visit, Plan, Discussion	10 Marks	
Commencement of activities and its progress	20 Marks	
Case study based Assessment Individual performance with report	20 Marks	
Sector wise study & its consolidation 5*5 = 25	25 Marks	
Video based seminar for 10 minutes by each student At the end of semester with Report. <b>Activities 1 to 5, 5*5 = 25</b>	25 Marks	
<b>Total marks for the course in each semester</b>	<b>100 Marks</b>	
<p><b>For each activity, 20 marks CIE will be evaluated for IA marks at the end of semester, Report and assessment copy should be made available in the department.</b></p> <p>Students should present the progress of the activities as per the schedule in the prescribed practical session in the field. There should be positive progress in the vertical order for the benefit of society in general through activities.</p>		

<b>Data Analytics with Excel</b>		Semester	<b>3</b>
Course Code	<b>BCS358A</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	0:0:2:0	SEE Marks	50
Credits	01	Exam Hours	100
Examination type (SEE)	Practical		
Course objectives: <ul style="list-style-type: none"> <li>● To Apply analysis techniques to datasets in Excel</li> <li>● Learn how to use Pivot Tables and Pivot Charts to streamline your workflow in Excel</li> <li>● Understand and Identify the principles of data analysis</li> <li>● Become adept at using Excel functions and techniques for analysis</li> <li>● Build presentation ready dashboards in Excel</li> </ul>			
Sl.NO	Experiments		
1	<b>Getting Started with Excel:</b> Creation of spread sheets, Insertion of rows and columns, Drag & Fill, use of Aggregate functions.		
2	<b>Working with Data :</b> Importing data, Data Entry & Manipulation, Sorting & Filtering.		
3	<b>Working with Data:</b> Data Validation, Pivot Tables & Pivot Charts.		
4	<b>Data Analysis Process:</b> Conditional Formatting, What-If Analysis, Data Tables, Charts & Graphs.		
5	<b>Cleaning Data with Text Functions:</b> use of UPPER and LOWER, TRIM function, Concatenate.		
6	<b>Cleaning Data Containing Date and Time Values:</b> use of DATEVALUE function, DATEADD and DATEDIF, TIMEVALUE functions.		
7	<b>Conditional Formatting:</b> formatting, parsing, and highlighting data in spreadsheets during data analysis.		
8	<b>Working with Multiple Sheets:</b> work with multiple sheets within a workbook is crucial for organizing and managing data, perform complex calculations and create comprehensive reports.		
9	Create worksheet with following fields: Empno, Ename, Basic Pay(BP), Travelling Allowance(TA), Dearness Allowance(DA), House Rent Allowance(HRA), Income Tax(IT), Provident Fund(PF), Net Pay(NP). Use appropriate formulas to calculate the above scenario. Analyse the data using appropriate chart and report the data.		
10	Create worksheet on Inventory Management: Sheet should contain Product code, Product name, Product type, MRP, Cost after % of discount, Date of purchase. Use appropriate formulas to calculate the above scenario. Analyse the data using appropriate chart and report the data.		

11	Create worksheet on Sales analysis of Merchandise Store: data consisting of Order ID, Customer ID, Gender, age, date of order, month, online platform, Category of product, size, quantity, amount, shipping city and other details. Use of formula to segregate different categories and perform a comparative study using pivot tables and different sort of charts.
12	Generation of report & presentation using Autofilter & macro.

**Course outcomes (Course Skill Set):**

At the end of the course the student will be able to:

- Use advanced functions and productivity tools to assist in developing worksheets.
- Manipulate data lists using Outline and PivotTables.
- Use Consolidation to summarise and report results from multiple worksheets.
- Apply Macros and Autofilter to solve the given real world scenario.

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together

**Continuous Internal Evaluation (CIE):**

CIE marks for the practical course are **50 Marks**.

The split-up of CIE marks for record/ journal and test are in the ratio **60:40**.

- Each experiment is to be evaluated for conduction with an observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments are designed by the faculty who is handling the laboratory session and are made known to students at the beginning of the practical session.
- Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks.
- Total marks scored by the students are scaled down to **30 marks** (60% of maximum marks).
- Weightage to be given for neatness and submission of record/write-up on time.
- Department shall conduct a test of 100 marks after the completion of all the experiments listed in the syllabus.
- In a test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce.
- The suitable rubrics can be designed to evaluate each student's performance and learning ability.
- The marks scored shall be scaled down to **20 marks** (40% of the maximum marks).

The Sum of scaled-down marks scored in the report write-up/journal and marks of a test is the total CIE marks scored by the student.

**Semester End Evaluation (SEE):**

- SEE marks for the practical course are 50 Marks.
- SEE shall be conducted jointly by the two examiners of the same institute, examiners are appointed by the Head of the Institute.
- The examination schedule and names of examiners are informed to the university before the conduction of the examination. These practical examinations are to be conducted between the schedule mentioned in the academic calendar of the University.

- All laboratory experiments are to be included for practical examination.
- (Rubrics) Breakup of marks and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners. **OR** based on the course requirement evaluation rubrics shall be decided jointly by examiners.
- Students can pick one question (experiment) from the questions lot prepared by the examiners jointly.
- Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners.

General rubrics suggested for SEE are mentioned here, writeup-20%, Conduction procedure and result in -60%, Viva-voce 20% of maximum marks. SEE for practical shall be evaluated for 100 marks and scored marks shall be scaled down to 50 marks (however, based on course type, rubrics shall be decided by the examiners)

Change of experiment is allowed only once and 15% of Marks allotted to the procedure part are to be made zero.

The minimum duration of SEE is 02 hours

<b>Project Management with Git</b>		Semester	<b>3</b>
Course Code	<b>BCS358C</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	0: 0 : 2: 0	SEE Marks	50
Credits	01	Exam Marks	100
Examination type (SEE)	Practical		
<b>Course objectives:</b>			
<ul style="list-style-type: none"> <li>• .To familiar with basic command of Git</li> <li>• To create and manage branches</li> <li>• To understand how to collaborate and work with Remote Repositories</li> <li>• To familiar with virion controlling commands</li> </ul>			
<b>Sl.NO</b>	<b>Experiments</b>		
1	<b>Setting Up and Basic Commands</b> Initialize a new Git repository in a directory. Create a new file and add it to the staging area and commit the changes with an appropriate commit message.		
2	<b>Creating and Managing Branches</b> Create a new branch named "feature-branch." Switch to the "master" branch. Merge the "feature-branch" into "master."		
3	<b>Creating and Managing Branches</b> Write the commands to stash your changes, switch branches, and then apply the stashed changes.		
4	<b>Collaboration and Remote Repositories</b> Clone a remote Git repository to your local machine.		
5	<b>Collaboration and Remote Repositories</b> Fetch the latest changes from a remote repository and rebase your local branch onto the updated remote branch.		
6	<b>Collaboration and Remote Repositories</b> Write the command to merge "feature-branch" into "master" while providing a custom commit message for the merge.		
7	<b>Git Tags and Releases</b> Write the command to create a lightweight Git tag named "v1.0" for a commit in your local repository.		
8	<b>Advanced Git Operations</b>		

	Write the command to cherry-pick a range of commits from "source-branch" to the current branch.
9	<b>Analysing and Changing Git History</b>  Given a commit ID, how would you use Git to view the details of that specific commit, including the author, date, and commit message?
10	<b>Analysing and Changing Git History</b>  Write the command to list all commits made by the author "JohnDoe" between "2023-01-01" and "2023-12-31."
11	<b>Analysing and Changing Git History</b>  Write the command to display the last five commits in the repository's history.
12	<b>Analysing and Changing Git History</b>  Write the command to undo the changes introduced by the commit with the ID "abc123".
<b>Course outcomes (Course Skill Set):</b> At the end of the course the student will be able to: <ul style="list-style-type: none"><li>• Use the basics commands related to git repository</li><li>• Create and manage the branches</li><li>• Apply commands related to Collaboration and Remote Repositories</li><li>• Use the commands related to Git Tags, Releases and advanced git operations</li><li>• Analyse and change the git history</li></ul>	

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together

**Continuous Internal Evaluation (CIE):**

CIE marks for the practical course are **50 Marks**.

The split-up of CIE marks for record/ journal and test are in the ratio **60:40**.

- Each experiment is to be evaluated for conduction with an observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments are designed by the faculty who is handling the laboratory session and are made known to students at the beginning of the practical session.
- Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks.
- Total marks scored by the students are scaled down to **30 marks** (60% of maximum marks).
- Weightage to be given for neatness and submission of record/write-up on time.
- Department shall conduct a test of 100 marks after the completion of all the experiments listed in the syllabus.
- In a test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce.
- The suitable rubrics can be designed to evaluate each student's performance and learning ability.
- The marks scored shall be scaled down to **20 marks** (40% of the maximum marks).

The Sum of scaled-down marks scored in the report write-up/journal and marks of a test is the total CIE marks scored by the student.

**Semester End Evaluation (SEE):**

- SEE marks for the practical course are 50 Marks.
- SEE shall be conducted jointly by the two examiners of the same institute, examiners are appointed by the Head of the Institute.
- The examination schedule and names of examiners are informed to the university before the conduction of the examination. These practical examinations are to be conducted between the schedule mentioned in the academic calendar of the University.

- All laboratory experiments are to be included for practical examination.
- (Rubrics) Breakup of marks and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners. **OR** based on the course requirement evaluation rubrics shall be decided jointly by examiners.
- Students can pick one question (experiment) from the questions lot prepared by the examiners jointly.
- Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners.

General rubrics suggested for SEE are mentioned here, writeup-20%, Conduction procedure and result in -60%, Viva-voce 20% of maximum marks. SEE for practical shall be evaluated for 100 marks and scored marks shall be scaled down to 50 marks (however, based on course type, rubrics shall be decided by the examiners)

Change of experiment is allowed only once and 15% of Marks allotted to the procedure part are to be made zero.

The minimum duration of SEE is 02 hours

PHP Programming		Semester	3
Course Code	BAI358D	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	0:0:2:0	SEE Marks	50
Credits	01	Exam Hours	02
Examination type (SEE)	Practical		
<b>Course objectives:</b>			
<ul style="list-style-type: none"> <li>● To introduce the PHP syntax, elements, and control structures</li> <li>● To make use of PHP Functions and File handling</li> <li>● To illustrate the concept of PHP arrays and OOPs</li> </ul>			
<b>Sl.NO</b>	<b>Experiments</b>		
<b>AIM:</b> Introduction to HTML/PHP environment, PHP Data Types, Variables, Literals, and operators			
1	a. Develop a PHP program to calculate areas of Triangle and Rectangle. b. Develop a PHP program to calculate Compound Interest.		
2	Demonstrating the various forms to concatenate multiple strings Develop program(s) to demonstrate concatenation of strings: <ol style="list-style-type: none"> <li>(i) Strings represented with literals (single quote or double quote)</li> <li>(ii) Strings as variables</li> <li>(iii) Multiple strings represented with literals (single quote or double quote) and variables</li> <li>(iv) Strings and string variables containing single quotes as part string contents</li> <li>(v) Strings containing HTML segments having elements with attributes</li> </ol>		
3	a. Develop a PHP Program(s) to check given number is: <ol style="list-style-type: none"> <li>(i) Odd or even</li> <li>(ii) Divisible by a given number (N)</li> <li>(iii) Square of a another number</li> </ol> b. Develop a PHP Program to compute the roots of a quadratic equation by accepting the coefficients. Print the appropriate messages.		
4	a. Develop a PHP program to find the square root of a number by using the newton's algorithm. b. Develop a PHP program to generate Floyd's triangle.		
5	a. Develop a PHP application that reads a list of numbers and calculates mean and standard deviation. b. Develop a PHP application that reads scores between 0 and 100 (possibly including both 0 and 100) and creates a histogram array whose elements contain the number of scores between 0 and 9, 10 and 19, etc. The last "box" in the histogram should include scores between 90 and 100. Use a function to generate the histogram.		
6	a. Develop PHP program to demonstrate the date() with different parameter options. b. Develop a PHP program to generate the Fibonacci series using a recursive function.		
7	Develop a PHP program to accept the file and perform the following <ol style="list-style-type: none"> <li>(i) Print the first N lines of a file</li> <li>(ii) Update/Add the content of a file</li> </ol>		
8	Develop a PHP program to read the content of the file and print the frequency of occurrence of the word accepted by the user in the file		
9	Develop a PHP program to filter the elements of an array with key names.  Sample Input Data: 1st array: ('c1' => 'Red', 'c2' => 'Green', 'c3' => 'White', c4 => 'Black') 2nd array: ('c2', 'c4')		

	Output: Array ( [c1] => Red [c3] => White )
10	Develop a PHP program that illustrates the concept of classes and objects by reading and printing employee data, including Emp_Name, Emp_ID, Emp_Dept, Emp_Salary, and Emp_DOJ.
11	a. Develop a PHP program to count the occurrences of Aadhaar numbers present in a text. b. Develop a PHP program to find the occurrences of a given pattern and replace them with a text.
12	Develop a PHP program to read the contents of a HTML form and display the contents on a browser.
<b>NOTE: Necessary HTML elements (and CSS) can be used for designing the experiments.</b>	
<b>Course outcomes (Course Skill Set):</b> At the end of the course, the student will be able to: <ul style="list-style-type: none"><li>• Apply basic concepts of PHP to develop web program</li><li>• Develop programs in PHP involving control structures</li><li>• Develop programs to handle structured data (object) and data items (array)</li><li>• Develop programs to access and manipulate contents of files</li><li>• Use super-global arrays and regular expressions to solve real world problems.</li></ul>	

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together

**Continuous Internal Evaluation (CIE):**

CIE marks for the practical course are **50 Marks**.

The split-up of CIE marks for record/ journal and test are in the ratio **60:40**.

- Each experiment is to be evaluated for conduction with an observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments are designed by the faculty who is handling the laboratory session and are made known to students at the beginning of the practical session.
- Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks.
- Total marks scored by the students are scaled down to **30 marks** (60% of maximum marks).
- Weightage to be given for neatness and submission of record/write-up on time.
- Department shall conduct a test of 100 marks after the completion of all the experiments listed in the syllabus.
- In a test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce.
- The suitable rubrics can be designed to evaluate each student's performance and learning ability.
- The marks scored shall be scaled down to **20 marks** (40% of the maximum marks).

The Sum of scaled-down marks scored in the report write-up/journal and marks of a test is the total CIE marks scored by the student.

**Semester End Evaluation (SEE):**

- SEE marks for the practical course are 50 Marks.
- SEE shall be conducted jointly by the two examiners of the same institute, examiners are appointed by the Head of the Institute.
- The examination schedule and names of examiners are informed to the university before the conduction of the examination. These practical examinations are to be conducted between the schedule mentioned in the academic calendar of the University.
- All laboratory experiments are to be included for practical examination.
- (Rubrics) Breakup of marks and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners. **OR** based on the course requirement evaluation rubrics shall be decided jointly by examiners.

- Students can pick one question (experiment) from the questions lot prepared by the examiners jointly.
- Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners.

General rubrics suggested for SEE are mentioned here, writeup-20%, Conduction procedure and result in -60%, Viva-voce 20% of maximum marks. SEE for practical shall be evaluated for 100 marks and scored marks shall be scaled down to 50 marks (however, based on course type, rubrics shall be decided by the examiners)

Change of experiment is allowed only once and 15% of Marks allotted to the procedure part are to be made zero.

The minimum duration of SEE is 02 hours

<b>Analysis &amp; Design of Algorithms</b>		Semester	4
Course Code	<b>BCS401</b>	CIE Marks	50
Teaching Hours/Week (L: T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
Examination type (SEE)	Theory		
<p><b>Course objectives:</b></p> <ul style="list-style-type: none"> <li>• To learn the methods for analyzing algorithms and evaluating their performance.</li> <li>• To demonstrate the efficiency of algorithms using asymptotic notations.</li> <li>• To solve problems using various algorithm design methods, including brute force, greedy, divide and conquer, decrease and conquer, transform and conquer, dynamic programming, backtracking, and branch and bound.</li> <li>• To learn the concepts of P and NP complexity classes.</li> </ul>			
<p><b>Teaching-Learning Process (General Instructions)</b>            These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) does not mean only the traditional lecture method, but different types of teaching methods may be adopted to achieve the outcomes.</li> <li>2. Utilize video/animation films to illustrate the functioning of various concepts.</li> <li>3. Promote collaborative learning (Group Learning) in the class.</li> <li>4. Pose at least three HOT (Higher Order Thinking) questions in the class to stimulate critical thinking.</li> <li>5. Incorporate Problem-Based Learning (PBL) to foster students' analytical skills and develop their ability to evaluate, generalize, and analyze information rather than merely recalling it.</li> <li>6. Introduce topics through multiple representations.</li> <li>7. Demonstrate various ways to solve the same problem and encourage students to devise their own creative solutions.</li> <li>8. Discuss the real-world applications of every concept to enhance students' comprehension.</li> </ol>			
<b>Module-1</b>			
<p><b>INTRODUCTION:</b> What is an Algorithm?, Fundamentals of Algorithmic Problem Solving.  <b>FUNDAMENTALS OF THE ANALYSIS OF ALGORITHM EFFICIENCY:</b> Analysis Framework, Asymptotic Notations and Basic Efficiency Classes, Mathematical Analysis of Non recursive Algorithms, Mathematical Analysis of Recursive Algorithms.  <b>BRUTE FORCE APPROACHES:</b> Selection Sort and Bubble Sort, Sequential Search and Brute Force String Matching.  <b>Chapter 1 (Sections 1.1,1.2), Chapter 2(Sections 2.1,2.2,2.3,2.4), Chapter 3(Section 3.1,3.2)</b></p>			
<b>Module-2</b>			
<p><b>BRUTE FORCE APPROACHES (contd.):</b> Exhaustive Search (Travelling Salesman problem and Knapsack Problem).  <b>DECREASE-AND-CONQUER:</b> Insertion Sort, Topological Sorting.  <b>DIVIDE AND CONQUER:</b> Merge Sort, Quick Sort, Binary Tree Traversals, Multiplication of Large Integers and Strassen's Matrix Multiplication.</p>			

<b>Chapter 3(Section 3.4), Chapter 4 (Sections 4.1,4.2), Chapter 5 (Section 5.1,5.2,5.3, 5.4)</b>
<b>Module-3</b>
<b>TRANSFORM-AND-CONQUER:</b> Balanced Search Trees, Heaps and Heapsort. <b>SPACE-TIME TRADEOFFS:</b> Sorting by Counting: Comparison counting sort, Input Enhancement in String Matching: Horspool's Algorithm.
<b>Chapter 6 (Sections 6.3,6.4), Chapter 7 (Sections 7.1,7.2)</b>
<b>Module-4</b>
<b>DYNAMIC PROGRAMMING:</b> Three basic examples, The Knapsack Problem and Memory Functions, Warshall's and Floyd's Algorithms. <b>THE GREEDY METHOD:</b> Prim's Algorithm, Kruskal's Algorithm, Dijkstra's Algorithm, Huffman Trees and Codes.
<b>Chapter 8 (Sections 8.1,8.2,8.4), Chapter 9 (Sections 9.1,9.2,9.3,9.4)</b>
<b>Module-5</b>
<b>LIMITATIONS OF ALGORITHMIC POWER:</b> Decision Trees, P, NP, and NP-Complete Problems. <b>COPING WITH LIMITATIONS OF ALGORITHMIC POWER:</b> Backtracking (n-Queens problem, Subset-sum problem), Branch-and-Bound (Knapsack problem), Approximation algorithms for NP-Hard problems (Knapsack problem).
<b>Chapter 11 (Section 11.2, 11.3), Chapter 12 (Sections 12.1,12.2,12.3)</b>
<b>Course outcome (Course Skill Set)</b>
At the end of the course, the student will be able to:
<ol style="list-style-type: none"> <li>1. Apply asymptotic notational method to analyze the performance of the algorithms in terms of time complexity.</li> <li>2. Demonstrate divide &amp; conquer approaches and decrease &amp; conquer approaches to solve computational problems.</li> <li>3. Make use of transform &amp; conquer and dynamic programming design approaches to solve the given real world or complex computational problems.</li> <li>4. Apply greedy and input enhancement methods to solve graph &amp; string based computational problems.</li> <li>5. Analyse various classes (P, NP and NP Complete) of problems</li> <li>6. Illustrate backtracking, branch &amp; bound and approximation methods.</li> </ol>

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

**Continuous Internal Evaluation:**

- For the Assignment component of the CIE, there are 25 marks and for the Internal Assessment Test component, there are 25 marks.
- The first test will be administered after 40-50% of the syllabus has been covered, and the second test will be administered after 85-90% of the syllabus has been covered
- Any two assignment methods mentioned in the 220B2.4, if an assignment is project-based then only one assignment for the course shall be planned. The teacher should not conduct two assignments at the end of the semester if two assignments are planned.
- For the course, CIE marks will be based on a scaled-down sum of two tests and other methods of assessment.

**Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester-End Examination:**

Theory SEE will be conducted by the University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**).

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored shall be proportionally **reduced to 50 marks**

**Suggested Learning Resources:****Textbooks**

1. Introduction to the Design and Analysis of Algorithms, By Anany Levitin, 3rd Edition (Indian), 2017, Pearson.

**Reference books**

1. Computer Algorithms/C++, Ellis Horowitz, SatrajSahni and Rajasekaran, 2nd Edition, 2014, Universities Press.
2. Introduction to Algorithms, Thomas H. Cormen, Charles E. Leiserson, Ronal L. Rivest, Clifford Stein, 3rd Edition, PHI.
3. Design and Analysis of Algorithms, S. Sridhar, Oxford (Higher Education)

**Web links and Video Lectures (e-Resources):**

- Design and Analysis of Algorithms: <https://nptel.ac.in/courses/106/101/106101060/>

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

- Promote real-world problem-solving and competitive problem solving through group discussions to engage students actively in the learning process.
- Encourage students to enhance their problem-solving skills by implementing algorithms and solutions through programming exercises, fostering practical application of theoretical concepts.

## Assessment Methods -

1. Problem Solving Assignments (Hacker Rank/ Hacker Earth / Leadcode)
2. Gate Based Aptitude Test

<b>ARTIFICIAL INTELLIGENCE</b>		Semester	IV
Course Code	BAD402	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	3:0:2:0	SEE Marks	50
Total Hours of Pedagogy	40 hours Theory + 8-10 Lab slots	Total Marks	100
Credits	04	Exam Hours	
Examination nature (SEE)	Theory/		
<p><b>Course objectives:</b></p> <ul style="list-style-type: none"> <li>● Gain a historical perspective of AI and its foundations.</li> <li>● Become familiar with basic principles of AI toward problem solving</li> <li>● Get to know approaches of inference, perception, knowledge representation, and learning</li> </ul>			
<p><b>Teaching-Learning Process (General Instructions)</b>  These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer methods (L) need not to be only traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Demonstrate ways to solve the same problem and encourage the students to come up with their own creative solutions.</li> <li>8. Discuss application of every concept to solve the real world problems.</li> </ol>			
<b>MODULE-1</b>			
<p><b>Introduction:</b> What is AI? Foundations and History of AI    <b>Intelligent Agents:</b> Agents and environment, Concept of Rationality, The nature of environment, The structure of agents.  <b>Text book 1:</b> Chapter 1- 1.1, 1.2, 1.3 Chapter 2- 2.1, 2.2, 2.3, 2.4</p>			
<b>MODULE-2</b>			
<p><b>Problem-solving:</b> Problem-solving agents, Example problems, Searching for Solutions  Uninformed Search Strategies: Breadth First search, Depth First Search, Iterative deepening depth first search;</p> <p><b>Text book 1:</b> Chapter 3- 3.1, 3.2, 3.3, 3.4</p>			
<b>MODULE-3</b>			

**Informed Search Strategies:** Heuristic functions, Greedy best first search, A\*search. Heuristic Functions  
**Logical Agents:** Knowledge-based agents, The Wumpus world, Logic, Propositional logic, Reasoning patterns in Propositional Logic

**Text book 1:** Chapter 3-3.5,3.6  
 Chapter 4 – 4.1, 4.2 Chapter 7- 7.1, 7.2, 7.3, 7.4, 7.5

**MODULE-4**

**First Order Logic:** Representation Revisited, Syntax and Semantics of First Order logic, Using First Order logic. **Inference in First Order Logic :**Propositional Versus First Order Inference, Unification, Forward Chaining, Backward Chaining, Resolution

Text book 1: Chapter 8- 8.1, 8.2, 8.3 Chapter 9- 9.1, 9.2, 9.3, 9.4, 9.5

**MODULE-5**

**Uncertain Knowledge and Reasoning: Quantifying Uncertainty:** Acting under Uncertainty, Basic Probability Notation, Inference using Full Joint Distributions, Independence, Baye’s Rule and its use. Wumpus World Revisited

**Expert Systems:** Representing and using domain knowledge, ES shells. Explanation, knowledge acquisition

Text Book 1: Chapter 13-13.1, 13.2, 13.3, 13.4, 13.5, 13.6

Text Book 2: Chapter 20

**PRACTICAL COMPONENT OF IPCC***(May cover all / major modules)*

*NOTE: Programs need to be implemented in python*

Sl.N O	Experiments
1	Implement and Demonstrate Depth First Search Algorithm on Water Jug Problem
2	Implement and Demonstrate Best First Search Algorithm on Missionaries-Cannibals Problems using Python
3	Implement A* Search algorithm
4	Implement AO* Search algorithm
5	Solve 8-Queens Problem with suitable assumptions
6	Implementation of TSP using heuristic approach
7	Implementation of the problem solving strategies: either using Forward Chaining or Backward Chaining
8	Implement resolution principle on FOPL related problems
9	Implement Tic-Tac-Toe game using Python

10	Build a bot which provides all the information related to text in search box
11	Implement any Game and demonstrate the Game playing strategies

**Course outcomes (Course Skill Set):**

At the end of the course, the student will be able to:

- CO1: Apply knowledge of agent architecture, searching and reasoning techniques for different applications.
- CO 2. Compare various Searching and Inferencing Techniques.
- CO 3. Develop knowledge base sentences using propositional logic and first order logic
- CO 4. Describe the concepts of quantifying uncertainty.
- CO5: Use the concepts of Expert Systems to build applications.

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

**CIE for the theory component of the IPCC (maximum marks 50)**

- IPCC means practical portion integrated with the theory of the course.
- CIE marks for the theory component are **25 marks** and that for the practical component is **25 marks**.
- 25 marks for the theory component are split into **15 marks** for two Internal Assessment Tests (Two Tests, each of 15 Marks with 01-hour duration, are to be conducted) and **10 marks** for other assessment methods mentioned in 22OB4.2. The first test at the end of 40-50% coverage of the syllabus and the second test after covering 85-90% of the syllabus.
- Scaled-down marks of the sum of two tests and other assessment methods will be CIE marks for the theory component of IPCC (that is for **25 marks**).
- The student has to secure 40% of 25 marks to qualify in the CIE of the theory component of IPCC.

**CIE for the practical component of the IPCC**

- **15 marks** for the conduction of the experiment and preparation of laboratory record, and **10 marks** for the test to be conducted after the completion of all the laboratory sessions.
- On completion of every experiment/program in the laboratory, the students shall be evaluated including viva-voce and marks shall be awarded on the same day.
- The CIE marks awarded in the case of the Practical component shall be based on the continuous evaluation of the laboratory report. Each experiment report can be evaluated for 10 marks. Marks of all experiments' write-ups are added and scaled down to **15 marks**.
- The laboratory test (**duration 02/03 hours**) after completion of all the experiments shall be conducted for 50 marks and scaled down to **10 marks**.
- Scaled-down marks of write-up evaluations and tests added will be CIE marks for the laboratory component of IPCC for **25 marks**.

- The student has to secure 40% of 25 marks to qualify in the CIE of the practical component of the IPCC.

### **SEE for IPCC**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored by the student shall be proportionally scaled down to 50 Marks

**The theory portion of the IPCC shall be for both CIE and SEE, whereas the practical portion will have a CIE component only. Questions mentioned in the SEE paper may include questions from the practical component.**

### **Suggested Learning Resources:**

#### **Text Books**

1. Stuart J. Russell and Peter Norvig, Artificial Intelligence, 3rd Edition, Pearson, 2015
2. Elaine Rich, Kevin Knight, Artificial Intelligence, 3rd edition, Tata McGraw Hill, 2013

#### **Reference:**

1. George F Luger, Artificial Intelligence Structure and strategies for complex, Pearson Education, 5th Edition, 2011
2. Nils J. Nilsson, Principles of Artificial Intelligence, Elsevier, 1980
3. Saroj Kaushik, Artificial Intelligence, Cengage learning, 2014

#### **Web links and Video Lectures (e-Resources)**

1. <https://www.kdnuggets.com/2019/11/10-free-must-read-books-ai.html>
2. <https://www.udacity.com/course/knowledge-based-ai-cognitive-systems--ud409>
3. <https://nptel.ac.in/courses/106/105/106105077/>

#### **Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

1. Group discussion on Real world examples
2. Project based learning
3. Simple strategies on gaming, reasoning and uncertainty etc

DATABASE MANAGEMENT SYSTEM		Semester	4

Find the Minimum age from employeetable.</li> <li>5. Find salaries of employee in Ascending Order.</li> <li>6. Find grouped salaries of employees.</li> </ol>
4	<p>Create a row level trigger for the customers table that would fire for INSERT or UPDATE or DELETE operations performed on the CUSTOMERS table. This trigger will display the salary difference between the old &amp; new Salary.</p> <p><b>CUSTOMERS(ID,NAME,AGE,ADDRESS,SALARY)</b></p>
5	<p>Create cursor for Employee table &amp; extract the values from the table. Declare the variables ,Open the cursor &amp; extrct the values from the cursor. Close the cursor.</p> <p><b>Employee(E_id, E_name, Age, Salary)</b></p>
6	<p>Write a PL/SQL block of code using parameterized Cursor, that will merge the data available in the newly created table N_RollCall with the data available in the table O_RollCall. If the data in the first table already exist in the second table then that data should be skipped.</p>
7	<p>Install an Open Source NoSQL Data base MangoDB &amp; perform basic CRUD(Create, Read, Update &amp; Delete) operations. Execute MangoDB basic Queries using CRUD operations.</p>
<p><b>Course outcomes (Course Skill Set):</b>            At the end of the course, the student will be able to:</p> <ul style="list-style-type: none"> <li>● Describe the basic elements of a relational database management system</li> <li>● Design entity relationship for the given scenario.</li> <li>● Apply various Structured Query Language (SQL) statements for database manipulation.</li> <li>● Analyse various normalization forms for the given application.</li> <li>● Develop database applications for the given real world problem.</li> <li>● Understand the concepts related to NoSQL databases.</li> </ul>	
<p><b>Assessment Details (both CIE and SEE)</b>            The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum</p>	

passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

**CIE for the theory component of the IPCC (maximum marks 50)**

- IPCC means practical portion integrated with the theory of the course.
- CIE marks for the theory component are **25 marks** and that for the practical component is **25 marks**.
- 25 marks for the theory component are split into **15 marks** for two Internal Assessment Tests (Two Tests, each of 15 Marks with 01-hour duration, are to be conducted) and **10 marks** for other assessment methods mentioned in 22OB4.2. The first test at the end of 40-50% coverage of the syllabus and the second test after covering 85-90% of the syllabus.
- Scaled-down marks of the sum of two tests and other assessment methods will be CIE marks for the theory component of IPCC (that is for **25 marks**).
- The student has to secure 40% of 25 marks to qualify in the CIE of the theory component of IPCC.

**CIE for the practical component of the IPCC**

- **15 marks** for the conduction of the experiment and preparation of laboratory record, and **10 marks** for the test to be conducted after the completion of all the laboratory sessions.
- On completion of every experiment/program in the laboratory, the students shall be evaluated including viva-voce and marks shall be awarded on the same day.
- The CIE marks awarded in the case of the Practical component shall be based on the continuous evaluation of the laboratory report. Each experiment report can be evaluated for 10 marks. Marks of all experiments' write-ups are added and scaled down to **15 marks**.
- The laboratory test (**duration 02/03 hours**) after completion of all the experiments shall be conducted for 50 marks and scaled down to **10 marks**.
- Scaled-down marks of write-up evaluations and tests added will be CIE marks for the laboratory component of IPCC for **25 marks**.
- The student has to secure 40% of 25 marks to qualify in the CIE of the practical component of the IPCC.

**SEE for IPCC**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored by the student shall be proportionally scaled down to 50 Marks

**The theory portion of the IPCC shall be for both CIE and SEE, whereas the practical portion will have a CIE component only. Questions mentioned in the SEE paper may include questions from the practical component.**

**Suggested Learning Resources:**

**Text Books:**

1. Fundamentals of Database Systems, Ramez Elmasri and Shamkant B. Navathe, 7th Edition, 2017, Pearson.
2. Database management systems, Ramakrishnan, and Gehrke, 3rd Edition, 2014, McGraw Hill

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

**Mini Project:**

- Project Based Learning

<b>Analysis &amp; Design of Algorithms Lab</b>		Semester	4
Course Code	<b>BCSL404</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	0:0:2:0	SEE Marks	50
Credits	01	Exam Hours	2
Examination type (SEE)	Practical		
<b>Course objectives:</b>			
<ul style="list-style-type: none"> <li>To design and implement various algorithms in C/C++ programming using suitable development tools to address different computational challenges.</li> <li>To apply diverse design strategies for effective problem-solving.</li> <li>To Measure and compare the performance of different algorithms to determine their efficiency and suitability for specific tasks.</li> </ul>			
Sl.No	Experiments		
1	Design and implement C/C++ Program to find Minimum Cost Spanning Tree of a given connected undirected graph using Kruskal's algorithm.		
2	Design and implement C/C++ Program to find Minimum Cost Spanning Tree of a given connected undirected graph using Prim's algorithm.		
3	a. Design and implement C/C++ Program to solve All-Pairs Shortest Paths problem using Floyd's algorithm. b. Design and implement C/C++ Program to find the transitive closure using Warshal's algorithm.		
4	Design and implement C/C++ Program to find shortest paths from a given vertex in a weighted connected graph to other vertices using Dijkstra's algorithm.		
5	Design and implement C/C++ Program to obtain the Topological ordering of vertices in a given digraph.		
6	Design and implement C/C++ Program to solve 0/1 Knapsack problem using Dynamic Programming method.		
7	Design and implement C/C++ Program to solve discrete Knapsack and continuous Knapsack problems using greedy approximation method.		
8	Design and implement C/C++ Program to find a subset of a given set $S = \{s_1, s_2, \dots, s_n\}$ of $n$ positive integers whose sum is equal to a given positive integer $d$ .		
9	Design and implement C/C++ Program to sort a given set of $n$ integer elements using Selection Sort method and compute its time complexity. Run the program for varied values of $n > 5000$ and record the time taken to sort. Plot a graph of the time taken versus $n$ . The elements can be read from a file or can be generated using the random number generator.		
10	Design and implement C/C++ Program to sort a given set of $n$ integer elements using Quick Sort method and compute its time complexity. Run the program for varied values of $n > 5000$ and record the time taken to sort. Plot a graph of the time taken versus $n$ . The elements can be read from a file or can be generated using the random number generator.		
11	Design and implement C/C++ Program to sort a given set of $n$ integer elements using Merge Sort method and compute its time complexity. Run the program for varied values of $n > 5000$ , and record the time taken to sort. Plot a graph of the time taken versus $n$ . The elements can be read from a file or can be generated using the random number generator.		
12	Design and implement C/C++ Program for N Queen's problem using Backtracking.		

**Course outcomes (Course Skill Set):**

At the end of the course the student will be able to:

1. Develop programs to solve computational problems using suitable algorithm design strategy.
2. Compare algorithm design strategies by developing equivalent programs and observing running times for analysis (Empirical).
3. Make use of suitable integrated development tools to develop programs
4. Choose appropriate algorithm design techniques to develop solution to the computational and complex problems.
5. Demonstrate and present the development of program, its execution and running time(s) and record the results/inferences.

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together

**Continuous Internal Evaluation (CIE):**

CIE marks for the practical course are **50 Marks**.

The split-up of CIE marks for record/ journal and test are in the ratio **60:40**.

- Each experiment is to be evaluated for conduction with an observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments are designed by the faculty who is handling the laboratory session and are made known to students at the beginning of the practical session.
- Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks.
- Total marks scored by the students are scaled down to **30 marks** (60% of maximum marks).
- Weightage to be given for neatness and submission of record/write-up on time.
- Department shall conduct a test of 100 marks after the completion of all the experiments listed in the syllabus.
- In a test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce.
- The suitable rubrics can be designed to evaluate each student's performance and learning ability.
- The marks scored shall be scaled down to **20 marks** (40% of the maximum marks).

The Sum of scaled-down marks scored in the report write-up/journal and marks of a test is the total CIE marks scored by the student.

**Semester End Evaluation (SEE):**

- SEE marks for the practical course are 50 Marks.

- SEE shall be conducted jointly by the two examiners of the same institute, examiners are appointed by the Head of the Institute.
  - The examination schedule and names of examiners are informed to the university before the conduction of the examination. These practical examinations are to be conducted between the schedule mentioned in the academic calendar of the University.
  - All laboratory experiments are to be included for practical examination.
  - (Rubrics) Breakup of marks and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners. **OR** based on the course requirement evaluation rubrics shall be decided jointly by examiners.
  - Students can pick one question (experiment) from the questions lot prepared by the examiners jointly.
  - Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners.
  - General rubrics suggested for SEE are mentioned here, writeup-20%, Conduction procedure and result in -60%, Viva-voce 20% of maximum marks. SEE for practical shall be evaluated for 100 marks and scored marks shall be scaled down to 50 marks (however, based on course type, rubrics shall be decided by the examiners)
  - Change of experiment is allowed only once and 15% of Marks allotted to the procedure part are to be made zero.
- The minimum duration of SEE is 02 hours

**Suggested Learning Resources:**

<b>DISCRETE MATHEMATICAL STRUCTURES</b>		Semester	IV
Course Code	<b>BCS405A</b>	CIE Marks	50
Teaching Hours/Week (L:T:P:S)	2:2:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
Examination type (SEE)	Theory		
<p><b>Course objectives:</b></p> <ol style="list-style-type: none"> <li>To help students to understand discrete and continuous mathematical structures.</li> <li>To impart basics of relations and functions.</li> <li>To facilitate students in applying principles of Recurrence Relations to find the generating functions and solve the Recurrence relations.</li> <li>To have the knowledge of groups and their properties to understand the importance of algebraic properties relative to various number systems.</li> </ol>			
<p><b>Teaching-Learning Process</b>  <b>Pedagogy (General Instructions):</b>  These are sample Strategies, teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>In addition to the traditional lecture method, different types of innovative teaching methods may be adopted so that the delivered lessons shall develop students' theoretical and applied Mathematical skills.</li> <li>State the need for Mathematics with Engineering Studies and Provide real-life examples.</li> <li>Support and guide the students for self-study.</li> <li>You will assign homework, grading assignments and quizzes, and documenting students' progress.</li> <li>Encourage the students to group learning to improve their creative and analytical skills.</li> <li>Show short related video lectures in the following ways: <ul style="list-style-type: none"> <li>As an introduction to new topics (pre-lecture activity).</li> <li>As a revision of topics (post-lecture activity).</li> <li>As additional examples (post-lecture activity).</li> <li>As an additional material of challenging topics (pre-and post-lecture activity).</li> <li>As a model solution for some exercises (post-lecture activity).</li> </ul> </li> </ol>			
<b>Module-1: Fundamentals of Logic</b>			
Basic Connectives and Truth Tables, Logic Equivalence – The Laws of Logic, Logical Implication – Rules of Inference. The Use of Quantifiers, Quantifiers, Definitions and the Proofs of Theorems. <p style="text-align: right;"><b>(8 hours)</b></p> <b>(RBT Levels: L1, L2 and L3)</b>			
<b>Module-2: Properties of the Integers</b>			
Mathematical Induction, The Well Ordering Principle – Mathematical Induction, Recursive Definitions. <b>Fundamental Principles of Counting:</b> The Rules of Sum and Product, Permutations, Combinations – The Binomial Theorem, Combinations with Repetition. <p style="text-align: right;"><b>(8 Hours)</b></p> <b>(RBT Levels: L1, L2 and L3)</b>			
<b>Module-3: Relations and Functions</b>			
Cartesian Products and Relations, Functions – Plain and One-to-One, Onto Functions. The Pigeon-hole Principle, Function Composition and Inverse Functions. <b>Properties of Relations,</b> Computer Recognition – Zero-One Matrices and Directed Graphs, Partial Orders – Hasse Diagrams, Equivalence Relations and Partitions. <p style="text-align: right;"><b>(8 hours)</b></p> <b>(RBT Levels: L1, L2 and L3)</b>			
<b>Module-4: The Principle of Inclusion and Exclusion</b>			

The Principle of Inclusion and Exclusion, Generalizations of the Principle, Derangements – Nothing is in its Right Place, Rook Polynomials.

**Recurrence Relations:** First Order Linear Recurrence Relation, The Second Order Linear Homogeneous Recurrence Relation with Constant Coefficients. **(8 Hours)**

**(RBT Levels: L1, L2 and L3)**

### **Module-5: Introduction to Groups Theory**

Definitions and Examples of Particular Groups Klein 4-group, Additive group of Integers modulo  $n$ , Multiplicative group of Integers modulo- $p$  and permutation groups, Properties of groups, Subgroups, cyclic groups, Cosets, Lagrange's Theorem. **(8 Hours)**

**(RBT Levels: L1, L2 and L3)**

### **Course outcome (Course Skill Set)**

At the end of the course, the student will be able to:

1. Apply concepts of logical reasoning and mathematical proof techniques in proving theorems and statements.
2. Demonstrate the application of discrete structures in different fields of computer science.
3. Apply the basic concepts of relations, functions and partially ordered sets for computer representations.
4. Solve problems involving recurrence relations and generating functions.
5. Illustrate the fundamental principles of Algebraic structures with the problems related to computer science & engineering.

### **Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE, the minimum passing mark is 35% of the maximum marks (18 out of 50 marks). The student is declared as a pass in the course if he/she secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

### **Continuous Internal Evaluation:**

- There are 25 marks for the CIE's Assignment component and 25 for the Internal Assessment Test component.
- Each test shall be conducted for 25 marks. The first test will be administered after 40-50% of the coverage of the syllabus, and the second test will be administered after 85-90% of the coverage of the syllabus. The average of the two tests shall be scaled down to 25 marks
- Any two assignment methods mentioned in the 22OB2.4, if an assignment is project-based then only one assignment for the course shall be planned. The schedule for assignments shall be planned properly by the course teacher. The teacher should not conduct two assignments at the end of the semester if two assignments are planned. Each assignment shall be conducted for 25 marks. (If two assignments are conducted then the sum of the two assignments shall be scaled down to 25 marks)

The final CIE marks of the course out of 50 will be the sum of the scale-down marks of tests and assignment/s marks.

**The Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester-End Examination:**

Theory SEE will be conducted by the University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**).

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.

Marks scored shall be proportionally reduced to 50 marks

**Suggested Learning Resources:**

**Books (Name of the author/Title of the Book/Name of the publisher/Edition and Year)**

**Text Books:**

1. **Ralph P. Grimaldi, B V Ramana: "Discrete Mathematical Structures an Applied Introduction"**, 5<sup>th</sup> Edition, Pearson Education, 2004.
2. **Ralph P. Grimaldi: "Discrete and Combinatorial Mathematics"**, 5th Edition, Pearson Education. 2004.

You will assign homework, grading assignments and quizzes, and documenting students' progress.</li> <li>5. Encourage the students to group learning to improve their creative and analytical skills.</li> <li>6. Show short related video lectures in the following ways:               <ul style="list-style-type: none"> <li>• As an introduction to new topics (pre-lecture activity).</li> <li>• As a revision of topics (post-lecture activity).</li> <li>• As additional examples (post-lecture activity).</li> <li>• As an additional material of challenging topics (pre-and post-lecture activity).</li> <li>• As a model solution for some exercises (post-lecture activity).</li> </ul> </li> </ol>			
<b>Module-1: Theory of Sets</b>			
Finite and infinite sets, countable and uncountable sets, cardinality of sets, Schroder-Bernstein theorem, cantor's theorem, Order relation in cardinal numbers, Arithmetic of cardinal numbers, Partially ordered set, Zorn's lemma and axioms of choice, various set-theoretic paradoxes.			
<b>(8 hours)</b>			
<b>(RBT Levels: L1, L2 and L3)</b>			
<b>Teaching-Learning Process</b>	Chalk and talk method / PowerPoint Presentation		
<b>Module-2: Concepts in Metric Spaces</b>			
Definition and examples of metric spaces, Open spheres and Closed spheres, Neighborhoods, Open sets, Interior, Exterior and boundary points, Closed sets, Limit points and isolated points, Interior and closure of a set, Boundary of a set, Bounded sets, Distance between two sets, Diameter of a set.			
<b>(8 hours)</b>			
<b>(RBT Levels: L1, L2 and L3)</b>			
<b>Teaching-Learning Process</b>	Chalk and talk method / PowerPoint Presentation		
<b>Module-3: Complete Metric Spaces and Continuous Functions</b>			

<p>Cauchy and Convergent sequences, Completeness of metric spaces, Cantor's intersection theorem, Dense sets and separable spaces, Nowhere dense sets and Baire's category theorem, continuous and uniformly continuous functions, Homeomorphism. Banach contraction principle. <b>(8 hours)</b></p> <p><b>(RBT Levels: L1, L2 and L3)</b></p>	
<b>Teaching-Learning Process</b>	Chalk and talk method / PowerPoint Presentation
<b>Module-4: Compactness</b>	
<p>Compact spaces, Sequential compactness, Bolzano-Weierstrass property, Compactness and finite intersection property, Heine-Borel theorem, Totally bounded set, equivalence of compactness and sequential compactness. <b>(8 hours)</b></p> <p><b>(RBT Levels: L1, L2 and L3)</b></p>	
<b>Module-5: Connectedness</b>	
<p>Separated sets, Disconnected and connected sets, components, connected subsets of R, Continuous functions on connected sets. Local connectedness and arc-wise connectedness. <b>(8 hours)</b></p> <p><b>(RBT Levels: L1, L2 and L3)</b></p>	
<b>Teaching-Learning Process</b>	Chalk and talk method / PowerPoint Presentation
<p><b>Course outcome (Course Skill Set)</b></p> <p>At the end of the course, the student will be able to:</p> <ol style="list-style-type: none"> <li>1. Explain basic facts about the cardinality of a set and various set-theoretic paradoxes.</li> <li>2. Apply the concepts of open and closed spheres and bounded sets to solve problems.</li> <li>3. Demonstrate standard concepts of metric spaces and their properties.</li> <li>4. Identify the continuity of a function defined on metric spaces and homomorphism.</li> </ol>	
<p><b>Assessment Details (both CIE and SEE)</b></p> <p>The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE, the minimum passing mark is 35% of the maximum marks (18 out of 50 marks). The average of the two tests shall be scaled down to 25 marks</li> </ul>	

- Any two assignment methods mentioned in the 22OB2.4, if an assignment is project-based then only one assignment for the course shall be planned. The schedule for assignments shall be planned properly by the course teacher. The teacher should not conduct two assignments at the end of the semester if two assignments are planned. Each assignment shall be conducted for 25 marks. (If two assignments are conducted then the sum of the two assignments shall be scaled down to 25 marks)
- The final CIE marks of the course out of 50 will be the sum of the scale-down marks of tests and assignment/s marks.

**Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester-End Examination:**

Theory SEE will be conducted by the University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**).

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.

Marks scored shall be proportionally reduced to 50 marks

**Suggested Learning Resources:**

**Books (Name of the author/Title of the Book/Name of the publisher/Edition and Year)**

**Text Books:**

1. **Martin Osborne: "An Introduction to Game Theory"**, Oxford University Press, First Indian Edition, 2009, 7<sup>th</sup> impression, ISBN – 0195128958.

**Reference Books:**

1. **Roger B. Myerson: "Analysis of Conflict Game Theory"**, Re-print Edition, Harvard University Press, 2008, ISBN – 978-0674341166.
2. **Frederick S. Hillier and Gerald J. Lieberman: "Introduction to Operations Research, Concepts and Cases"**, 9<sup>th</sup> Edition; Tata McGraw Hill, 2010, ISBN – 0073376299.
3. **Joel Watson: "An Introduction to Game Theory" Strategy**, 2<sup>nd</sup> Edition, W.W. Norton & Company, 2007, ISBN – 9780393929348.

**Activity-Based Learning (Suggested Activities in Class)/Practical-Based Learning**

- Quizzes
- Assignments
- Seminar

<b>Scala</b>		Semester	4
Course Code	<b>BDSL456A</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	0:0:2:0	SEE Marks	50
Credits	01	Exam Hours	02
Examination type (SEE)	Practical		
<b>Course objectives:</b>			
<ul style="list-style-type: none"> <li>• Model data using algebraic data types, represented in Scala as families of sealed traits and case classes.</li> <li>• Use structural recursion and pattern matching to traverse and transform data.</li> <li>• Learn programming with the common data structures of Scala</li> <li>• Learn object-oriented programming in Scala</li> </ul>			
<b>Sl.NO</b>	<b>Experiments</b>		
1	a. Write a Scala program to compute the sum of the two given integer values. If the two values are the same, then return triples their sum. b. Write a Scala program to check two given integers, and return true if one of them is 22 or if their sum is 32.		
2	a. Write a Scala program to remove the character in a given position of a given string. The given position will be in the range 0...string length -1 inclusive. b. Write a Scala program to create a new string taking the first 5 characters of a given string and return the string with the 5 characters added at both the front and back.		
3	a. Write a Scala program to print the multiplication table of a given number using a for loop. b. Write a Scala program to find the largest element in an array using pattern matching		
4	a. Write a Scala function to calculate the product of digits in a given number b. Write a Scala function to check if a given number is a perfect square		
5	a. Write a Scala program that creates a subclass Student that extends the Person class. Add a property called grade and implement methods to get and set it. b. Write a Scala program that creates a class Triangle with properties side1, side2, and side3. Implement a method isEquilateral to check if the triangle is equilateral.		
6	a. Write a Scala program that creates an enum class Color with values for different colors. Use the enum class to represent an object's color. b. Write a Scala program that creates a class ContactInfo with properties name, email, and address. Create a class Customer that includes a ContactInfo object.		
7	a. Write a Scala program to create a set and find the difference and intersection between two sets. b. Write a Scala program to create a set and find the second largest element in the set.		
8	a. Write a Scala program to create a list in different ways. Note: Use Lisp style, Java style, Range list, Uniform list, Tabulate list b. Write a Scala program to flatten a given List of Lists, nested list structure.		
9	a. Write a Scala program to add each element n times to a given list of integers. b. Write a Scala program to split a given list into two lists.		
10	a. Write a Scala program to swap the elements of a tuple Further print no swapping required if elements are same. b. Write a Scala program to find non-unique elements in a tuple		
<b>Course outcomes (Course Skill Set):</b>			
At the end of the course the student will be able to:			
<ul style="list-style-type: none"> <li>• Get familiar with the Scala syntax and object-oriented principles</li> <li>• Learn advanced concepts - loops, expressions, inheritance, pattern matching</li> <li>• Learn to write clean and functional Scala codes and test it</li> <li>• Learn functional programming using Scala</li> </ul>			

### **Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together

#### **Continuous Internal Evaluation (CIE):**

CIE marks for the practical course are **50 Marks**.

The split-up of CIE marks for record/ journal and test are in the ratio **60:40**.

- Each experiment is to be evaluated for conduction with an observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments are designed by the faculty who is handling the laboratory session and are made known to students at the beginning of the practical session.
- Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks.
- Total marks scored by the students are scaled down to **30 marks** (60% of maximum marks).
- Weightage to be given for neatness and submission of record/write-up on time.
- Department shall conduct a test of 100 marks after the completion of all the experiments listed in the syllabus.
- In a test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce.
- The suitable rubrics can be designed to evaluate each student's performance and learning ability.
- The marks scored shall be scaled down to **20 marks** (40% of the maximum marks).

The Sum of scaled-down marks scored in the report write-up/journal and marks of a test is the total CIE marks scored by the student.

#### **Semester End Evaluation (SEE):**

- SEE marks for the practical course are 50 Marks.
- SEE shall be conducted jointly by the two examiners of the same institute, examiners are appointed by the Head of the Institute.
- The examination schedule and names of examiners are informed to the university before the conduction of the examination. These practical examinations are to be conducted between the schedule mentioned in the academic calendar of the University.
- All laboratory experiments are to be included for practical examination.
- (Rubrics) Breakup of marks and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners. **OR** based on the course requirement evaluation rubrics shall be decided jointly by examiners.
- Students can pick one question (experiment) from the questions lot prepared by the examiners

jointly.

- Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners.

• General rubrics suggested for SEE are mentioned here, writeup-20%, Conduction procedure and result in -60%, Viva-voce 20% of maximum marks. SEE for practical shall be evaluated for 100 marks and scored marks shall be scaled down to 50 marks (however, based on course type, rubrics shall be decided by the examiners)

• Change of experiment is allowed only once and 15% of Marks allotted to the procedure part are to be made zero.

The minimum duration of SEE is 02 hours

#### **Suggested Learning Resources:**

- Programming Scala, Third Edition, O'Reilly Media.
- Paul Chiusano, Rúnar Bjarnason, Functional Programming in Scala 1st Edition, Manning Publications

<b>MongoDB</b>		Semester	4
Course Code	<b>BDSL456B</b>	CIE Marks	50
Teaching Hours/Week (L: T:P: S)	0:0:2:0	SEE Marks	50
Total Hours of Pedagogy	24	Total Marks	100
Credits	01		
<b>Course objectives:</b>			
<ul style="list-style-type: none"> <li>● Understand basic MongoDB functions, operators and types of operations in MongoDB.</li> <li>● Demonstrate the use of Indexing, Advanced Indexing in MongoDB.</li> <li>● Apply the aggregation and Map Reduction in MongoDB.</li> <li>● Demonstrate text searching on collections in MongoDB.</li> </ul>			
Sl.NO	Experiments		
1	a. Illustration of Where Clause, AND,OR operations in MongoDB. b. Execute the Commands of MongoDB and operations in MongoDB : Insert, Query, Update, Delete and Projection. (Note: use any collection) [Refer: Book 1 chapter 4].		
2	a. Develop a MongoDB query to select certain fields and ignore some fields of the documents from any collection. b. Develop a MongoDB query to display the first 5 documents from the results obtained in a. [use of limit and find] [Refe: Book1 Chapter 4, book 2: chapter 5]		
3	a. Execute query selectors (comparison selectors, logical selectors ) and list out the results on any collection b. Execute query selectors (Geospatial selectors, Bitwise selectors ) and list out the results on any collection [Refer: Book 3 Chapter 13]		
4	Create and demonstrate how projection operators (\$, \$elematch and \$slice) would be used in the MondoDB. [Refer: Book 3 Chapter 14]		
5	Execute Aggregation operations (\$avg, \$min,\$max, \$push, \$addToSet etc.). students encourage to execute several queries to demonstrate various aggregation operators) [Refer: Book 3 Chapter 15]		
6	Execute Aggregation Pipeline and its operations (pipeline must contain \$match, \$group, \$sort, \$project, \$skip etc. students encourage to execute several queries to demonstrate various aggregation operators) [refer book 2: chapter 6 ]		
7	a. Find all listings with listing_url, name, address, host_picture_url in the listings And Reviews collection that have a host with a picture url b. Using E-commerce collection write a query to display reviews summary. [refer Book2: chapter 6]		
8	a. Demonstrate creation of different types of indexes on collection (unique, sparse, compound and multikey indexes) b. Demonstrate optimization of queries using indexes. Refer: Book 2: Chapter 8 and Book 3: Chapter 12]		
9	a. Develop a query to demonstrate Text search using catalog data collection for a given word b. Develop queries to illustrate excluding documents with certain words and phrases Refer: Book 2: Chapter 9]		

10	<p>Develop an aggregation pipeline to illustrate Text search on Catalog data collection.</p> <p>Refer: Book 2 :Chapter 9]</p>
<p><b>Course outcomes (Course Skill Set):</b>                  At the end of the course the student will be able to:</p> <ol style="list-style-type: none"> <li>1. Make use of MangoDB commands and queries.</li> <li>2. Illustrate the role of aggregate pipelines to extract data.</li> <li>3. Demonstrate optimization of queries by creating indexes.</li> <li>4. Develop aggregate pipelines for text search in collections.</li> </ol>	
<p><b>Assessment Details (both CIE and SEE)</b></p> <p>The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. <b>MERN</b>		Semester	4
Course Code	<b>BDSL456C</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	0:0:2:0	SEE Marks	50
Credits	01	Exam Hours	02
Examination type (SEE)	Practical		
<b>Course objectives:</b>			
<ul style="list-style-type: none"> <li>Understand and apply critical web development languages and tools to create dynamic and responsive web applications.</li> <li>To build server-side applications using Node.js and Express</li> <li>Develop user interfaces with React.js,</li> <li>Manage data using MongoDB, and integrate these technologies to create full stack apps</li> <li>Understanding APIs and routing.</li> </ul>			
<b>Sl.NO</b>	<b>Experiments</b>		
1	Using MongoDB, create a collection called transactions in database usermanaged (drop if it already exists) and bulk load the data from a json file, transactions.json Upsert the record from the new file called transactions_upsert.json in Mongoddb.		
2	Query MongoDB with Conditions: [Create appropriate collection with necessary documents to answer the query] a. Find any record where Name is Somu b. Find any record where total payment amount (Payment.Total) is 600. c. Find any record where price (Transaction.price) is between 300 to 500. d. Calculate the total transaction amount by adding up Payment.Total in all records.		
3	a. Write a program to check request header for cookies. b. write node.js program to print the a car object properties, delete the second property and get length of the object.		
4	a. Read the data of a student containing usn, name, sem, year_of_admission from node js and store it in the mongodb b. For a partial name given in node js, search all the names from mongodb student documents created in Question(a)		
5	Implement all CRUD operations on a File System using Node JS		
6	Develop the application that sends fruit name and price data from client side to Node.js server using Ajax		
7	Develop an authentication mechanism with email_id and password using HTML and Express JS (POST method)		
8	Develop two routes: find_prime_100 and find_cube_100 which prints prime numbers less than 100 and cubes less than 100 using Express JS routing mechanism		
9	Develop a React code to build a simple search filter functionality to display a filtered list based on the search query entered by the user.		
10	Develop a React code to collect data from rest API.		
<b>Course outcomes (Course Skill Set):</b>			
At the end of the course the student will be able to:			
<ul style="list-style-type: none"> <li>Apply the fundamentals of MongoDB, such as data modelling, CRUD operations, and basic queries to solve given problem.</li> <li>Use constructs of Express.js, including routing, software and constructing RESTful APIs to solve real world problems.</li> <li>Develop scalable and efficient RESTful APIs using NodeJS.</li> <li>Develop applications using React, including components, state, props, and JSX syntax.</li> </ul>			

### **Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. Julia		Semester	4
Course Code	BDSL456D	CIE Marks	50
Teaching Hours/Week (L: T:P: S)	0:0:2:0	SEE Marks	50
Total Hours of Pedagogy	24	Total Marks	100
Credits	01		
<b>Course objectives:</b> <ul style="list-style-type: none"> <li>To introduce the basics of Julia programming language</li> <li>To illustrate the data structures of Julia programming language</li> <li>To make use of built-in functions and packages</li> </ul>			
Sl.NO	Experiments		
1	a. Develop a Julia program to simulate a calculator (for integer and real numbers). b. Develop a Julia program to add, subtract, multiply and divide complex numbers. c. Develop a Julia program to evaluate expressions having mixed data types (integer, real, floating-point number and complex). <a href="#">[Refer Book 2: Chapter 3, 4]</a>		
2	a. Develop a Julia program for the following problem: A computer repair shop charges \$100 per hour for labour plus the cost of any parts used in the repair. However, the minimum charge for any job is \$150. Prompt for the number of hours worked and the cost of parts (which could be \$0) and print the charge for the job. b. Develop a Julia program to calculate a person's regular pay, overtime pay and gross pay based on the following: If hours worked is less than or equal to 40, regular pay is calculated by multiplying hours worked by rate of pay, and overtime pay is 0. If hours worked is greater than 40, regular pay is calculated by multiplying 40 by the rate of pay, and overtime pay is calculated by multiplying the hours in excess of 40 by the rate of pay by 1.5. Gross pay is calculated by adding regular pay and overtime pay. <a href="#">[Refer Book 1: Chapter 3]</a>		
3	a. An amount of money P (for principal) is put into an account which earns interest at r% per annum. So, at the end of one year, the amount becomes $P + P \times r/100$ . This becomes the principal for the next year. Develop a Julia program to print the amount at the end of each year for the next 10 years. However, if the amount ever exceeds 2P, stop any further printing. Your program should prompt for the values of P and r. b. Develop a Julia program which reads numbers from a file (input.txt) and finds the largest number, smallest number, count, sum and average of numbers. <a href="#">[Refer Book 1: Chapter 4]</a>		
4	a. Develop a Julia program and two separate functions to calculate GCD and LCM. b. Develop a Julia program and a recursive function to calculate factorial of a number. c. Develop a Julia program and a recursive function to generate Fibonacci series. <a href="#">[Refer Book 1: Chapter 5]</a>		
5	a. Develop a Julia program which reads a string (word) and prints whether the word is palindrome. b. Develop a Julia program which reads and prints the words present in a file (input.txt) having Random Data in which words are dispersed randomly (Assumption: a word is a contiguous sequence of letters. A word is delimited by any non-letter character or end-of-line). <a href="#">[Refer Book 1: Chapter 6]</a>		
6	a. Develop a Julia program to determine and print the frequency with which each letter of the alphabet is used in a given line of text. b. A survey of 10 pop artists is made. Each person votes for an artist by specifying the number of the artist (a value from 1 to 10). Develop a Julia program to read the names of the artists, followed by the votes, and find out which artist is the most popular. <a href="#">[Refer Book 1: Chapter 7]</a>		

7	<p>a. Given a line of text as input, develop a Julia program to determine the frequency with which each letter of the alphabet is used (make use of dictionary)</p> <p>b. Develop a Julia program to fetch words from a file with arbitrary punctuation and keep track of all the different words found (make use of set and ignore the case of the letters: e.g. to and To are treated as the same word).</p> <p><a href="#">[Refer Book 1: Chapter 10]</a></p>
8	<p>a. Develop a Julia program to evaluate expressions consisting of rational, irrational number and floating-point numbers)</p> <p>b. Develop a Julia program to determine the following properties of a matrix: determinant, inverse, rank, upper &amp; lower triangular matrix, diagonal elements, Euclidean norm and Square Root of a Matrix.</p> <p><a href="#">[Refer Book 2: Chapter 5, 8]</a></p>
9	<p>a. Develop a Julia program to determine addition and subtraction of two matrices (element-wise).</p> <p>b. Develop a Julia program to perform multiplication operation on matrices: scalar multiplication, element-wise multiplication, dot product, cross product.</p> <p><a href="#">[Refer Book 2: Chapter 8]</a></p>
10	<p>a. Develop a Julia program to generate a plot of (solid &amp; dotted) a function: <math>y=x^2</math> (use suitable data points for <math>x</math>).</p> <p>b. Develop a Julia program to generate a plot of mathematical equation: <math>y = \sin(x) + \sin(2x)</math>.</p> <p>c. Develop a Julia program to generate multiple plots of mathematical equations: <math>y = \sin(x) + \sin(2x)</math> and <math>y = \sin(2x) + \sin(3x)</math>.</p> <p><a href="#">[Refer Book 2: Chapter 13]</a></p>
<p><b>Course outcomes (Course Skill Set):</b>                  At the end of the course the student will be able to:</p> <ul style="list-style-type: none"> <li>● Apply concepts of data-types, selection and looping constructs of Julia programming language.</li> <li>● Demonstrate the use of strings, functions, arrays and matrix operations in solving problems.</li> <li>● Develop programs involving data structures to handle multi-valued data items.</li> <li>● Make use of packages to generate plots of mathematical functions and equations.</li> </ul>	

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. - Total marks scored by the students are scaled down to **30 marks** (60% of maximum marks).
- Weightage to be given for neatness and submission of record/write-up on time.
- Department shall conduct a test of 100 marks after the completion of all the experiments listed in the syllabus.
- In a test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce.
- The suitable rubrics can be designed to evaluate each student's performance and learning ability.
- The marks scored shall be scaled down to **20 marks** (40% of the maximum marks).

The Sum of scaled-down marks scored in the report write-up/journal and marks of a test is the total CIE marks scored by the student.

**Semester End Evaluation (SEE):**

- SEE marks for the practical course are 50 Marks.
- SEE shall be conducted jointly by the two examiners of the same institute, examiners are appointed by the Head of the Institute.
- The examination schedule and names of examiners are informed to the university before the conduction of the examination. These practical examinations are to be conducted between the schedule mentioned in the academic calendar of the University.
- All laboratory experiments are to be included for practical examination.
- (Rubrics) Breakup of marks and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners. **OR** based on the course requirement evaluation rubrics shall be decided jointly by examiners.
- Students can pick one question (experiment) from the questions lot prepared by the examiners jointly.
- Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners.

General rubrics suggested for SEE are mentioned here, writeup-20%, Conduction procedure and

result in -60%, Viva-voce 20% of maximum marks. SEE for practical shall be evaluated for 100 marks and scored marks shall be scaled down to 50 marks (however, based on course type, rubrics shall be decided by the examiners)

Change of experiment is allowed only once and 15% of Marks allotted to the procedure part are to be made zero.

The minimum duration of SEE is 02 hours

**Suggested Learning Resources:**

- **BOOK 1:** Julia – Bit by Bit (Programming for Beginners), by Noel Kalicharan, Springer: ISBN 978-3-030-73935-5, doi: <https://doi.org/10.1007/978-3-030-73936-2>, 2021.
- **BOOK 2:** Beginning Julia Programming (For Engineers and Scientists), by Sandeep Nagar, Apress-Springer: ISBN 978-1-4842-3170-8, doi: <https://doi.org/10.1007/978-1-4842-3171-5>, 2017.

<b>Software Engineering &amp; Project Management</b>		Semester	V
Course Code	<b>BCS501</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	4:0:0:0	SEE Marks	50
Total Hours of Pedagogy	52 hours	Total Marks	100
Credits	04	Exam Hours	03
Examination nature (SEE)	<b>Theory</b>		
<p><b>Course objectives:</b> This course will enable students to,</p> <ul style="list-style-type: none"> <li>• Outline software engineering principles and activities involved in building large software programs. Identify ethical and professional issues and explain why they are of concern to Software Engineers.</li> <li>• Describe the process of requirement gathering, requirement classification, requirement specification and requirements validation.</li> <li>• Recognize the importance of Project Management with its methods and methodologies.</li> <li>• Identify software quality parameters and quantify software using measurements and metrics. List software quality standards and outline the practices involved.</li> </ul>			
<p><b>Teaching-Learning Process (General Instructions)</b> These are sample Strategies; that teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) need not be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based-Learning (PBL), which fosters student's Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> </ol>			
<b>MODULE-1</b>		<b>10 hours</b>	
<p><b>Software and Software Engineering:</b> The nature of Software, The unique nature of WebApps, Software Engineering, The software Process, Software Engineering Practice, Software Myths. <b>Process Models:</b> A generic process model, Process assessment and improvement, Prescriptive process models: Waterfall model, Incremental process models, Evolutionary process models, Concurrent models, Specialized process models. Unified Process , Personal and Team process models</p> <p><b>Textbook 1: Chapter 1: 1.1 to 1.6, Chapter 2: 2.1 to 2.5</b></p>			
<b>MODULE-2</b>		<b>12 hours</b>	
<p><b>Understanding Requirements:</b> Requirements Engineering, Establishing the ground work, Eliciting Requirements, Developing use cases, Building the requirements model, Negotiating Requirements, Validating Requirements. <b>Requirements Modeling Scenarios, Information and Analysis classes:</b> Requirement Analysis, Scenario based modeling, UML models that supplement the Use Case, Data modeling Concepts, Class-Based Modeling. <b>Requirement Modeling Strategies :</b> Flow oriented Modeling , Behavioral Modeling. <b>Textbook 1: Chapter 5: 5.1 to 5.7, Chapter 6: 6.1 to 6.5, Chapter 7: 7.1 to 7.3</b></p>			
<b>MODULE-3</b>		<b>10 hours</b>	

**Agile Development:** What is Agility?, Agility and the cost of change. What is an agile Process?, Extreme Programming (XP), Other Agile Process Models, A tool set for Agile process .

**Principles that guide practice:** Software Engineering Knowledge, Core principles, Principles that guide each framework activity.

**Textbook 1: Chapter 3: 3.1 to 3.6, Chapter 4: 4.1 to 4.3**

#### MODULE-4

10 hours

**Introduction to Project Management:** Introduction, Project and Importance of Project Management, Contract Management, Activities Covered by Software Project Management, Plans, Methods and Methodologies, Some ways of categorizing Software Projects, Stakeholders, Setting Objectives, Business Case, Project Success and Failure, Management and Management Control, Project Management life cycle, Traditional versus Modern Project Management Practices.

**Project Evaluation:** Evaluation of Individual projects, Cost-benefit Evaluation Techniques, Risk Evaluation

**Textbook 2: Chapter 1: 1.1 to 1.17 , Chapter 2: 2.4 to 2.6**

#### MODULE-5

10 hours

**Software Quality:** Introduction, The place of software quality in project planning, Importance of software quality, Defining software quality, Software quality models, product versus process quality management.

**Software Project Estimation:** Observations on Estimation, Decomposition Techniques, Empirical Estimation Models.

**Textbook 2: Chapter 13: 13.1 to 13.5, 13.7, 13.8, Text Book 1: Chapter 26: 26.5 to 26.7**

#### Course Outcomes

At the end of the course, the student will be able to:

- **Differentiate** process models to judge which process model has to be adopted for the given scenarios.
- **Derive** both functional and nonfunctional requirements from the case study.
- **Analyze** the importance of various software testing methods and agile methodology.
- **Illustrate** the role of project planning and quality management in software development.
- **Identify** appropriate techniques to enhance software quality.

#### Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

#### Continuous Internal Evaluation:

- For the Assignment component of the CIE, there are 25 marks and for the Internal Assessment Test component, there are 25 marks.
- The first test will be administered after 40-50% of the syllabus has been covered, and the second test will be administered after 85-90% of the syllabus has been covered
- Any two assignment methods mentioned in the 22OB2.4, if an assignment is project-based then only one assignment for the course shall be planned. The teacher should not conduct two assignments at

the end of the semester if two assignments are planned.

- For the course, CIE marks will be based on a scaled-down sum of two tests and other methods of assessment.

**The Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester-End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**).

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.

Marks scored shall be proportionally reduced to 50 marks. .

**Suggested Learning Resources:**

**Textbooks**

1. Roger S. Pressman: Software Engineering-A Practitioners approach, 7th Edition, Tata McGraw Hill.
2. Bob Hughes, Mike Cotterell, Rajib Mall: Software Project Management, 6th Edition, McGraw Hill Education, 2018.

**Reference Book:**

3. Pankaj Jalote: An Integrated Approach to Software Engineering, Wiley India.
4. "Software Engineering: Principles and Practice", Hans van Vliet, Wiley India, 3rd Edition, 2010.

**Web links and Video Lectures (e-Resources):**

- [https://onlinecourses.nptel.ac.in/noc20\\_cs68/preview](https://onlinecourses.nptel.ac.in/noc20_cs68/preview)
- [https://onlinecourses.nptel.ac.in/noc24\\_mg01/preview](https://onlinecourses.nptel.ac.in/noc24_mg01/preview)

**Activity Based Learning (Suggested Activities in Class)/Practical-Based Learning**

- Demonstration of Agile tool: The students are expected to learn any of the popular agile tool. (10 marks)
- Field Survey (In Team): The students' team may of the size of 2 or 4. Students are expected to visit their library and understand the Library Automation Software. **OR** they have to understand the working of ERP or any inventory management, and then they have to prepare a report and then to be submitted to the concerned staff. Prepare a document/report which includes all the phases of SDLC and to be submitted accordingly (15 marks)

<b>COMPUTER NETWORKS</b>		Semester	V

<b>MODULE-5</b>			

Introduction to Application Layer: Introduction, Client-Server Programming, Standard Client-Server Protocols: World Wide Web and HTTP, FTP, Electronic Mail, Domain Name System (DNS), TELNET, Secure Shell (SSH)  
**Textbook:** Ch. 25.1-25.2, 26.1-26.6

### PRACTICAL COMPONENT OF IPCC

Sl.NO	Experiments
1	Implement three nodes point – to – point network with duplex links between them. Set the queue size, vary the bandwidth, and find the number of packets dropped.
2	Implement transmission of ping messages/trace route over a network topology consisting of 6 nodes and find the number of packets dropped due to congestion.
3	Implement an Ethernet LAN using n nodes and set multiple traffic nodes and plot congestion window for different source / destination.
4	Develop a program for error detecting code using CRC-CCITT (16- bits).
5	Develop a program to implement a sliding window protocol in the data link layer.
6	Develop a program to find the shortest path between vertices using the Bellman-Ford and path vector routing algorithm.
7	Using TCP/IP sockets, write a client – server program to make the client send the file name and to make the server send back the contents of the requested file if present.
8	Develop a program on a datagram socket for client/server to display the messages on client side, typed at the server side.
9	Develop a program for a simple RSA algorithm to encrypt and decrypt the data.
10	Develop a program for congestion control using a leaky bucket algorithm.

#### Course outcomes (Course Skill Set):

At the end of the course, the student will be able to:

- **Explain** the fundamentals of computer networks.
- **Apply** the concepts of computer networks to demonstrate the working of various layers and protocols in communication network.
- **Analyze** the principles of protocol layering in modern communication systems.
- **Demonstrate** various Routing protocols and their services using tools such as Cisco packet tracer.

**Note: For the Simulation experiments modify the topology and parameters set for the experiment and take multiple rounds of reading and analyze the results available in log files. Plot necessary graphs and conclude using NS2 or NS3. Installation procedure of the required software must be demonstrated, carried out in groups, and documented in the report. Non simulation programs can be implemented using Java.**

#### Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE

(Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

### **CIE for the theory component of the IPCC (maximum marks 50)**

- IPCC means practical portion integrated with the theory of the course.
- CIE marks for the theory component are **25 marks** and that for the practical component is **25 marks**.
- 25 marks for the theory component are split into **15 marks** for two Internal Assessment Tests (Two Tests, each of 15 Marks with 01-hour duration, are to be conducted) and **10 marks** for other assessment methods mentioned in 22OB4.2. The first test at the end of 40-50% coverage of the syllabus and the second test after covering 85-90% of the syllabus.
- Scaled-down marks of the sum of two tests and other assessment methods will be CIE marks for the theory component of IPCC (that is for **25 marks**).
- The student has to secure 40% of 25 marks to qualify in the CIE of the theory component of IPCC.

### **CIE for the practical component of the IPCC**

- **15 marks** for the conduction of the experiment and preparation of laboratory record, and **10 marks** for the test to be conducted after the completion of all the laboratory sessions.
- On completion of every experiment/program in the laboratory, the students shall be evaluated including viva-voce and marks shall be awarded on the same day.
- The CIE marks awarded in the case of the Practical component shall be based on the continuous evaluation of the laboratory report. Each experiment report can be evaluated for 10 marks. Marks of all experiments' write-ups are added and scaled down to **15 marks**.
- The laboratory test (**duration 02/03 hours**) after completion of all the experiments shall be conducted for 50 marks and scaled down to **10 marks**.
- Scaled-down marks of write-up evaluations and tests added will be CIE marks for the laboratory component of IPCC for **25 marks**.
- The student has to secure 40% of 25 marks to qualify in the CIE of the practical component of the IPCC.

### **SEE for IPCC**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored by the student shall be proportionally scaled down to 50 Marks

**The theory portion of the IPCC shall be for both CIE and SEE, whereas the practical portion will have a CIE component only. Questions mentioned in the SEE paper may include questions from the practical component.**

### **Suggested Learning Resources:**

Explain the concepts of decidability and undecidability.</li> </ol>

### Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

#### Continuous Internal Evaluation:

- For the Assignment component of the CIE, there are 25 marks and for the Internal Assessment Test component, there are 25 marks.
- The first test will be administered after 40-50% of the syllabus has been covered, and the second test will be administered after 85-90% of the syllabus has been covered
- Any two assignment methods mentioned in the 220B2.4, if an assignment is project-based then only one assignment for the course shall be planned. The teacher should not conduct two assignments at the end of the semester if two assignments are planned.
- For the course, CIE marks will be based on a scaled-down sum of two tests and other methods of assessment.

**The Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

#### Semester-End Examination:

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**).

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored shall be proportionally reduced to 50 marks.

#### Suggested Learning Resources:

**Activity Based Learning (Suggested Activities in Class)/ Practical Based Learning**

- Open source tools (like JFLAP) to make teaching and learning more interactive [<https://www.jflap.org/>] (10 Marks)
- Assignments at RBTL-4 (15 marks)

DATA VISUALIZATION LAB		Semester	V
Course Code	BAIL504	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	0:0:2:0	SEE Marks	50
Credits	01	Exam Hours	100
Examination type (SEE)	Practical		
<b>Course objectives:</b>			
<ul style="list-style-type: none"> <li>Understand the Importance of data Visualization for business intelligence and decision making.</li> <li>Learn different approaches to understand the importance of visual perception.</li> <li>Learn different data visualization techniques and tools.</li> <li>Gain knowledge of effective data visuals to solve workplace problems.</li> </ul>			
Sl.NO	Experiments		
1	<b>Getting Started</b> - Tableau Workspace, Tableau terminologies, basic functionalities.		
2	<b>Connecting to Data Source</b> – Connecting to Database, Different types of Tableau Joins.		
3	<b>Creating a View</b> - formatting charts, adding filters, creating calculated fields and defining parameters.		
4	<b>Dashboard Design and Storytelling</b> – Components of Dashboard, Understanding how to place worksheets in Containers, Action filters and its types.		
5	<b>Introducing Power BI</b> –Components and the flow of work. Power BI Desktop Interface-The Report has five main areas.		
6	<b>Querying Data from CSV</b> - Query Editor, Connecting the data from the Excel Source, Clean, Transform the data.		
7	<b>Creating Reports &amp; Visualizations</b> - Different types of charts, Formatting charts with Title, Colors.		
8	<b>Dashboards</b> - Filters in Power BI, Formatting dashboards.		
9	Analysis of revenue in sales dataset: i) Create a choropleth map (fill the map) to spot the special trends to show the state which has the highest revenue. ii) Create a line chart to show the revenue based on the month of the year. iii) Create a bin of size 10 for the age measure to create a new dimension to show the revenue. iv) Create a donut chart view to show the percentage of revenue per region by creating zero access in the calculated field. v) Create a butterfly chart by reversing the bar chart to compare female & male revenue based on product category. vi) Create a calculated field to show the average revenue per state & display profitable & non-profitable state. vii) Build a dashboard.		
10	Analysis of GDP dataset: i) Visualize the countries data given in the dataset with respect to latitude and longitude along with country name using symbol maps. ii) Create a bar graph to compare GDP of Belgium between 2006 – 2026. iii) Using pie chart, visualize the GDP of India, Nepal, Romania, South Asia, Singapore by the year 2010. iv) Visualize the countries Bhutan & Costa Rica competing in terms of GDP.		

	<p>v) Create a scatter plot or circle views of GDP of Mexico, Algeria, Fiji, Estonia from 2004 to 2006.</p> <p>vi) Build an interactive dashboard.</p>
11	<p>Analysis of HR Dataset:</p> <p>i) Create KPI to show employee count, attrition count, attrition rate, attrition count, active employees, and average age.</p> <p>ii) Create a Lollipop Chart to show the attrition rate based on gender category.</p> <p>iii) Create a pie chart to show the attrition percentage based on Department Category- Drag department into colours and change automatic to pie. Entire view, Drag attrition count to angle. Label attrition count, change to percent, add total also, edit label.</p> <p>iv) Create a bar chart to display the number of employees by Age group,</p> <p>v) Create a highlight table to show the Job Satisfaction Rating for each job role based on employee count.</p> <p>vi) Create a horizontal bar chart to show the attrition count for each Education field Education field wise attrition – drag education field to rows, sum attrition count to col,</p> <p>vii) Create multiple donut chart to show the Attrition Rate by Gender for different Age group.</p>
12	<p>Analysis of Amazon Prime Dataset:</p> <p>i) Create a Donut chart to show the percentage of movie and tv shows</p> <p>ii) Create a area chart to shows by release year and type</p> <p>iii) Create a horizontal bar chart to show Top 10 genre</p> <p>iv) Create a map to display total shows by country</p> <p>v) Create a text sheet to show the description of any movie/movies.</p> <p>vi) Build an interactive Dashboard.</p>
<p><b>Course outcomes (Course Skill Set):</b>                  At the end of the course the student will be able to:</p> <ol style="list-style-type: none"> <li>1. Design the experiment to create basic charts and graphs using Tableau and Power BI.</li> <li>2. Develop the solution for the given real world problem.</li> <li>3. Analyze the results and produce substantial written documentation.</li> </ol>	

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together

**Continuous Internal Evaluation (CIE):**

CIE marks for the practical course are **50 Marks**.

The split-up of CIE marks for record/ journal and test are in the ratio **60:40**.

- Each experiment is to be evaluated for conduction with an observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments are designed by the faculty who is handling the laboratory session and are made known to students at the beginning of the practical session.
- Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks.
- Total marks scored by the students are scaled down to **30 marks** (60% of maximum marks).
- Weightage to be given for neatness and submission of record/write-up on time.
- Department shall conduct a test of 100 marks after the completion of all the experiments listed in the syllabus.
- In a test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce.
- The suitable rubrics can be designed to evaluate each student's performance and learning ability.
- The marks scored shall be scaled down to **20 marks** (40% of the maximum marks).

The Sum of scaled-down marks scored in the report write-up/journal and marks of a test is the total CIE marks scored by the student.

**Semester End Evaluation (SEE):**

- SEE marks for the practical course are 50 Marks.
- SEE shall be conducted jointly by the two examiners of the same institute, examiners are appointed by the Head of the Institute.
- The examination schedule and names of examiners are informed to the university before the conduction of the examination. These practical examinations are to be conducted between the schedule mentioned in the academic calendar of the University.
- All laboratory experiments are to be included for practical examination.
- (Rubrics) Breakup of marks and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners. **OR** based on the course requirement evaluation rubrics shall be decided jointly by examiners.
- Students can pick one question (experiment) from the questions lot prepared by the examiners jointly.
- Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners.

General rubrics suggested for SEE are mentioned here, writeup-20%, Conduction procedure and result in - 60%, Viva-voce 20% of maximum marks. SEE for practical shall be evaluated for 100 marks and scored marks shall be scaled down to 50 marks (however, based on course type, rubrics shall be decided by the examiners)

Change of experiment is allowed only once and 15% of Marks allotted to the procedure part are to be made zero.

The minimum duration of SEE is 02 hours

<b>COMPUTER VISION</b>		Semester	5
Course Code	<b>BAI151A</b>	CIE Marks	50
Teaching Hours/Week (L: T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	3
Examination type (SEE)	<b>Theory</b>		
<p><b>Course objectives:</b>            CLO1: To understand the fundamentals of computer vision and digital image processing            CLO2: To introduce the processes involved image enhancement and restoration.            CLO3: To facilitate the students to gain understanding color image processing and morphology.            CLO5: To impart the knowledge of image segmentation and object recognition techniques.</p>			
<p><b>Teaching-Learning Process (General Instructions)</b>            These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) needs not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Use animations/videos to help the students to understand the concepts.</li> <li>7. Demonstrate the concepts using a suitable programming language.</li> </ol>			
<b>Module-1</b>			
<p><b>Introduction:</b> What is computer vision? A brief history. <b>Image Formation:</b> Photometric image formation, The digital camera. <b>Image processing:</b> Point operators, Linear filtering.</p> <p><b>Textbook-1:</b> Chap-1 (1.1, 1.2), Chap-2 (2.2, 2.3), Chap-3 (3.1, 3.2)</p>			
<b>Module-2</b>			
<p><b>Image processing:</b> More neighborhood operators, Fourier transforms, Pyramids and wavelets, and Geometric transformations.</p> <p><b>Textbook-1:</b> Chap- 3 (3.3 - 3.6)</p>			
<b>Module-3</b>			
<p><b>Image Restoration and Reconstruction:</b> A model of Image degradation/restoration process, restoration in the presence of noise only, periodic noise reduction by frequency domain filtering.</p> <p><b>Image Segmentation:</b> Fundamentals, Point, Line and edge detection, thresholding (Foundation &amp; Basic global thresholding only), Segmentation by region growing &amp; region splitting &amp; merging.</p> <p><b>Textbook-2:</b> Chap-5 (5.1 to 5.4), Chap-10 (10.1 to 10.3.2, 10.4)</p>			
<b>Module-4</b>			
<p><b>Color Image Processing:</b> Color fundamentals, color models, Pseudocolor image processing, full color image processing, color transformations, color image smoothing and sharpening, Using color in image segmentation, Noise in color images.</p>			

<p><b>Textbook-2:</b> Chap-6 (6.1-6.8)</p>
<p><b>Module-5</b></p>
<p><b>Morphological Image Processing:</b> Preliminaries, Erosion and Dilation, opening and closing, Hit-or-miss transform, some basic morphological algorithms.</p> <p><b>Feature Extraction:</b> Background, Boundary preprocessing (Boundary following &amp; Chain codes only).</p> <p><b>Image pattern Classification:</b> Background, Patterns and classes, Pattern classification by prototype matching (Minimum distance classifier only).</p> <p><b>Textbook-2:</b> Chap -9 (9.1-9.5), Chap-11(11.1-11.2.2), Chap-12 (12.1-12.3.1)</p>
<p><b>Course outcome (Course Skill Set)</b></p> <p>At the end of the course, the student will be able to :</p> <ol style="list-style-type: none"> <li>1. Explain the fundamentals of computer vision and its applications.</li> <li>2. Apply the image enhancement techniques for smoothing and sharpening of images.</li> <li>3. Compare the different image restoration and segmentation techniques.</li> <li>4. Demonstrate the smoothing and sharpening techniques for color images.</li> <li>5. Explain morphological, feature extraction, and pattern classification techniques for object recognition.</li> </ol>
<p><b>Assessment Details (both CIE and SEE)</b></p> <p>The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. UNIX SYSTEM PROGRAMMING		Semester	V
Course Code	BCS515C	CIE Marks	50
Teaching Hours/Week (L: T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
Examination type (SEE)	Theory		
<p><b>Course objectives:</b> This course will enable students to</p> <ul style="list-style-type: none"> <li>• To help the students to understand effective use of Unix concepts, commands and terminology. Identify, access, and evaluate UNIX file system</li> <li>• Explain the fundamental design of the unix operating system</li> <li>• Familiarize with the systems calls provided in the unix environment</li> <li>• Design and build an application/service over the unix operating system</li> </ul>			
<p><b>Teaching-Learning Process (General Instructions)</b>  These are sample Strategies; which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<p><b>Introduction:</b> Unix Components/Architecture. Features of Unix. The UNIX Environment and UNIX Structure, Posix and Single Unix specification. General features of Unix commands/command structure. Command arguments and options. Basic Unix commands such as echo, printf, ls, who, date, passwd, cal, Combining commands. Meaning of Internal and external commands. The type command: knowing the type of a command and locating it. The root login. Becoming the super user: su command.</p> <p><b>Unix files:</b> Naming files. Basic file types/categories. Organization of files. Hidden files. Standard directories. Parent-child relationship. The home directory and the HOME variable. Reaching required files- the PATH variable, manipulating the PATH, Relative and absolute pathnames. Directory commands – pwd, cd, mkdir, rmdir commands. The dot (.) and double dots (..) notations to represent present and parent directories and their usage in relative path names. File related commands – cat, mv, rm, cp, wc and od commands.</p>			

<b>Text Book1: Chapter-1, 2, 3, 4, 5</b>
<b>Module-2</b>
<p><b>File attributes and permissions:</b> The ls command with options. Changing file permissions: the relative and absolute permissions changing methods. Recursively changing file permissions. Directory permissions.</p> <p><b>The shells interpretive cycle:</b> Wild cards. Removing the special meanings of wild cards. Three standard files and redirection.</p> <p><b>Connecting commands:</b> Pipe. Basic and Extended regular expressions. The grep, egrep. Typical examples involving different regular expressions.</p> <p><b>Shell programming:</b> Ordinary and environment variables. The. profile. Read and read-only commands. Command line arguments. exit and exit status of a command. Logical operators for conditional execution. The test command and its shortcut. The if, while, for and case control statements. The set and shift commands and handling positional parameters. The here (&lt;&lt;) document and trap command. Simple shell program examples.</p> <p><b>Text Book1: Chapter-6,8,13,14</b></p>
<b>Module-3</b>
<p><b>Unix Standardization and Implementations:</b> Introduction, Unix Standardization, UNIX System Implementation.</p> <p><b>File I/O:</b> Introduction, File Description, open, create, read, write, close, fcntl functions.</p> <p><b>Files and Dictionaries:</b> mkdir and rmdir functions, reading dictionaries, chdir, fchdir and getcwd functions. Device Special files.</p> <p><b>The Environment of a UNIX Process:</b> Introduction, main function, Process Termination, Command-Line Arguments, Environment List, Memory Layout of a C Program, Shared Libraries, Memory Allocation, Environment Variables, setjmp and longjmp Functions, getrlimit, setrlimit Functions.</p> <p><b>Text Book 2: 2,3,4,7.</b></p>
<b>Module-4</b>
<p><b>Process Control:</b> Introduction, Process Identifiers, fork, vfork, exit, wait, waitpid, wait3, wait4 Functions, Race Conditions, exec Functions.</p> <p><b>Overview of IPC Methods,</b> Pipes, popen, pclose Functions, Coprocesses, FIFOs, System V IPC, Message Queues, Semaphores.</p> <p><b>Shared Memory,</b> Client-Server Properties, Passing File Descriptors, An Open Server-Version 1.</p> <p><b>Text Book2: Chapter 8, 15,17</b></p>
<b>Module-5</b>

**Signals and Daemon Processes:** Introduction, Signal Concepts, Signal Functions, SIGCLD Semantics, Kill and Raise functions, Alarm and Pause Functions, Signal Sets, sigprocmask Function, sigpending function, sigaction function, sigsetjmp and siglongjmp functions, sigsuspend function, abort function, system function, sleep, nanosleep and clock\_nanosleep functions, sigqueue functions, job-control signals, signal names and numbers.

**Daemon Processes:** Introduction, Daemon Characteristics, Coding Rules, Error Logging, Client-Server Model.

**Text Book 2: Chapter 10, 13**

### Course outcome (Course Skill Set)

At the end of the course, the student will be able to:

- Demonstrate the basics of Unix concepts and commands.
- Demonstrate the UNIX file system.
- Apply commands to reflect changes in file system.
- Demonstrate IPC and process management.
- Develop an application/service over a Unix system.

### Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

#### Continuous Internal Evaluation:

- For the Assignment component of the CIE, there are 25 marks and for the Internal Assessment Test component, there are 25 marks.
- The first test will be administered after 40-50% of the syllabus has been covered, and the second test will be administered after 85-90% of the syllabus has been covered
- Any two assignment methods mentioned in the 220B2.4, if an assignment is project-based then only one assignment for the course shall be planned. The teacher should not conduct two assignments at the end of the semester if two assignments are planned.
- For the course, CIE marks will be based on a scaled-down sum of two tests and other methods of assessment.

**Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

#### Semester-End Examination:

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**).

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored shall be proportionally reduced to 50 marks

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

Programming assignment -1 (Shell level) - 10 marks

Programming assignment -2 (API level) - 15 marks

<b>DISTRIBUTED SYSTEMS</b>		Semester	5
Course Code	<b>BCS515D</b>	CIE Marks	50
Teaching Hours/Week (L: T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	3Hrs	Total Marks	100
Credits	03	Exam Hours	
Examination type (SEE)	Theory		
<p><b>Course objectives:</b></p> <ul style="list-style-type: none"> <li>• Understand the goals and challenges of distributed systems</li> <li>• Describe the architecture of RPC/RMI, distributed file systems and name services</li> <li>• Learn clock synchronization algorithms to monitor and order the events, mutual exclusion, election and consensus algorithms.</li> <li>• Study the fundamental concepts and algorithms related to distributed transactions and replication.</li> </ul>			
<p><b>Teaching-Learning Process (General Instructions)</b> These are sample strategies which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyse information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Demonstrate every concept by implementing an OpenGL program.</li> </ol>			
<b>Module-1</b>			
<p><b>CHARACTERIZATION OF DISTRIBUTED SYSTEMS:</b> Introduction, Focus on resource sharing, Challenges.</p> <p><b>REMOTE INVOCATION:</b> Introduction, Request-reply protocols, Remote procedure call, Introduction to Remote Method Invocation.</p> <p><b>Textbook: Chapter- 1.1,1.4,1.5, 5.1-5.5</b></p>			
<b>Module-2</b>			
<p><b>DISTRIBUTED FILE SYSTEMS:</b> Introduction, File service architecture.</p> <p><b>NAME SERVICES:</b> Introduction, Name services and the Domain Name System, Directory services.</p> <p><b>Textbook: Chapter- 12.1,12.2, 13.1-13.3</b></p>			
<b>Module-3</b>			
<p><b>TIME AND GLOBAL STATES:</b> Introduction, Clocks, events and process states, Synchronizing Physical clocks, Logical time and logical clocks, Global states</p>			

	<b>Textbook: Chapter- 14.1-14.5</b>
	<b>Module-4</b>
	<p><b>COORDINATION AND AGREEMENT:</b> Introduction, Distributed mutual exclusion, Elections, Coordination and agreement in group communication, Consensus and related problems.</p> <p><b>Textbook: Chapter -15.1-15.5</b></p>
	<b>Module-5</b>
	<p><b>DISTRIBUTED TRANSACTIONS:</b> Introduction, Flat and nested distributed transactions, Atomic commit protocols, Concurrency control in distributed transactions, Distributed deadlocks, Transaction recovery.</p> <p><b>REPLICATION:</b> Introduction.</p> <p><b>Textbook: Chapter -17.1-17.6, 18.1</b></p>
<p><b>Course outcome (Course Skill Set)</b></p> <p>At the end of the course, the student will be able to :</p> <ol style="list-style-type: none"> <li>1. Identify the goals and challenges of distributed systems</li> <li>2. Demonstrate the remote invocation techniques for communication</li> <li>3. Describe the architecture of distributed file systems and name services</li> <li>4. Apply clock synchronization algorithms to monitor and order the events.</li> <li>5. Analyze the performance of mutual exclusion, election and consensus algorithms.</li> <li>6. Illustrate the fundamental concepts and algorithms related to distributed transactions and replication</li> </ol>	

### Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

#### Continuous Internal Evaluation:

- For the Assignment component of the CIE, there are 25 marks and for the Internal Assessment Test component, there are 25 marks.
- The first test will be administered after 40-50% of the syllabus has been covered, and the second test will be administered after 85-90% of the syllabus has been covered
- Any two assignment methods mentioned in the 22OB2.4, if an assignment is project-based then only one assignment for the course shall be planned. The teacher should not conduct two assignments at the end of the semester if two assignments are planned.
- For the course, CIE marks will be based on a scaled-down sum of two tests and other methods of assessment.

**Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

#### Semester-End Examination:

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**).

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored shall be proportionally reduced to 50 marks

#### Suggested Learning Resources:

##### Textbook's:

1. George Coulouris, Jean Dollimore and Tim Kindberg, "Distributed Systems Concepts and Design", Fifth Edition, Pearson Education, 2012.

<p><b>Course objectives:</b></p> <ul style="list-style-type: none"> <li>Identify the major challenges of environmental issues</li> <li>Develop skills, critical thinking and demonstrate socio-economic skills for Environmental protection</li> <li>Analyze the impact of issues w. r. t. waste management</li> </ul>			
<p><b>Teaching-Learning Process (General Instructions)</b>                      These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>Lecturer method (L) need not to be only traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>Use of Video/Animation to explain functioning of various concepts.</li> <li>Encourage collaborative (Group Learning) Learning in the class.</li> <li>Ask at least three HOT (Higher order Thinking) questions in the class, which promotes Critical thinking.</li> <li>Adopt Case study Based Learning (CBL), which fosters students' analytical skills, develop thinking skills such as the ability to evaluate, generalize, and analyse information rather than simply recall it.</li> <li>Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding.</li> </ol>			
<b>Module-1</b>			
<p>Ecosystem and Sustainability:                      Ecosystem: Structure of Ecosystem, Types: Forest, Desert, Wetlands, Riverine, Oceanic ecosystems.                      Sustainability: 17SDG targets and possible actions.                      Self-Study Component (SSC): Components of the environment.                      Textbook 1: CH- 3, e-resource: 1</p>			
<b>Module-2</b>			
<p>Natural resources and Energy:                      Natural Resources: Water resources – Availability &amp; Quality aspects, Water borne diseases &amp; water induced diseases, Fluoride problem in drinking water.                      Energy: Different types of energy, Conventional sources &amp; Non -Conventional sources of Energy, Solar energy, Wind Energy, Hydrogen as an alternative energy                      Self-Study Component (SSC): Alternative Energy sources                      Textbook 1: CH- 2</p>			
<b>Module-3</b>			
<p>Environmental Pollution:                      Environmental Pollution: Water Pollution, Noise pollution, Air pollution (Sources, Impacts, Preventive measures and Public Health Aspects.                      Self-Study Component (SSC): Case studies of air pollution episodes                      Textbook 1: CH- 5</p>			
<b>Module-4</b>			
<p>Waste management:                      Waste management: Solid Waste Management , types and sources, functional elements of SWM, Biomedical Waste Management - Sources, Characteristics                      Environmental Legislation: Solid Waste Management Rules, 2016, Biomedical Waste Management Rules, 2016.</p>			

Self-Study Component (SSC): Case studies on waste management options

Textbook 1: CH- 6, e-resource:2

**Module-5**

E - Waste Management

E- waste; composition and generation. Global context in e- waste; E-waste pollutants, E waste hazardous properties, Effects of pollutant (E- waste) on human health and surrounding environment, domestic e-waste disposal, Basic principles of E waste management, Component of E waste management.

E-waste (Management and Handling) Rules, 2011; and E-Waste (Management) Rules, 2022 - Salient Features and its implications.

Self-Study Component (SSC): E-Waste (Management) Amendment Rules, 2023, 2024

Textbook 1: CH- 6, Textbook 2: CH-2, e-resource:3

**Course outcome (Course Skill Set)**

At the end of the course the student will be able to:

1. Comprehend the principles of ecology and environmental issues pertaining to air, land, and water on a global scale.
2. Acquire observation skills for solving problems related to the environment.
3. Conduct survey to describe the realities of waste management system.

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

**Continuous internal Examination (CIE)**

- For the Assignment component of the CIE, there are 25 marks and for the Internal Assessment Test component, there are 25 marks.
- The first test will be administered after 40-50% of the syllabus has been covered, and the second test will be administered after 85-90% of the syllabus has been covered
- Any two assignment methods mentioned in the 22OB2.4, if an assignment is project-based then only one assignment for the course shall be planned. The teacher should not conduct two assignments at the end of the semester if two assignments are planned.
- For the course, CIE marks will be based on a scaled-down sum of two tests and other methods of assessment.

**Internal Assessment Test question paper is designed to attain the different levels of Bloom’s taxonomy as per the outcome defined for the course.**

**Semester End Examinations (SEE)**

SEE paper shall be set for 50 questions, each of the 01 marks. The pattern of the question paper is MCQ (multiple choice questions). The time allotted for SEE is **01 hour**. The student has to secure a minimum of 35% of the maximum marks meant for SEE.

OR

MCQ (Multiple Choice Questions) are preferred for 01 credit courses, however, if course content demands the general question paper pattern that followed for 03 credit course, then

1. The question paper will have ten questions. Each question is set for 10 marks.
2. There will be 2 questions from each module. Each of the two questions under a module may or may not have the sub-questions (with maximum sub-questions of 02, with marks distributions 5+5, 4+6, 3+7).
3. The students have to answer 5 full questions, selecting one full question from each module.

<b>MODULE-4</b>			

**Information Retrieval:** Design Features of Information Retrieval Systems, Information Retrieval Models - Classical, Non-classical, Alternative Models of Information Retrieval - Custer model, Fuzzy model, LSTM model, Major Issues in Information Retrieval.

**Lexical Resources:** WordNet, FrameNet, Stemmers, Parts-of-Speech Tagger, Research Corpora.

**Textbook 1:** Ch. 9, Ch. 12.

### MODULE-5

**Machine Translation:** Language Divergences and Typology, Machine Translation using Encoder-Decoder, Details of the Encoder-Decoder Model, Translating in Low-Resource Situations, MT Evaluation, Bias and Ethical Issues.

**Textbook 2:** Ch. 13.

#### PRACTICAL COMPONENT OF IPCC

Sl.NO	Experiments
1	<p>Write a Python program for the following preprocessing of text in NLP:</p> <ul style="list-style-type: none"> <li>● Tokenization</li> <li>● Filtration</li> <li>● Script Validation</li> <li>● Stop Word Removal</li> <li>● Stemming</li> </ul>
2	<p>Demonstrate the N-gram modeling to analyze and establish the probability distribution across sentences and explore the utilization of unigrams, bigrams, and trigrams in diverse English sentences to illustrate the impact of varying n-gram orders on the calculated probabilities.</p>
3	<p>Investigate the Minimum Edit Distance (MED) algorithm and its application in string comparison and the goal is to understand how the algorithm efficiently computes the minimum number of edit operations required to transform one string into another.</p> <ul style="list-style-type: none"> <li>● Test the algorithm on strings with different type of variations (e.g., typos, substitutions, insertions, deletions)</li> <li>● Evaluate its adaptability to different types of input variations</li> </ul>
4	<p>Write a program to implement top-down and bottom-up parser using appropriate context free grammar.</p>
5	<p>Given the following short movie reviews, each labeled with a genre, either comedy or action:</p> <ul style="list-style-type: none"> <li>● fun, couple, love, love comedy</li> <li>● fast, furious, shoot action</li> <li>● couple, fly, fast, fun, fun comedy</li> <li>● furious, shoot, shoot, fun action</li> <li>● fly, fast, shoot, love action and</li> </ul> <p>A new document D: fast, couple, shoot, fly</p> <p>Compute the most likely class for D. Assume a Naive Bayes classifier and use add-1 smoothing for the likelihoods.</p>
6	<p>Demonstrate the following using appropriate programming tool which illustrates the use of information retrieval in NLP:</p> <ul style="list-style-type: none"> <li>● Study the various Corpus – Brown, Inaugural, Reuters, udhr with various methods like fileds, raw, words, sents, categories</li> </ul>

	<ul style="list-style-type: none"> <li>● Create and use your own corpora (plaintext, categorical)</li> <li>● Study Conditional frequency distributions</li> <li>● Study of tagged corpora with methods like tagged_sents, tagged_words</li> <li>● Write a program to find the most frequent noun tags</li> <li>● Map Words to Properties Using Python Dictionaries</li> <li>● Study Rule based tagger, Unigram Tagger</li> </ul> <p>Find different words from a given plain text without any space by comparing this text with a given corpus of words. Also find the score of words.</p>
7	Write a Python program to find synonyms and antonyms of the word "active" using WordNet.
8	Implement the machine translation application of NLP where it needs to train a machine translation model for a language with limited parallel corpora. Investigate and incorporate techniques to improve performance in low-resource scenarios.
<p><b>Course outcomes (Course Skill Set):</b>  At the end of the course, the student will be able to:</p> <ul style="list-style-type: none"> <li>● Apply the fundamental concept of NLP, grammar-based language model and statistical-based language model.</li> <li>● Model morphological analysis using Finite State Transducers and parsing using context-free grammar and different parsing approaches.</li> <li>● Develop the Naïve Bayes classifier and sentiment analysis for Natural language problems and text classifications.</li> <li>● Apply the concepts of information retrieval, lexical semantics, lexical dictionaries such as WordNet, lexical computational semantics, distributional word similarity.</li> <li>● Identify the Machine Translation applications of NLP using Encode and Decoder.</li> </ul>	
<p><b>Assessment Details (both CIE and SEE)</b>  The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.</p> <p><b>CIE for the theory component of the IPCC (maximum marks 50)</b></p> <ul style="list-style-type: none"> <li>● IPCC means practical portion integrated with the theory of the course.</li> <li>● CIE marks for the theory component are <b>25 marks</b> and that for the practical component is <b>25 marks</b>.</li> <li>● 25 marks for the theory component are split into <b>15 marks</b> for two Internal Assessment Tests (Two Tests, each of 15 Marks with 01-hour duration, are to be conducted) and <b>10 marks</b> for other assessment methods mentioned in 22OB4.2. The first test at the end of 40-50% coverage of the syllabus and the second test after covering 85-90% of the syllabus.</li> <li>● Scaled-down marks of the sum of two tests and other assessment methods will be CIE marks for the theory component of IPCC (that is for <b>25 marks</b>).</li> <li>● The student has to secure 40% of 25 marks to qualify in the CIE of the theory component of IPCC.</li> </ul> <p><b>CIE for the practical component of the IPCC</b></p> <ul style="list-style-type: none"> <li>● <b>15 marks</b> for the conduction of the experiment and preparation of laboratory record, and <b>10 marks</b> for the test to be conducted after the completion of all the laboratory sessions.</li> </ul>	

- On completion of every experiment/program in the laboratory, the students shall be evaluated including viva-voce and marks shall be awarded on the same day.
- The CIE marks awarded in the case of the Practical component shall be based on the continuous evaluation of the laboratory report. Each experiment report can be evaluated for 10 marks. Marks of all experiments' write-ups are added and scaled down to **15 marks**.
- The laboratory test (**duration 02/03 hours**) after completion of all the experiments shall be conducted for 50 marks and scaled down to **10 marks**.
- Scaled-down marks of write-up evaluations and tests added will be CIE marks for the laboratory component of IPCC for **25 marks**.
- The student has to secure 40% of 25 marks to qualify in the CIE of the practical component of the IPCC.

### **SEE for IPCC**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored by the student shall be proportionally scaled down to 50 Marks

**The theory portion of the IPCC shall be for both CIE and SEE, whereas the practical portion will have a CIE component only. Questions mentioned in the SEE paper may include questions from the practical component.**

### **Suggested Learning Resources:**

#### **Textbook:**

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

**Text Classification Game (5 Marks)**

- **Objective:** Learn supervised learning and text classification.
- **Activity:** Provide students with a set of documents (e.g., movie reviews) labeled as positive or negative. Divide them into groups and have them create a simple classification model using keywords or phrases. They can then test their model on new reviews.

**Grammar Check and Correction (5 Marks)**

- **Objective:** Learn about language structure and NLP tools.
- **Activity:** Provide sentences with grammatical errors. Students can use grammar checking tools (like Grammarly or LanguageTool) to identify errors and suggest corrections, discussing why each suggestion is made.

<b>MACHINE LEARNING</b>		Semester	6
Course Code	<b>BAI602</b>	CIE Marks	50
Teaching Hours/Week (L: T:P: S)	4:0:0:0	SEE Marks	50
Total Hours of Pedagogy	50	Total Marks	100
Credits	04	Exam Hours	03
Examination type (SEE)	Theory		
<p><b>Course objectives:</b></p> <ul style="list-style-type: none"> <li>● To introduce the fundamental concepts and techniques of machine learning.</li> <li>● To understanding of various types of machine learning and the challenges faced in real-world applications.</li> <li>● To enable students to evaluate machine learning models for different types of problems.</li> <li>● To familiarize the machine learning algorithms such as regression, decision trees, Bayesian models, clustering, and neural networks.</li> </ul>			
<p><b>Teaching-Learning Process (General Instructions)</b>  These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) needs not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation/Demonstration to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem/Practical Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills, and practical skill such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Use animations/videos to help the students to understand the concepts.</li> <li>7. Demonstrate the concepts using PYTHON and its libraries wherever possible</li> </ol>			
<b>Module-1</b>			
<p><b>Introduction:</b> Need for Machine Learning, Machine Learning Explained, Machine Learning in Relation to other Fields, Types of Machine Learning, Challenges of Machine Learning, Machine Learning Process, Machine Learning Applications.</p> <p><b>Understanding Data - 1:</b> Introduction, Big Data Analysis Framework, Descriptive Statistics, Univariate Data Analysis and Visualization.</p> <p><b>Chapter-1, 2 (2.1-2.5)</b></p>			
<b>Module-2</b>			
<p><b>Understanding Data - 2:</b> Bivariate Data and Multivariate Data, Multivariate Statistics, Essential Mathematics for Multivariate Data, Feature Engineering and Dimensionality Reduction Techniques.</p> <p><b>Testing Machine Learning Algorithms:</b> Overfitting , Training, Testing, and Validation Sets ,The Confusion Matrix , Accuracy Metrics , The Receiver Operator Characteristic (ROC) Curve , Unbalanced Datasets , Measurement Precision</p> <p><b>Textbook-1: Chapter -2 (2.6-2.8, 2.10), Text book-2 (2.2)</b></p>			
<b>Module-3</b>			
<p><b>Similarity-based Learning:</b> Nearest-Neighbor Learning, Weighted K-Nearest-Neighbor Algorithm, Nearest Centroid Classifier, Locally Weighted Regression (LWR).</p>			

<p><b>Regression Analysis:</b> Introduction to Regression, Introduction to Linear Regression, Multiple Linear Regression, Polynomial Regression, Logistic Regression.</p> <p><b>Chapter-4 (4.2-4.5), Chapter-5 (5.1-5.3, 5.5-5.7)</b></p>
<b>Module-4</b>
<p><b>Decision Tree Learning:</b> Introduction to Decision Tree Learning Model, Decision Tree Induction Algorithms. Validating and pruning of Decision trees.</p> <p><b>Bayesian Learning:</b> Introduction to Probability-based Learning, Fundamentals of Bayes Theorem, Classification Using Bayes Model, Naïve Bayes Algorithm for Continuous Attributes.</p> <p><b>Chapter-6 (6.1, 6.3), Chapter-8 (8.1-8.4)</b></p>
<b>Module-5</b>
<p><b>Artificial Neural Networks:</b> Introduction, Biological Neurons, Artificial Neurons, Perceptron and Learning Theory, Types of Artificial Neural Networks, Popular Applications of Artificial Neural Networks, Advantages and Disadvantages of ANN, Challenges of ANN.</p> <p><b>Clustering Algorithms:</b> Introduction to Clustering Approaches, Proximity Measures, Hierarchical Clustering Algorithms, Partitional Clustering Algorithm, Density-based Methods, Grid-based Approach.</p> <p><b>Chapter-10 (10.1-10.5, 10.9-10.11), Chapter -13 (13.1-13.6)</b></p>
<p><b>Course outcome (Course Skill Set)</b></p> <p>At the end of the course, the student will be able to :</p> <ol style="list-style-type: none"> <li>1. Explain the machine learning techniques, their types and data analysis framework.</li> <li>2. Apply mathematical concepts for feature engineering and perform dimensionality reduction to enhance model performance.</li> <li>3. Develop similarity-based learning models and regression models for solving classification and prediction tasks.</li> <li>4. Develop probabilistic learning models and neural network models using perceptrons and multilayer architectures.</li> <li>5. Utilize clustering algorithms to identify patterns in data .</li> </ol>

### Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

#### Continuous Internal Evaluation:

- For the Assignment component of the CIE, there are 25 marks and for the Internal Assessment Test component, there are 25 marks.
- The first test will be administered after 40-50% of the syllabus has been covered, and the second test will be administered after 85-90% of the syllabus has been covered
- Any two assignment methods mentioned in the 22OB2.4, if an assignment is project-based then only one assignment for the course shall be planned. The teacher should not conduct two assignments at the end of the semester if two assignments are planned.
- For the course, CIE marks will be based on a scaled-down sum of two tests and other methods of assessment.

**Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

#### Semester-End Examination:

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**).

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored shall be proportionally reduced to 50 marks

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning****Activities (10 marks)**

1. Identify real-world applications in ML and Discuss the type of ML (supervised, unsupervised, or semi-supervised) used in each case.
2. Consider a messy dataset and use data preprocessing approaches to clean up this data (for activity 1).
3. Use Data Analysis approaches to visualize trends, correlations, and distributions (for activity 2).

**Course project(15 marks):**

Implement suitable machine learning-based real-world application problems.

<b>Human-Centred AI</b>		Semester	6

Credits	03	Exam Hours	03
Examination type (SEE)	Theory		
<p><b>Course objectives:</b></p> <ul style="list-style-type: none"> <li>● To Understand Blockchain terminologies with its applications. design</li> <li>● To learn working principles of Blockchain and methodologies used in Bitcoin</li> <li>● To gain knowledge on Ethereum Network, Wallets, Nodes, Smart contract &amp; DApps</li> <li>● To learn blockchain Based Application Architecture using Hyperledger and the Smart Contract Lifecycle</li> </ul>			
<p><b>Teaching-Learning Process (General Instructions)</b>            These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) needs not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation/Demonstration to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Use animations/videos to help the students to understand the concepts.</li> </ol>			
<b>Module-1</b>			
<p>Distributed systems, CAP theorem, Byzantine Generals problem, Consensus. The history of blockchain, Introduction to blockchain, Various technical definitions of blockchains, Generic elements of a blockchain, Features of a blockchain, Applications of blockchain technology, Tiers of blockchain technology, Consensus in blockchain, CAP theorem and blockchain, Benefits and limitations of blockchain.</p> <p><b>Chapter 1</b></p>			
<b>Module-2</b>			
<p>Decentralization using blockchain, Methods of decentralization, Blockchain and full ecosystem decentralization, Smart contract, Decentralized organizations, Decentralized autonomous organizations, Decentralized autonomous corporations, Decentralized autonomous societies Decentralized applications, Platforms for decentralization.</p> <p>Cryptographic primitives: Symmetric cryptography, Asymmetric cryptography, Public and private keys, Hash functions: Compression of arbitrary messages into fixed length digest, Easy to compute, Pre-image resistance, Second pre-image resistance, Collision resistance, Message Digest (MD), Secure Hash Algorithms (SHAs), Merkle trees, Patricia trees, Distributed hash tables (DHTs), Digital signatures, Elliptic Curve Digital signature algorithm (ECDSA).</p> <p><b>Chapter 2, Chapter 3: pg:56-105</b></p>			
<b>Module-3</b>			

<p>Bitcoin, Bitcoin definition, Transactions, The transaction life cycle, The transaction structure, Types of transaction, The structure of a block , The structure of a block header, The genesis block, The bitcoin network, Wallets, Smart Contracts-History, Definition, Ricardian contracts, Smart contract templates, Oracles, Smart Oracles, Deploying smart contracts on a blockchain, The DAO.</p> <p><b>Chapter 4:pg:111-148, Chapter 6</b></p>
<b>Module-4</b>
<p>Ethereum 101, Introduction, Ethereum clients and releases, The Ethereum stack, Ethereum blockchain, Currency (ETH and ETC), Forks, Gas, The consensus mechanism, The world state, Transactions, Contract creation transaction, Message call transaction, Elements of the Ethereum blockchain , Ethereum virtual machine (EVM), Accounts, Block, Ether, Messages, Mining, The Ethereum network. Hands-on: Clients and wallets –Geth.</p> <p><b>Chapter 7: pg: 210-227, 235-269</b></p>
<b>Module-5</b>
<p>Hyperledger, Hyperledger as a protocol, Fabric, Hyperledger Fabric, Sawtooth lake, Corda.</p> <p><b>Chapter 9</b></p>
<p><b>Course outcomes (Course Skill Set)</b></p> <p>At the end of the course, the student will be able to :</p> <ol style="list-style-type: none"> <li>1. Explain the Blockchain terminologies with its applications. design</li> <li>2. Illustrate the working principles of Blockchain and the Smart Contract Lifecycle</li> <li>3. Demonstrate the principles and methodologies used in Bitcoin</li> <li>4. Develop Ethereum Network, Wallets, Nodes, Smart contract and DApps.</li> <li>5. Make use of Hyperledger in Blockchain Based Application Architecture.</li> </ol>

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

**Continuous Internal Evaluation:**

- For the Assignment component of the CIE, there are 25 marks and for the Internal Assessment Test component, there are 25 marks.
- The first test will be administered after 40-50% of the syllabus has been covered, and the second test will be administered after 85-90% of the syllabus has been covered
- Any two assignment methods mentioned in the 220B2.4, if an assignment is project-based then only one assignment for the course shall be planned. The teacher should not conduct two assignments at the end of the semester if two assignments are planned.
- For the course, CIE marks will be based on a scaled-down sum of two tests and other methods of assessment.

**Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester-End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**).

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored shall be proportionally reduced to 50 marks

**Suggested Learning Resources:****Books**

1. Imran Bashir. "Mastring Blockchain", Third Edition, Packt – 2020.

**Reference Book**

1. Andreas M. , Mastering Bitcoin: Programming the Open Blockchain – O'rielly – 2017.

**Web links and Video Lectures (e-Resources):**

- <https://www.tutorialspoint.com/blockchain/index.htm>

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

- Course Project: Covers the implementation of the major concepts outlined in the syllabus– 25 Marks

<b>TIME SERIES ANALYSIS</b>		Semester	6
Course Code	<b>BAI613D</b>	CIE Marks	50
Teaching Hours/Week (L: T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
Examination type (SEE)	Theory		
<p><b>Course objectives:</b></p> <ul style="list-style-type: none"> <li>● Learn the importance of time series analysis on the data.</li> <li>● Identify approaches to handle linear stationary and non stationary models.</li> <li>● Analyse ways of model building and parameter estimation.</li> <li>● Recognize methods to handle multivariate time series data.</li> </ul>			
<p><b>Teaching-Learning Process (General Instructions)</b></p> <p>These are sample strategies; which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) does not mean only the traditional lecture method, but different types of teaching methods may be adopted to achieve the outcomes.</li> <li>2. Utilize video/animation films to illustrate the functioning of various concepts.</li> <li>3. Promote collaborative learning (Group Learning) in the class.</li> <li>4. Pose at least three HOT (Higher Order Thinking) questions in the class to stimulate critical thinking.</li> <li>5. Incorporate Problem-Based Learning (PBL) to foster students' analytical skills and develop their ability to evaluate, generalize, and analyze information rather than merely recalling it.</li> <li>6. Introduce topics through multiple representations.</li> <li>7. Demonstrate various ways to solve the same problem and encourage students to devise their own creative solutions.</li> <li>8. Discuss the real-world applications of every concept to enhance students' comprehension.</li> <li>9. Use any of these methods: Chalk and board, Active Learning, Case Studies.</li> </ol>			
<b>Module-1</b>			
<p>Introduction, Five Important Practical Problems, <b>Autocorrelation Function and Spectrum of Stationary Processes:</b> Autocorrelation Properties of Stationary Models, Spectral Properties of Stationary Models, <b>Linear Stationary Models:</b> General Linear Process, Autoregressive Processes, Moving Average Processes, Mixed Autoregressive--Moving Average Processes.</p> <p><b>Ch. 1.1, Ch. 2.1,2.2 Ch. 3.1,3.2,3.3,3.4</b></p>			
<b>Module-2</b>			
<p><b>Linear Nonstationary Models:</b> Autoregressive Integrated Moving Average Processes, Three Explicit Forms for the ARIMA Model, Integrated Moving Average Processes.</p> <p><b>Forecasting :</b> Minimum Mean Square Error Forecasts and Their Properties, Calculating Forecasts and Probability Limits, Examples of Forecast Functions and Their Updating, Use of State-Space Model Formulation for Exact Forecasting</p> <p><b>Ch. 4.1,4.2,4.3, Ch. 5.1,5.2,5.3,5.4,5.5.</b></p>			

<b>Module-3</b>
<p><b>Model Identification:</b> Objectives of Identification, Identification Techniques, Initial Estimates for the Parameters, Model Multiplicity.</p> <p><b>Parameter Estimation:</b> Study of the Likelihood and Sum-of-Squares Functions, Nonlinear Estimation, Some Estimation Results for Specific Models, Likelihood Function Based on the State-Space Model, Estimation Using Bayes' Theorem</p> <p><b>Ch. 6.1,6.2,6.3,6.4 Ch. 7.1,7.2,7.3,7.4,7.5.</b></p>
<b>Module-4</b>
<p><b>Model Diagnostic Checking:</b> Checking the Stochastic Model, Overfitting, Diagnostic Checks Applied to Residuals, Use of Residuals to Modify the Model,</p> <p><b>Analysis of Seasonal Time Series:</b> Parsimonious Models for Seasonal Time Series, Some Aspects of More General Seasonal ARIMA Models, Structural Component Models and Deterministic Seasonal Components, Regression Models with Time Series Error Terms.</p> <p><b>Ch. 8.1,8.2,8.3 Ch. 9.1,9.2,9.3,9.4,9.5</b></p>
<b>Module-5</b>
<p><b>Multivariate Time Series Analysis:</b> Stationary Multivariate Time Series, Vector Autoregressive Models, Vector Moving Average Models, Vector Autoregressive--Moving Average Models, Forecasting for Vector Autoregressive--Moving Average Processes, State-Space Form of the VARMA Model, Nonstationary and Cointegration</p> <p><b>Ch. 14.1,14.2,14.3,14.4,14.5,14.6,14.8</b></p>
<p><b>Course outcome (Course Skill Set)</b></p> <p>At the end of the course, the student will be able to:</p> <ol style="list-style-type: none"> <li>1. Apply the fundamental concept of Time series analysis for Autocorrelation Function and spectrum on linear stationary models.</li> <li>2. Develop non-linear stationary models and perform forecasting.</li> <li>3. Identify models and estimate the various parameters .</li> <li>4. Recognize ways to perform model diagnostic checking and analyze the seasonal time series .</li> <li>5. Analyze multivariate time series data.</li> </ol>

### **Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

#### **Continuous Internal Evaluation:**

- For the Assignment component of the CIE, there are 25 marks and for the Internal Assessment Test component, there are 25 marks.
- The first test will be administered after 40-50% of the syllabus has been covered, and the second test will be administered after 85-90% of the syllabus has been covered
- Any two assignment methods mentioned in the 22OB2.4, if an assignment is project-based then only one assignment for the course shall be planned. The teacher should not conduct two assignments at the end of the semester if two assignments are planned.
- For the course, CIE marks will be based on a scaled-down sum of two tests and other methods of assessment.

**Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

#### **Semester-End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**).

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored shall be proportionally reduced to 50 marks

#### **Suggested Learning Resources:**

- <https://www.youtube.com/watch?v=texxdcepTbY>
- <https://www.youtube.com/watch?v=rDwczdWBITA>

#### **Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

- Course project ( 25 marks)

Load a raw time series dataset (e.g., stock prices, weather data, or energy consumption). Identify trends, seasonality, and noise using visualization tools. Handle missing values, outliers, and perform data transformation (e.g., log transformation or differencing). Decompose the series into trend, seasonal, and residual components using decomposition techniques.

Refer to monthly sales data or airline passenger data and Fit simple models like Moving Average (MA) and Exponential Smoothing (SES). Evaluate performance using metrics such as RMSE, MAE, and MAPE. Experiment with different smoothing parameters to improve forecasts.

<b>Mobile Application Development with Flutter</b>		Semester	6
Course Code	<b>BCGL657A</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	0:0:2:0	SEE Marks	50
Credits	01	Exam Hours	100
Examination type (SEE)	Practical		
<b>Course objectives:</b>			
<ul style="list-style-type: none"> <li>● To introduce basics of Flutter platform for progressive app development</li> <li>● To gain knowledge on user interface support in Flutter.</li> <li>● To learn various programming elements required for app development.</li> <li>● To develop progressive applications with flutter.</li> </ul>			
<b>Sl.NO</b>	<b>Experiments</b>		
1	Develop an application using Flutter to print “Hello world and Hello Flutter”.		
2	Develop an application using Flutter to Increment and Decrement Numbers (Counter App).		
3	Develop Login Screen Application.		
4	Develop a “To-do List” Application.		
5	Develop Calculator Application.		
6	Develop an application to Check the Weather in Countries Across the world (Weather app).		
7	Develop a “Stopwatch” application using Flutter.		
8	Develop an application that Navigate from one Screen to another (Seamless navigation).		
9	Develop Basic E-commerce UI Application.		
10	Develop an application to implement Animates Logo.		
11	Develop an application that tracks our daily Expenses and get a report chart.		
12	Develop an application to Play Quiz and get the Score Board.		
<b>Course outcomes (Course Skill Set):</b>			
At the end of the course the student will be able to:			
<ul style="list-style-type: none"> <li>● Demonstrate basics elements Flutter platform for progressive app development.</li> <li>● Develop user interface designs for applications.</li> <li>● Experiment with different programming elements of app development.</li> <li>● Develop progressive applications for real-world problems.</li> </ul>			

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together

**Continuous Internal Evaluation (CIE):**

CIE marks for the practical course are **50 Marks**.

The split-up of CIE marks for record/ journal and test are in the ratio **60:40**.

- Each experiment is to be evaluated for conduction with an observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments are designed by the faculty who is handling the laboratory session and are made known to students at the beginning of the practical session.
- Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks.
- Total marks scored by the students are scaled down to **30 marks** (60% of maximum marks).
- Weightage to be given for neatness and submission of record/write-up on time.
- Department shall conduct a test of 100 marks after the completion of all the experiments listed in the syllabus.
- In a test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce.
- The suitable rubrics can be designed to evaluate each student's performance and learning ability.
- The marks scored shall be scaled down to **20 marks** (40% of the maximum marks).

The Sum of scaled-down marks scored in the report write-up/journal and marks of a test is the total CIE marks scored by the student.

**Semester End Evaluation (SEE):**

- SEE marks for the practical course are 50 Marks.
- SEE shall be conducted jointly by the two examiners of the same institute, examiners are appointed by the Head of the Institute.
- The examination schedule and names of examiners are informed to the university before the conduction of the examination. These practical examinations are to be conducted between the schedule mentioned in the academic calendar of the University.
- All laboratory experiments are to be included for practical examination.
- (Rubrics) Breakup of marks and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners. **OR** based on the course requirement evaluation rubrics shall be decided jointly by examiners.

- Students can pick one question (experiment) from the questions lot prepared by the examiners jointly.
- Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners.

General rubrics suggested for SEE are mentioned here, writeup-20%, Conduction procedure and result in -60%, Viva-voce 20% of maximum marks. SEE for practical shall be evaluated for 100 marks and scored marks shall be scaled down to 50 marks (however, based on course type, rubrics shall be decided by the examiners)

Change of experiment is allowed only once and 15% of Marks allotted to the procedure part are to be made zero.

The minimum duration of SEE is 02 hours

UI/UX		Semester	6
Course Code	<b>BADL657B</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	0:0:2:0	SEE Marks	50
Credits	01	Exam Hours	02
Examination type (SEE)	Practical		
<b>Course objectives:</b>			
<ul style="list-style-type: none"> <li>● To explore and understand the nuances of User Experience and User Interface.</li> <li>● To gain mastery over the usage of Figma for designing and prototyping UI/UX.</li> <li>● To understand user requirement and translate it into UI/UX prototype.</li> <li>● To analyse apps and websites and understand how they can be continually improved.</li> <li>● To understand the UI components and interactions being used in different apps and websites.</li> </ul>			
<b>Sl.NO</b>	<b>Experiments (Designing and Prototyping using Figma)</b>		
NOTE: Wire frames can be hand-drawn and recorded by the students. Designing and Prototyping can be done using Figma.			
1	Chat App Redesign: Create a Wireframe and redesign any popular chat app.		
2	Food App: Create a wireframe, Design and Prototype the UI Pages for the food application.		
3	Social Media App: Create a wireframe, Design and Prototype social media photo sharing app.		
4	Product Website: Design and prototype a product website page. Create web pages and rollovers for the web pages		
5	Travel Agency Website: Create a wireframe, Design and prototype the UI for the website including design for Home Page with search bar, Activities page, Client Testimonial Page, Image Gallery		
6	UI/UX Designer Portfolio Design: Create a wireframe, Design and prototype a UI for a portfolio including design for About page, Work showcase page, Blog page, contact page		
7	Dashboard Design: Create a wireframe, Design and Prototype Dashboard UI page, add some Dashboard details, statistics and graphs, Add dropdown options for some dashboard details		
8	E-Commerce Website: Create a wireframe, Design and prototype Web pages including product category pages (example: mobiles, gaming consoles, Speakers), product pages in each category, buy now page, add to cart page		
9	Educational Website: Create a wireframe, Design and Prototype the UI for an educational website – Include a Homepage with footer, About Us Page, Programs page, Instructors page, Pricing page, Payments page with radial buttons. Design dropdowns for programs button		
10	Music Player App: Create a wireframe, Design and prototype the pages with a background and a Rollover button, and Song selection Page with a Home Rollover button. The third page may include animated play and pause button, play music animation, timer animation.		
<b>Course outcomes (Course Skill Set):</b>			
At the end of the course the student will be able to:			
<ul style="list-style-type: none"> <li>● Apply the basics of wireframing in designing apps and Websites.</li> <li>● Make use of Figma for designing and prototyping UI/UX for different types of apps and Websites.</li> <li>● Analyse user requirements and translate the requirements to design prototypes.</li> <li>● Demonstrate the UI/UX concepts applied when designing the prototype of apps and Websites.</li> <li>● Develop (redesign) the existing apps &amp; Websites with customized design.</li> </ul>			

### **Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together

Generative AI		Semester	6
Course Code	<b>BAIL657C</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	0:0:1:0	SEE Marks	50
Credits	01	Exam Hours	100
Examination type (SEE)	Practical		
<b>Course objectives:</b> <ul style="list-style-type: none"> <li>• Understand the principles and concepts behind generative AI models</li> <li>• Explain the knowledge gained to implement generative models using Prompt design frameworks.</li> <li>• Apply various Generative AI applications for increasing productivity.</li> <li>• Develop Large Language Model-based Apps.</li> </ul>			
SI.NO	Experiments		
1.	Explore pre-trained word vectors. Explore word relationships using vector arithmetic. Perform arithmetic operations and analyze results.		
2.	Use dimensionality reduction (e.g., PCA or t-SNE) to visualize word embeddings for Q 1. Select 10 words from a specific domain (e.g., sports, technology) and visualize their embeddings. Analyze clusters and relationships. Generate contextually rich outputs using embeddings. Write a program to generate 5 semantically similar words for a given input.		
3.	Train a custom Word2Vec model on a small dataset. Train embeddings on a domain-specific corpus (e.g., legal, medical) and analyze how embeddings capture domain-specific semantics.		
4.	Use word embeddings to improve prompts for Generative AI model. Retrieve similar words using word embeddings. Use the similar words to enrich a GenAI prompt. Use the AI model to generate responses for the original and enriched prompts. Compare the outputs in terms of detail and relevance.		
5.	Use word embeddings to create meaningful sentences for creative tasks. Retrieve similar words for a seed word. Create a sentence or story using these words as a starting point. Write a program that: Takes a seed word. Generates similar words. Constructs a short paragraph using these words.		
6.	Use a pre-trained Hugging Face model to analyze sentiment in text. Assume a real-world application, Load the sentiment analysis pipeline. Analyze the sentiment by giving sentences to input.		
7.	Summarize long texts using a pre-trained summarization model using Hugging face model. Load the summarization pipeline. Take a passage as input and obtain the summarized text.		
8.	Install langchain, cohere (for key), langchain-community. Get the api key( By logging into Cohere and obtaining the cohere key). Load a text document from your google drive . Create a prompt template to display the output in a particular manner.		
9.	Take the Institution name as input. Use Pydantic to define the schema for the desired output and create a custom output parser. Invoke the Chain and Fetch Results. Extract the below Institution related details from Wikipedia: <b>The founder of the Institution. When it was founded. The current branches in the institution . How many employees are working in it. A brief 4-line summary of the institution.</b>		
10	Build a chatbot for the Indian Penal Code. We'll start by downloading the official Indian Penal Code document, and then we'll create a chatbot that can interact with it. Users will be able to ask questions about the Indian Penal Code and have a conversation with it.		

**Course outcomes (Course Skill Set):**

At the end of the course the student will be able to:

- Develop the ability to explore and analyze word embeddings, perform vector arithmetic to investigate word relationships, visualize embeddings using dimensionality reduction techniques
- Apply prompt engineering skills to real-world scenarios, such as information retrieval, text generation.
- Utilize pre-trained Hugging Face models for real-world applications, including sentiment analysis and text summarization.
- Apply different architectures used in large language models, such as transformers, and understand their advantages and limitations.

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together

**Continuous Internal Evaluation (CIE):**

CIE marks for the practical course are **50 Marks**.

The split-up of CIE marks for record/ journal and test are in the ratio **60:40**.

- Each experiment is to be evaluated for conduction with an observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments are designed by the faculty who is handling the laboratory session and are made known to students at the beginning of the practical session.
- Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks.
- Total marks scored by the students are scaled down to **30 marks** (60% of maximum marks).
- Weightage to be given for neatness and submission of record/write-up on time.
- Department shall conduct a test of 100 marks after the completion of all the experiments listed in the syllabus.
- In a test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce.
- The suitable rubrics can be designed to evaluate each student's performance and learning ability.
- The marks scored shall be scaled down to **20 marks** (40% of the maximum marks).

The Sum of scaled-down marks scored in the report write-up/journal and marks of a test is the total CIE marks scored by the student.

**Semester End Evaluation (SEE):**

- SEE marks for the practical course are 50 Marks.
- SEE shall be conducted jointly by the two examiners of the same institute, examiners are appointed by the Head of the Institute.

- The examination schedule and names of examiners are informed to the university before the conduction of the examination. These practical examinations are to be conducted between the schedule mentioned in the academic calendar of the University.
- All laboratory experiments are to be included for practical examination.
- (Rubrics) Breakup of marks and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners. **OR** based on the course requirement evaluation rubrics shall be decided jointly by examiners.
- Students can pick one question (experiment) from the questions lot prepared by the examiners jointly.
- Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners.

General rubrics suggested for SEE are mentioned here, writeup-20%, Conduction procedure and result in -60%, Viva-voce 20% of maximum marks. SEE for practical shall be evaluated for 100 marks and scored marks shall be scaled down to 50 marks (however, based on course type, rubrics shall be decided by the examiners)

Change of experiment is allowed only once and 15% of Marks allotted to the procedure part are to be made zero.

The minimum duration of SEE is 02 hours

**Suggested Learning Resources:**

**Books:**

1. Modern Generative AI with ChatGPT and OpenAI Models: Leverage the Capabilities of OpenAI's LLM for Productivity and Innovation with GPT3 and GPT4, by Valentina Alto, Packt Publishing Ltd, 2023.
2. Generative AI for Cloud Solutions: Architect modern AI LLMs in secure, scalable, and ethical cloud environments, by Paul Singh, Anurag Karuparti, Packt Publishing Ltd, 2024.

<b>INTRODUCTION TO ARTIFICIAL INTELLIGENCE</b>		Semester	6
Course Code	<b>BAI654D</b>	CIE Marks	50
Teaching Hours/Week (L: T:P: S)	3:0:0:0	SEE Marks	50
Total Hours of Pedagogy	40	Total Marks	100
Credits	03	Exam Hours	03
Examination type (SEE)	Theory		
<b>Course objectives:</b>			
<ul style="list-style-type: none"> <li>● To understand the primitives of AI</li> <li>● To familiarize Knowledge Representation Issues</li> <li>● To understand fundamentals of Statistical Reasoning, Natural Language Processing.</li> </ul>			
<b>Teaching-Learning Process (General Instructions)</b>			
These are sample strategies; which teachers can use to accelerate the attainment of the various course outcomes.			
<ol style="list-style-type: none"> <li>1. Lecturer method (L) does not mean only the traditional lecture method, but different types of teaching methods may be adopted to achieve the outcomes.</li> <li>2. Utilize video/animation films to illustrate the functioning of various concepts.</li> <li>3. Promote collaborative learning (Group Learning) in the class.</li> <li>4. Pose at least three HOT (Higher Order Thinking) questions in the class to stimulate critical thinking.</li> <li>5. Incorporate Problem-Based Learning (PBL) to foster students' analytical skills and develop their ability to evaluate, generalize, and analyze information rather than merely recalling it.</li> <li>6. Introduce topics through multiple representations.</li> <li>7. Demonstrate various ways to solve the same problem and encourage students to devise their own creative solutions.</li> <li>8. Discuss the real-world applications of every concept to enhance students' comprehension.</li> <li>9. Use any of these methods: Chalk and board, Active Learning, Case Studies</li> </ol>			
<b>Module-1</b>			
What is artificial intelligence? Problems, Problem Spaces, and search <b>Text Book 1: Ch 1, 2</b>			
<b>Module-2</b>			
Knowledge Representation Issues, Using Predicate Logic, representing knowledge using Rules. <b>Text Book 1: Ch 4, 5 and 6.</b>			
<b>Module-3</b>			
Symbolic Reasoning under Uncertainty, Statistical reasoning <b>Text Book 1: Ch 7, 8</b>			
<b>Module-4</b>			
Game Playing, Natural Language Processing <b>Text Book 1: Ch 12 and 15</b>			
<b>Module-5</b>			
Learning, Expert Systems. <b>Text Book 1: Ch 17 and 20</b>			

**Course outcomes (Course Skill Set)**

At the end of the course, the student will be able to:

1. Identify the problems where the adaptation of AI has significant impact.
2. Analyse the different approaches of Knowledge Representation.
3. Explain Symbolic Reasoning under Uncertainty and Statistical reasoning.
4. Derive the importance of different types of Learning Techniques.
5. Explain Natural Language Processing and Expert System.

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

**Continuous Internal Evaluation:**

- For the Assignment component of the CIE, there are 25 marks and for the Internal Assessment Test component, there are 25 marks.
- The first test will be administered after 40-50% of the syllabus has been covered, and the second test will be administered after 85-90% of the syllabus has been covered
- Any two assignment methods mentioned in the 22OB2.4, if an assignment is project-based then only one assignment for the course shall be planned. The teacher should not conduct two assignments at the end of the semester if two assignments are planned.
- For the course, CIE marks will be based on a scaled-down sum of two tests and other methods of assessment.

**Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

**Semester-End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**).

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored shall be proportionally reduced to 50 marks

**Suggested Learning Resources:****Text Books:**

1. E. Rich, K. Knight & S. B. Nair, Artificial Intelligence, 3<sup>rd</sup> Edition, McGraw Hill.,2009

2. <https://nptel.ac.in/courses/106105077>
3. <https://archive.nptel.ac.in/courses/106/105/106105158/>
4. <https://archive.nptel.ac.in/courses/106/106/106106140/>

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

- Apply NLP steps for any given real time scenario. Students are expected to document different NLP steps and their output for the given scenario. Students can use python or any programming language of their choice. **(10 Marks)**
- Students are expected to identify different case studies/scenarios where expert systems can be adopted. Students need to prepare a report on any one case study. **(15 marks)**

<b>Machine Learning lab</b>		Semester	<b>6</b>
Course Code	BAIL606	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	0:0:2:0	SEE Marks	50
Credits	01	Exam Hours	100
Examination type (SEE)	Practical		
<b>Course objectives:</b>			
<ul style="list-style-type: none"> <li>To become familiar with data and visualize univariate, bivariate, and multivariate data using statistical techniques and dimensionality reduction.</li> <li>To understand various machine learning algorithms such as similarity-based learning, regression, decision trees, and clustering.</li> <li>To familiarize with learning theories, probability-based models and developing the skills required for decision-making in dynamic environments.</li> </ul>			
<b>Sl.NO</b>	<b>Experiments</b>		
1	Develop a program to Load a dataset and select one numerical column. Compute mean, median, mode, standard deviation, variance, and range for a given numerical column in a dataset. Generate a histogram and boxplot to understand the distribution of the data. Identify any outliers in the data using IQR. Select a categorical variable from a dataset. Compute the frequency of each category and display it as a bar chart or pie chart.		
2	Develop a program to Load a dataset with at least two numerical columns (e.g., Iris, Titanic). Plot a scatter plot of two variables and calculate their Pearson correlation coefficient. Write a program to compute the covariance and correlation matrix for a dataset. Visualize the correlation matrix using a heatmap to know which variables have strong positive/negative correlations.		
3	Develop a program to implement Principal Component Analysis (PCA) for reducing the dimensionality of the Iris dataset from 4 features to 2.		
4	Develop a program to load the Iris dataset. Implement the k-Nearest Neighbors (k-NN) algorithm for classifying flowers based on their features. Split the dataset into training and testing sets and evaluate the model using metrics like accuracy and F1-score. Test it for different values of $k$ (e.g., $k=1,3,5$ ) and evaluate the accuracy. Extend the k-NN algorithm to assign weights based on the distance of neighbors (e.g., $weight=1/d^2$ ). Compare the performance of weighted k-NN and regular k-NN on a synthetic or real-world dataset.		
6	Implement the non-parametric Locally Weighted Regression algorithm in order to fit data points. Select appropriate data set for your experiment and draw graphs.		
7	Develop a program to demonstrate the working of Linear Regression and Polynomial Regression. Use Boston Housing Dataset for Linear Regression and Auto MPG Dataset (for vehicle fuel efficiency prediction) for Polynomial Regression.		
8	Develop a program to load the Titanic dataset. Split the data into training and test sets. Train a decision tree classifier. Visualize the tree structure. Evaluate accuracy, precision, recall, and F1-score.		
9	Develop a program to implement the Naive Bayesian classifier considering Iris dataset for training. Compute the accuracy of the classifier, considering the test data.		
10	Develop a program to implement k-means clustering using Wisconsin Breast Cancer data set and visualize the clustering result.		

**Course outcomes (Course Skill Set):**

At the end of the course the student will be able to:

- Illustrate the principles of multivariate data and apply dimensionality reduction techniques.
- Demonstrate similarity-based learning methods and perform regression analysis.
- Develop decision trees for classification and regression problems, and Bayesian models for probabilistic learning.
- Implement the clustering algorithms to share computing resources.

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together

**Continuous Internal Evaluation (CIE):**

CIE marks for the practical course are **50 Marks**.

The split-up of CIE marks for record/ journal and test are in the ratio **60:40**.

- Each experiment is to be evaluated for conduction with an observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments are designed by the faculty who is handling the laboratory session and are made known to students at the beginning of the practical session.
- Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks.
- Total marks scored by the students are scaled down to **30 marks** (60% of maximum marks).
- Weightage to be given for neatness and submission of record/write-up on time.
- Department shall conduct a test of 100 marks after the completion of all the experiments listed in the syllabus.
- In a test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce.
- The suitable rubrics can be designed to evaluate each student's performance and learning ability.
- The marks scored shall be scaled down to **20 marks** (40% of the maximum marks).

<p><b>Course outcomes (Course Skill Set)</b></p> <p>At the end of the course, the student will be able to:</p> <ol style="list-style-type: none"> <li>1. Explain the fundamentals of operating systems.</li> <li>2. Apply appropriate CPU scheduling algorithm for the given scenarios.</li> <li>3. Analyse the various techniques for process synchronization and deadlock handling.</li> <li>4. Apply the various techniques for memory management</li> <li>5. Analyse the importance of File System Mounting and File Sharing</li> </ol>

### **Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

#### **Continuous Internal Evaluation:**

- For the Assignment component of the CIE, there are 25 marks and for the Internal Assessment Test component, there are 25 marks.
- The first test will be administered after 40-50% of the syllabus has been covered, and the second test will be administered after 85-90% of the syllabus has been covered
- Any two assignment methods mentioned in the 22OB2.4, if an assignment is project-based then only one assignment for the course shall be planned. The teacher should not conduct two assignments at the end of the semester if two assignments are planned.
- For the course, CIE marks will be based on a scaled-down sum of two tests and other methods of assessment.

**Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

#### **Semester-End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**).

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored shall be proportionally reduced to 50 marks

#### **Suggested Learning Resources:**

##### **Text Books:**

1. Abraham Silberschatz, Peter Baer Galvin, Greg Gagne, Operating System Principles 10<sup>th</sup> edition, Wiley-India, 2015

<b>DEVOPS</b>		Semester	<b>6</b>
Course Code	<b>BCSL657D</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	0:0:2:0	SEE Marks	50
Credits	01	Exam Hours	100
Examination type (SEE)	Practical		
<b>Course objectives:</b>			
<ul style="list-style-type: none"> <li>● To introduce DevOps terminology, definition &amp; concepts</li> <li>● To understand the different Version control tools like Git, Mercurial</li> <li>● To understand the concepts of Continuous Integration/ Continuous Testing/ Continuous Deployment)</li> <li>● To understand Configuration management using Ansible</li> <li>● Illustrate the benefits and drive the adoption of cloud-based Devops tools to solve real world problems</li> </ul>			
Sl.NO	Experiments		
1	<b>Introduction to Maven and Gradle:</b> Overview of Build Automation Tools, Key Differences Between Maven and Gradle, Installation and Setup		
2	<b>Working with Maven:</b> Creating a Maven Project, Understanding the POM File, Dependency Management and Plugins		
3	<b>Working with Gradle:</b> Setting Up a Gradle Project, Understanding Build Scripts (Groovy and Kotlin DSL), Dependency Management and Task Automation		
4	<b>Practical Exercise:</b> Build and Run a Java Application with Maven, Migrate the Same Application to Gradle		
5	<b>Introduction to Jenkins:</b> What is Jenkins?, Installing Jenkins on Local or Cloud Environment, Configuring Jenkins for First Use		
6	<b>Continuous Integration with Jenkins:</b> Setting Up a CI Pipeline, Integrating Jenkins with Maven/Gradle, Running Automated Builds and Tests		
7	<b>Configuration Management with Ansible:</b> Basics of Ansible: Inventory, Playbooks, and Modules, Automating Server Configurations with Playbooks, Hands-On: Writing and Running a Basic Playbook		
8	<b>Practical Exercise:</b> Set Up a Jenkins CI Pipeline for a Maven Project, Use Ansible to Deploy Artifacts Generated by Jenkins		
9	<b>Introduction to Azure DevOps:</b> Overview of Azure DevOps Services, Setting Up an Azure DevOps Account and Project		
10	<b>Creating Build Pipelines:</b> Building a Maven/Gradle Project with Azure Pipelines, Integrating Code Repositories (e.g., GitHub, Azure Repos), Running Unit Tests and Generating Reports		
11	<b>Creating Release Pipelines:</b> Deploying Applications to Azure App Services, Managing Secrets and Configuration with Azure Key Vault, Hands-On: Continuous Deployment with Azure Pipelines		
12	<b>Practical Exercise and Wrap-Up:</b> Build and Deploy a Complete DevOps Pipeline, Discussion on Best Practices and Q&A		
<b>Course outcomes (Course Skill Set):</b>			
At the end of the course the student will be able to:			
<ul style="list-style-type: none"> <li>● Demonstrate different actions performed through Version control tools like Git.</li> <li>● Perform Continuous Integration and Continuous Testing and Continuous Deployment using Jenkins by building and automating test cases using Maven &amp; Gradle.</li> <li>● Experiment with configuration management using Ansible.</li> <li>● Demonstrate Cloud-based DevOps tools using Azure DevOps.</li> </ul>			

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together

**Continuous Internal Evaluation (CIE):**

CIE marks for the practical course are **50 Marks**.

The split-up of CIE marks for record/ journal and test are in the ratio **60:40**.

- Each experiment is to be evaluated for conduction with an observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments are designed by the faculty who is handling the laboratory session and are made known to students at the beginning of the practical session.
- Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks.
- Total marks scored by the students are scaled down to **30 marks** (60% of maximum marks).
- Weightage to be given for neatness and submission of record/write-up on time.
- Department shall conduct a test of 100 marks after the completion of all the experiments listed in the syllabus.
- In a test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce.
- The suitable rubrics can be designed to evaluate each student's performance and learning ability.
- The marks scored shall be scaled down to **20 marks** (40% of the maximum marks).

The Sum of scaled-down marks scored in the report write-up/journal and marks of a test is the total CIE marks scored by the student.

**Semester End Evaluation (SEE):**

- SEE marks for the practical course are 50 Marks.
- SEE shall be conducted jointly by the two examiners of the same institute, examiners are appointed by the Head of the Institute.
- The examination schedule and names of examiners are informed to the university before the conduction of the examination. These practical examinations are to be conducted between the schedule mentioned in the academic calendar of the University.
- All laboratory experiments are to be included for practical examination.
- (Rubrics) Breakup of marks and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners. **OR** based on the course requirement evaluation rubrics shall be decided jointly by examiners.

- Students can pick one question (experiment) from the questions lot prepared by the examiners jointly.
- Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners.

General rubrics suggested for SEE are mentioned here, writeup-20%, Conduction procedure and result in -60%, Viva-voce 20% of maximum marks. SEE for practical shall be evaluated for 100 marks and scored marks shall be scaled down to 50 marks (however, based on course type, rubrics shall be decided by the examiners)

Change of experiment is allowed only once and 15% of Marks allotted to the procedure part are to be made zero.

The minimum duration of SEE is 02 hours

**PRACTICAL COMPONENT OF IPCC** *(May cover all / major modules)*

Sl.NO	Experiments
1	Design and implement a neural based network for generating word embedding for words in a document corpus
2	Write a program to demonstrate the working of a deep neural network for classification task.
3	Design and implement a Convolutional Neural Network(CNN) for classification of image dataset
4	Build and demonstrate an autoencoder network using neural layers for data compression on image dataset.
5	Design and implement a deep learning network for classification of textual documents.
6	Design and implement a deep learning network for forecasting time series data.
7	Write a program to enable pre-train models to classify a given image dataset
8	Simple Grid World Problem: Design a custom 2D grid world where the agent navigates from a start position to a goal, avoiding obstacles. Environment: Custom grid (easily implemented in Python)

**Course outcomes (Course Skill Set):**

At the end of the course, the student will be able to:

- CO1: Demonstrate the implementation of deep learning techniques
- CO2: Examine various deep learning techniques for solving the real world problems
- CO3: Design and implement research-oriented scenario using deep learning techniques in a team

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

**CIE for the theory component of the IPCC (maximum marks 50)**

- IPCC means practical portion integrated with the theory of the course.
- CIE marks for the theory component are **25 marks** and that for the practical component is **25 marks**.
- 25 marks for the theory component are split into **15 marks** for two Internal Assessment Tests (Two Tests, each of 15 Marks with 01-hour duration, are to be conducted) and **10 marks** for other assessment methods mentioned in 22OB4.2. The first test at the end of 40-50% coverage of the syllabus and the second test after covering 85-90% of the syllabus.
- Scaled-down marks of the sum of two tests and other assessment methods will be CIE marks for the theory component of IPCC (that is for **25 marks**).
- The student has to secure 40% of 25 marks to qualify in the CIE of the theory component of IPCC.

**CIE for the practical component of the IPCC**

- **15 marks** for the conduction of the experiment and preparation of laboratory record, and **10 marks** for the test to be conducted after the completion of all the laboratory sessions.

- On completion of every experiment/program in the laboratory, the students shall be evaluated including viva-voce and marks shall be awarded on the same day.
- The CIE marks awarded in the case of the Practical component shall be based on the continuous evaluation of the laboratory report. Each experiment report can be evaluated for 10 marks. Marks of all experiments' write-ups are added and scaled down to **15 marks**.
- The laboratory test (**duration 02/03 hours**) after completion of all the experiments shall be conducted for 50 marks and scaled down to **10 marks**.
- Scaled-down marks of write-up evaluations and tests added will be CIE marks for the laboratory component of IPCC for **25 marks**.
- The student has to secure 40% of 25 marks to qualify in the CIE of the practical component of the IPCC.

### SEE for IPCC

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored by the student shall be proportionally scaled down to 50 Marks

**The theory portion of the IPCC shall be for both CIE and SEE, whereas the practical portion will have a CIE component only. Questions mentioned in the SEE paper may include questions from the practical component.**

<p><b>Course objectives:</b></p> <ul style="list-style-type: none"> <li>● To introduce concept learning and General to specific learning</li> <li>● To learn set of rules using Sequential Covering approach</li> <li>● To make decisions on decision by committee</li> <li>● To understand similarities using unsupervised learning .</li> <li>● To understand Markov Chain Monte Carlo (MCMC) and Graphical Methods</li> </ul>			
<p><b>Teaching-Learning Process (General Instructions)</b>            These are sample Strategies; that teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) need not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem with different logic and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding</li> </ol>			
<b>MODULE-1</b>			
<p><b>Introduction:</b> Well-Posed Learning Problems, Designing a Learning System, Perspectives and Issues in Machine Learning.</p> <p><b>Concept Learning and the General-to-Specific Ordering:</b> A Concept Learning Task, Concept Learning as Search, Find-S: Finding a Maximally Specific Hypothesis, Version Spaces and the Candidate-Elimination Algorithm, Remarks on Version Spaces and Candidate-Elimination, Inductive Bias.</p> <p><b>Text Book 1 : Ch 1 &amp; 2</b></p>			
<b>MODULE-2</b>			
<p><b>Learning Sets of Rules:</b> Sequential Covering Algorithms, Learning Rule Sets: Example-Based Methods, Learning First-Order Rules, FOIL: A First-Order Inductive Learner.</p> <p><b>Analytical Learning:</b> Perfect Domain Theories: Explanation-Based Learning, Explanation-Based Learning of Search Control Knowledge, Inductive-Analytical Approaches to Learning.</p> <p><b>Text Book 1 : Ch 10 &amp; 11</b></p>			
<b>MODULE-3</b>			
<p><b>Decision by Committee: Ensemble Learning:</b> Boosting: Adaboost , Stumping, Bagging: Subagging, Random Forests, Comparison With Boosting, Different Ways To Combine Classifiers.</p> <p><b>Unsupervised Learning: The K-MEANS algorithm :</b> Dealing with Noise ,The k-Means Neural Network , Normalisation ,A Better Weight Update Rule ,Using Competitive Learning for Clustering.</p> <p><b>Text Book 2: Chap 13 and 14.1</b></p>			
<b>MODULE-4</b>			

<p><b>Unsupervised Learning:</b> Vector Quantisation, the self-organising feature map , The SOM Algorithm, Neighbourhood Connections, Self-Organisation, Network Dimensionality and Boundary Conditions, Examples of Using the SOM.</p> <p><b>Markov Chain Monte Carlo (MCMC) Methods:</b> Sampling : Random Numbers ,Gaussian Random Numbers ,Monte Carlo Or Bust,The Proposal Distribution , Markov Chain Monte Carlo.</p> <p><b>Text Book 2: Chap 14.2, 14.3, 15</b></p>
<b>MODULE-5</b>
<p><b>Graphical Models:</b> Bayesian Networks : Approximate Inference , Making Bayesian Networks , Markov Random Fields , Hidden Markov Models (Hmms), The Forward Algorithm , The Viterbi Algorithm , The Baum–Welch Or Forward–Backward Algorithm , Tracking Methods , The Kalman Filter, The Particle Filter.</p> <p><b>Text Book 2 : Chap 16</b></p>

**PRACTICAL COMPONENT OF IPCC** *(May cover all / major modules)*

Sl.NO	Experiments
1	Read a dataset from the user and i. Use the Find-S algorithm to find the most specific hypothesis that is consistent with the positive examples. ii. What is the final hypothesis after processing all the positive examples? Using the same dataset, apply the Candidate Elimination algorithm. Determine the final version space after processing all examples (both positive and negative). What are the most specific and most general hypotheses in the version space?
2	Read a dataset and use an <b>example-based method</b> (such as <b>RIPPER</b> or <b>CN2</b> ) to generate a set of classification rules . Apply the <b>FOIL algorithm</b> (First-Order Inductive Learner) to learn first-order rules for predicting.
3	Read a supervised dataset and use bagging and boosting technique to classify the dataset. Indicate the performance of the model.
4	Read an unsupervised dataset and group the dataset based on similarity based on k-means clustering .
5	Read a dataset and perform unsupervised learning using SOM algorithm.
6	Write a function to generate <b>uniform random numbers</b> in the interval [0, 1]. Use this function to generate 10 random samples and evaluate f(x) for each sample. What are the sampled function values? Using the samples generated in the previous step, estimate the integral I using the <b>Monte Carlo method</b> .
7	Read a dataset and indicate the likelihood of an event occurring using Bayesian Networks.
8	Refer to the dataset in question 7 and indicate inferences based on the sequence of steps .

**Course outcomes (Course Skill Set):**

At the end of the course, the student will be able to:

1. Apply concept learning and General to specific learning
2. Design models to classify supervised data .
3. To analyze methods to identify similarities using unsupervised learning .
4. To understand Markov Chain Monte Carlo (MCMC) and Graphical Methods.

**Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

**CIE for the theory component of the IPCC (maximum marks 50)**

- IPCC means practical portion integrated with the theory of the course.
- CIE marks for the theory component are **25 marks** and that for the practical component is **25 marks**.
- 25 marks for the theory component are split into **15 marks** for two Internal Assessment Tests (Two Tests, each of 15 Marks with 01-hour duration, are to be conducted) and **10 marks** for other assessment methods mentioned in 22OB4.2. The first test at the end of 40-50% coverage of the syllabus and the second test after covering 85-90% of the syllabus.
- Scaled-down marks of the sum of two tests and other assessment methods will be CIE marks for the theory component of IPCC (that is for **25 marks**).
- The student has to secure 40% of 25 marks to qualify in the CIE of the theory component of IPCC.

**CIE for the practical component of the IPCC**

- **15 marks** for the conduction of the experiment and preparation of laboratory record, and **10 marks** for the test to be conducted after the completion of all the laboratory sessions.
- On completion of every experiment/program in the laboratory, the students shall be evaluated including viva-voce and marks shall be awarded on the same day.
- The CIE marks awarded in the case of the Practical component shall be based on the continuous evaluation of the laboratory report. Each experiment report can be evaluated for 10 marks. Marks of all experiments' write-ups are added and scaled down to **15 marks**.
- The laboratory test (**duration 02/03 hours**) after completion of all the experiments shall be conducted for 50 marks and scaled down to **10 marks**.
- Scaled-down marks of write-up evaluations and tests added will be CIE marks for the laboratory component of IPCC for **25 marks**.
- The student has to secure 40% of 25 marks to qualify in the CIE of the practical component of the IPCC.

**SEE for IPCC**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**)

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored by the student shall be proportionally scaled down to 50 Marks

**The theory portion of the IPCC shall be for both CIE and SEE, whereas the practical portion will have a CIE component only. Questions mentioned in the SEE paper may include questions from the practical component.**

**Suggested Learning Resources:****Books**

1. Tom Mitchell, —Machine Learning, McGraw Hill, 3rd Edition, 1997.
2. Stephen Marsland, “Machine Learning - An Algorithmic Perspective”, Second Edition, CRC Press - Taylor and Francis Group, 2015.

**Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

Miniproject in the topics of machine learning.

<b>DATA SECURITY AND PRIVACY</b>		Semester	7
Course Code	<b>BAD703</b>	CIE Marks	50
Teaching Hours/Week (L:T:P: S)	4:0:0:0	SEE Marks	50
Total Hours of Pedagogy	50	Total Marks	100
Credits	04	Exam Hours	3
Examination type (SEE)	Theory		
<p><b>Course objectives:</b></p> <ol style="list-style-type: none"> <li>1. Understand the basics of, Security, its principle and Cryptography</li> <li>2. To study various symmetric and asymmetric cryptographic Algorithm</li> <li>3. Apply the knowledge of Cryptography to various fields</li> <li>4. Study the key management system</li> <li>5. Understand the necessity of data security</li> </ol>			
<p><b>Teaching-Learning Process</b>  These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.</p> <ol style="list-style-type: none"> <li>1. Lecturer method (L) needs not to be only a traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.</li> <li>2. Use of Video/Animation to explain functioning of various concepts.</li> <li>3. Encourage collaborative (Group Learning) Learning in the class.</li> <li>4. Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.</li> <li>5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.</li> <li>6. Introduce Topics in manifold representations.</li> <li>7. Show the different ways to solve the same problem with different circuits/logic and encourage the students to come up with their own creative ways to solve them.</li> <li>8. Discuss how every concept can be applied to the real world - and when that's possible, it helps improve the students' understanding</li> <li>9. Use any of these methods: Chalk and board, Active Learning, Case Studies</li> </ol>			
<b>Module-1      10 hours</b>			
<p>A model for Network Security, Classical encryption techniques: Symmetric cipher model, Substitution ciphers-Caesar Cipher, Monoalphabetic Cipher, Playfair Cipher, Hill Cipher, Polyalphabetic Ciphers, One time pad, Steganography  Block Ciphers and Data Encryption Standards: Traditional Block Cipher structures, data Encryption Standard (DES), A DES Example, The strength of DES, Block cipher design principles</p> <p>Text book 1:  Chapter 1: 1.8    Chapter 3: 3.1, 3.2, 3.5    Chapter 4: 4.1, 4.2, 4.3, 4.4, 4.5</p>			
<b>Module-2      10 hours</b>			

<p>Pseudorandom number Generators: Linear Congruential Generators, Blum Blum Shub Generator</p> <p>Public key cryptography and RSA: Principles of public key cryptosystems-Public key cryptosystems, Applications for public key cryptosystems, Requirements for public key cryptography, Public key Cryptanalysis, The RSA algorithm: Description of the Algorithm, Computational aspects, The Security of RSA</p> <p>Diffie-Hellman key exchange: The Algorithm, Key exchange Protocols, Man-in-the-middle Attack, Elliptic Curve Cryptography: Analog of Diffie-Hellman key Exchange, Elliptic Curve Encryption/Decryption, Security of Elliptic Curve Cryptography</p> <p>Text book 1: Chapter 8: 8.2 Chapter 9: 9.1, 9.2 Chapter 10: 10.1, 10.4</p>
<p><b>Module-3 10 hours</b></p>
<p>Key management fundamentals, Key lengths and lifetimes, Key generation, Key establishment, Key storage, Key usage, Governing key management.</p> <p><b>Public-Key Management:</b> Certification of public keys, The certificate lifecycle, Public-key management models, Alternative approaches.</p> <p>Text book 2: Chapter 10, Chapter 11</p>
<p><b>Module-4 10 hours</b></p>
<p>Web security consideration, Transport layer security.</p> <p>IP Security: IP Security overview, IP Security Policy, Encapsulating Security Payload, Combining security associations, Internet key exchange.</p> <p>Text book1: Chapter 17: 17.1, 17.2 Chapter 20: 20.1, 20.2, 20.3 20.4, 20.5</p>
<p><b>Module-5 10 hours</b></p>
<p>Data Security: Data hiding in Text-Basic features, Applications of data hiding, Watermarking, Intuitive Methods, Simple Digital methods, Data hiding in Text, Innocuous Text, Mimic Functions.</p> <p>Data hiding in Images: LSB encoding, BPCS Steganography, Lossless data hiding</p> <p>Textbook 3: Chapter 10: 10.1, 10.2, 10.3, 10.4, 10.5, 10.6, 10.7, 10.8 Chapter 11: 11.1, 11.2, 11.3</p>
<p><b>Course outcome</b></p> <p>At the end of the course, the student will be able to :</p> <p><b>CO1:</b> Explain the basic concepts of Security and Cryptography</p> <p><b>CO2:</b> Analyze various Cryptographic Algorithm</p> <p><b>CO3:</b> Describe various key management scenarios.</p> <p><b>CO4:</b> Explain about IP security and Web security.</p>

**CO5:** Apply the Data security concepts for Text and images.

### **Assessment Details (both CIE and SEE)**

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50) and for the SEE minimum passing mark is 35% of the maximum marks (18 out of 50 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

#### **Continuous Internal Evaluation:**

- For the Assignment component of the CIE, there are 25 marks and for the Internal Assessment Test component, there are 25 marks.
- The first test will be administered after 40-50% of the syllabus has been covered, and the second test will be administered after 85-90% of the syllabus has been covered
- Any two assignment methods mentioned in the 22OB2.4, if an assignment is project-based then only one assignment for the course shall be planned. The teacher should not conduct two assignments at the end of the semester if two assignments are planned.
- For the course, CIE marks will be based on a scaled-down sum of two tests and other methods of assessment.

**Internal Assessment Test question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.**

#### **Semester-End Examination:**

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (**duration 03 hours**).

1. The question paper will have ten questions. Each question is set for 20 marks.
2. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
3. The students have to answer 5 full questions, selecting one full question from each module.
4. Marks scored shall be proportionally reduced to 50 marks

#### **Suggested Learning Resources:**

##### **Books**

##### **Textbook**

1. Cryptography and Network Security”, William Stallings, Pearson Publication, Seventh Edition.
2. Everyday Cryptography: Fundamental Principles and Applications Keith M. Martin Oxford Scholarship Online: December 2013.
3. Data Privacy and Security, Salomon, David, Springer, 2003.

##### **Reference Books:**

1. Cryptography and Network Security, Behrouz A Forouzan, Dedeep Mukhopadhyay, TMH, 2<sup>nd</sup> edition, 2013
2. Information Security: Principles and practice, Mark Stamp, Wiley Inter Science, 2011

#### **Activity Based Learning (Suggested Activities in Class)/ Practical Based learning**

- Group assignments (TWO) to implement Cryptographic Algorithms (15+10 marks]
