

Industrial visit at AIML Dept. KSIT

Industrial visits for engineering students are crucial for bridging the gap between theoretical knowledge and practical application in real-world industry settings. The students are offered to have a chance to observe industrial operations, interact with Industry professionals, and gain insights into the latest technologies and trends, ultimately enhancing their employability and career prospects.

The AIML department of KSIT regularly organizes the industrial visits which help the students to understand the practical context to theoretical concepts, bridging the Gap between Academia and Industry, Developing Industry-Ready Engineers, Promoting Innovation and Research.
